SECTION 4. FIRST AID MEASURES

General advice: Have the product container, label or Safety Data Sheet with
you when calling the emergency number, a poison control center or physician, or going for treatment.

If inhaled:
- Take the victim into fresh air.
- If breathing is irregular or stopped, administer artificial respiration.
- Keep patient warm and at rest.
- Call a physician or poison control center immediately.

In case of skin contact:
- Take off all contaminated clothing immediately.
- Wash off immediately with plenty of water.
- If skin irritation persists, call a physician.
- Wash contaminated clothing before re-use.

In case of eye contact:
- Rinse immediately with plenty of water, also under the eyelids, for at least 15 minutes.
- Remove contact lenses.
- Immediate medical attention is required.

If swallowed:
- If swallowed, seek medical advice immediately and show this container or label.
- Do NOT induce vomiting.

Most important symptoms and effects, both acute and delayed:
- Nonspecific
- No symptoms known or expected.

Notes to physician:
- There is no specific antidote available.
- Treat symptomatically.

SECTION 5. FIRE-FIGHTING MEASURES

Suitable extinguishing media:
- Extinguishing media - small fires
  - Use water spray, alcohol-resistant foam, dry chemical or carbon dioxide.
  - Extinguishing media - large fires
  - Alcohol-resistant foam
  - Water spray

Unsuitable extinguishing media:
- Do not use a solid water stream as it may scatter and spread fire.

Specific hazards during fire fighting:
- As the product contains combustible organic ingredients, fire will produce dense black smoke containing hazardous products of combustion (see section 10).
- Exposure to decomposition products may be a hazard to health.

Further information:
- Do not allow run-off from fire fighting to enter drains or water courses.
- Cool closed containers exposed to fire with water spray.

Special protective equipment for fire-fighters:
- Wear full protective clothing and self-contained breathing apparatus.
SECTION 6. ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment and emergency procedures: Refer to protective measures listed in sections 7 and 8. Avoid dust formation.

Environmental precautions: Do not flush into surface water or sanitary sewer system. If the product contaminates rivers and lakes or drains inform respective authorities.

Methods and materials for containment and cleaning up: Contain spillage, pick up with an electrically protected vacuum cleaner or by wet-brushing and transfer to a container for disposal according to local regulations (see section 13). Do not create a powder cloud by using a brush or compressed air. Clean contaminated surface thoroughly. Clean with detergents. Avoid solvents. Retain and dispose of contaminated wash water.

SECTION 7. HANDLING AND STORAGE

Advice on safe handling: This material is capable of forming flammable dust clouds in air, which, if ignited, can produce a dust cloud explosion. Flames, hot surfaces, mechanical sparks and electrostatic discharges can serve as ignition sources for this material. Electrical equipment should be compatible with the flammability characteristics of this material. The flammability characteristics will be made worse if the material contains traces of flammable solvents or is handled in the presence of flammable solvents. This material can become readily charged in most operations. Avoid contact with skin and eyes. When using do not eat, drink or smoke. For personal protection see section 8.

Conditions for safe storage: Keep containers tightly closed in a dry, cool and well-ventilated place. Keep out of the reach of children. Keep away from food, drink and animal feedingstuffs.

**Engineering measures**

The following recommendations for exposure controls/personal protection are intended for the manufacture, formulation and packaging of the product. For commercial applications and/or on-farm applications consult the product label.

Containment and/or segregation is the most reliable technical protection measure if exposure cannot be eliminated. The extent of these protection measures depends on the actual risks in use. Maintain air concentrations below occupational exposure standards. Where necessary, seek additional occupational hygiene advice.

**Personal protective equipment**

- **Respiratory protection**: No personal respiratory protective equipment normally required. When workers are facing concentrations above the exposure limit they must use appropriate certified respirators.

- **Hand protection**: None required.

- **Eye protection**: None required.

- **Skin and body protection**: None required. Select skin and body protection based on the physical job requirements.

- **Protective measures**: The use of technical measures should always have priority over the use of personal protective equipment. When selecting personal protective equipment, seek appropriate professional advice.
