Arbor-OTC

| Section 1. Identification |  |
| :--- | :--- |
| GHS product identifier | : Arbor-OTC |
| Product use | : Antibiotic |

## Section 2. Hazards identification

OSHA/HCS status
Classification of the
substance or mixture
GHS label elements
Hazard pictograms
: Warning
Hazard statements : Causes serious eye irritation.
Precautionary statements
Prevention

Response

Storage
Disposal
Hazards not otherwise classified (29 CFR 1910.1200).
:

: Wear eye or face protection.
Wash hands thoroughly after handling. present and easy to do. Continue rinsing.
If eye irritation persists: Get medical attention.
: Not applicable.
: Not applicable.
: None known.
: This material is considered hazardous by the OSHA Hazard Communication Standard
: SERIOUS EYE DAMAGE/ EYE IRRITATION - Category 2A
: IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if

## Section 3. Composition/information on ingredients

Substance/mixture
Other means of identification
: Mixture
: Not available.

## CAS number/other identifiers

| CAS number | $:$ Not applicable. |
| :--- | :--- |
| Product code | $: 28 \mathrm{Gr} .040-7000,140 \mathrm{Gr} .040-7100$ |

## Section 3. Composition/information on ingredients

| Ingredient name | $\%$ | CAS number |
| :--- | :--- | :--- |
| oxytetracycline hydrochloride | $\geq 25-<50$ | $2058-46-0$ |

Any concentration shown as a range is to protect confidentiality or is due to batch variation.
There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.
Occupational exposure limits, if available, are listed in Section 8.

## Section 4. First aid measures

## Description of necessary first aid measures

| Eye contact | : Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention. |
| :---: | :---: |
| Inhalation | : Remove victim to fresh air and keep at rest in a position comfortable for breathing. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention if adverse health effects persist or are severe. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours. |
| Skin contact | : Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Get medical attention if symptoms occur. Wash clothing before reuse. Clean shoes thoroughly before reuse. |
| Ingestion | Wash out mouth with water. Remove dentures if any. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention if adverse health effects persist or are severe. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. |

## Most important symptoms/effects, acute and delayed

 Potential acute health effects| Eye contact | $:$ Causes serious eye irritation. |
| :--- | :--- |
| Inhalation | : No known significant effects or critical hazards. |
| Skin contact | : No known significant effects or critical hazards. |
| Ingestion | : No known significant effects or critical hazards. |

## Over-exposure signs/symptoms

| Eye contact | $:$Adverse symptoms may include the following: <br> pain or irritation <br> watering <br> redness |
| :--- | :--- |
|  | $:$ No specific data. |
| Inhalation | $:$ No specific data. |
| Skin contact | $:$ No specific data. |

## Indication of immediate medical attention and special treatment needed, if necessary

Notes to physician

Specific treatments
: In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.
: No specific treatment.

## Section 4. First aid measures

Protection of first-aiders : No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.

See toxicological information (Section 11)

## Section 5. Fire-fighting measures

## Extinguishing media <br> Suitable extinguishing media <br> Unsuitable extinguishing media

: Water spray, dry powder or sand, carbon dioxide, or appropriate material for surrounding fire.
: None known.
: When heated to decomposition, material emits toxic fumes of NOx and HCl .
: Decomposition products may include the following materials:
carbon dioxide
carbon monoxide
nitrogen oxides
halogenated compounds

Special protective actions : Promptly isolate the scene by removing all persons from the vicinity of the incident if for fire-fighters there is a fire. No action shall be taken involving any personal risk or without suitable training.
Special protective
equipment for fire-fighters
: Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

## Section 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures
For non-emergency

personnel $\quad$\begin{tabular}{l}

: | No action shall be taken involving any personal risk or without suitable training. |
| :--- |
| Evacuate surrounding areas. Keep unnecessary and unprotected personnel from |
| entering. Do not touch or walk through spilled material. Provide adequate ventilation. |
| Wear appropriate respirator when ventilation is inadequate. Put on appropriate |
| personal protective equipment. | <br>

For emergency responders : If specialised clothing is required to deal with the spillage, take note of any information <br>
in Section 8 on suitable and unsuitable materials. <br>
See also the information in "For non-emergency personnel".
\end{tabular}

## Methods and materials for containment and cleaning up

Small spill : Move containers from spill area. Avoid dust generation. Using a vacuum with HEPA filter will reduce dust dispersal. Place spilled material in a designated, labeled waste container. Dispose of via a licensed waste disposal contractor.
Large spill : Move containers from spill area. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Avoid dust generation. Do not dry sweep. Vacuum dust with equipment fitted with a HEPA filter and place in a closed, labeled waste container. Dispose of via a licensed waste disposal contractor. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

## Section 7. Handling and storage

## Precautions for safe handling

Protective measures : Put on appropriate personal protective equipment (see Section 8). Do not ingest. Avoid breathing dust. Avoid contact with eyes, skin and clothing. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container.

Advice on general occupational hygiene
: Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

Conditions for safe storage, : Store in accordance with local regulations. Store in tight, light-resistant container, away including any incompatibilities from incompatible materials (see Section 10) and food and drink. Store in a freezer. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.

## Section 8. Exposure controls/personal protection

## Control parameters

Occupational exposure limits
None.

Appropriate engineering controls
Environmental exposure controls
: Good general ventilation should be sufficient to control worker exposure to airborne contaminants.
: Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

## Individual protection measures

## Hygiene measures

: Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location. Avoid alcoholic beverages 24 hours before and after handling this product.
Eye/face protection
: Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles.
Skin protection
Hand protection
: Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated.
Body protection : Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
Other skin protection : Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

## Section 8. Exposure controls/personal protection

Respiratory protection : Use a properly fitted, particulate filter respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator. Ensure an NIOSH-approved respirator or equivalent is used.

## Section 9. Physical and chemical properties

## Appearance

| Physical state | Crystalline powder. [Solid] |
| :---: | :---: |
| Color | Yellow. |
| Odor | Odorless. |
| Odor threshold | Not available. |
| pH | 2.31 |
| Melting point | $220^{\circ} \mathrm{C}\left(428^{\circ} \mathrm{F}\right)$ |
| Boiling point | Not available. |
| Flash point | Not available. |
| Evaporation rate | Not available. |
| Flammability (solid, gas) | : Not available. |
| Lower and upper explosive (flammable) limits | : Not available. |
| Vapor pressure | : Not available. |
| Vapor density | Not available. |
| Relative density | Not available. |
| Solubility | Easily soluble in the following materials: water. Partially soluble in the following materials: methanol. Less soluble in the following materials: dehydrated alcohol. Insoluble in the following materials: chloroform, ether. |
| Partition coefficient: n octanol/water | Not available. |
| Auto-ignition temperature | Not available. |
| Decomposition temperature | Not available. |
| Viscosity | : Not available. |

## Section 10. Stability and reactivity

## Reactivity

Chemical stability

Possibility of hazardous reactions

Incompatible materials : Alkalis; Oxidizers

Hazardous decomposition products
: No specific test data related to reactivity available for this product or its ingredients.
: The product is stable.
: Under normal conditions of storage and use, hazardous reactions will not occur.
: Avoid exposure to heat and light.
: Under normal conditions of storage and use, hazardous decomposition products should not be produced.

## Section 11. Toxicological information

## Information on toxicological effects

Acute toxicity

| Product/ingredient name | Result | Species | Dose | Exposure |
| :--- | :--- | :--- | :--- | :--- |
| Arbor-OTC | LD50 Dermal | Rat | $>5000 \mathrm{mg} / \mathrm{kg}$ | - |
|  | LD50 Oral | Rat | $>5000 \mathrm{mg} / \mathrm{kg}$ | - |

## Irritation/Corrosion

Not available.

## Sensitization

| Product/ingredient name | Route of <br> exposure | Species | Result |
| :--- | :--- | :--- | :--- |
| Arbor-OTC | skin | Mammal - species unspecified | Not sensitizing |

## Mutagenicity

Oxytetracycline was mutagenic in tests with mouse lymphocytes cells with activation. It showed weakly positive results for inducing sister-chromatid exchange in hamster ovary cells with and without activation, but did not induce chromosomal aberrations.

## Carcinogenicity

Not available.

## Reproductive toxicity

In humans, oxytetracycline has been associated with congenital abnormalities such as neural tube defect, cleft palate, and heart malformation when used during the second and third months of pregnancy. Staining of teeth may occur in offspring of mothers treated with oxytetracycline during the second and third trimester of pregnancy. Studies in dogs and in rabbits given material resulted increased frequencies of skeletal and other malformations in the offspring; however, studies in mice showed no increase in congenital defects.

## Teratogenicity

Not available.

## Specific target organ toxicity (single exposure)

Not available.

## Specific target organ toxicity (repeated exposure)

Not available.
Aspiration hazard
Not available.

Information on the likely : Not available.
routes of exposure

## Potential acute health effects

| Eye contact | $:$ Causes serious eye irritation. |
| :--- | :--- |
| Inhalation | $:$ No known significant effects or critical hazards. |
| Skin contact | $:$ No known significant effects or critical hazards. |
| Ingestion | $:$ No known significant effects or critical hazards. |

Symptoms related to the physical, chemical and toxicological characteristics

## Section 11. Toxicological information

## Potential chronic health effects

Not available.

| General | : No known significant effects or critical hazards. |
| :--- | :--- |
| Carcinogenicity | : No known significant effects or critical hazards. |
| Mutagenicity | : No known significant effects or critical hazards. |
| Teratogenicity | : No known significant effects or critical hazards. |
| Developmental effects | : No known significant effects or critical hazards. |
| Fertility effects | : No known significant effects or critical hazards. |

## Numerical measures of toxicity

## Acute toxicity estimates

Not available.

## Section 12. Ecological information

## Toxicity

| Product/ingredient name | Result | Species | Exposure |

## Section 12. Ecological information

Not available.

## Bioaccumulative potential

Not available.

| Mobility in soil |
| :--- |
| Soil/water partition <br> coefficient (Koc) |$:$ Not available.

Other adverse effects
: No known significant effects or critical hazards.

## Section 13. Disposal considerations

: The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any federal, state and regional/local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

## Section 14. Transport information

| Additional information | Non-bulk packages of this product are not regulated as hazardous materials unless transported by inland waterway. This product is not regulated as a hazardous material when transported in sizes of $\leq 5 \mathrm{~L}$ or $\leq 5 \mathrm{~kg}$, provided the packagings meet the general provisions of §§ 173.24 and 173.24a. | Not determined. | Not determined. | Not determined. | This product is not regulated as a dangerous good when transported in sizes of $\leq 5 \mathrm{~L}$ or $\leq 5 \mathrm{~kg}$, provided the packagings meet the general provisions of 4. 1.1.1, 4.1.1.2 and 4.1.1.4 to 4.1.1.8. | This product is not regulated as a dangerous good when transported in sizes of $\leq 5 \mathrm{~L}$ or $\leq 5 \mathrm{~kg}$, provided the packagings meet the general provisions of 5. 0.2.4.1, 5.0.2.6. 1.1 and 5.0.2.8. |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |

Special precautions for user : Transport within user's premises: always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

Transport in bulk according : Not available.
to Annex II of MARPOL
73/78 and the IBC Code

## Section 15. Regulatory information

U.S. Federal regulations

## : TSCA 8(a) CDR Exempt/Partial exemption: Not determined

 United States inventory (TSCA 8b): Not determined.FIFRA Information: This chemical is a pesticide product registered by the Environmental Protection Agency and is subject to certain labeling requirements under federal pesticide law. These requirements differ from the classification criteria and hazard information required for safety data sheets, and for workplace labels of nonpesticide chemicals. Following is the hazard information as required on the pesticide label:

## WARNING

Causes substantial but temporary eye injury.
Harmful if inhaled.
Avoid breathing dust.
Do not get in eyes or on clothing.
Wear protective eyewear (goggles, facemask or safety glasses).
Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet.
