## 12. ECOLOGICAL INFORMATION

### Ecotoxicity:

**Unknown Aquatic Toxicity:** 60% of the mixture consists of component(s) of unknown hazards to the aquatic environment

**Ecotoxicity effects:** Very toxic to aquatic life with long lasting effects.

**Persistence and degradability:** Inherently biodegradable. Non-persistent.

**Mobility:** Water contaminating.

**Additional ecological information:** THIS PRODUCT IS TOXIC TO FISH. Do not apply directly to water or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwaters. Etridiazole can contaminate surface water through spray drift. Under some conditions, etridiazole may have a high potential for runoff into surface water for several weeks postapplication. These conditions include poorly draining or wet soils with readily visible slopes toward adjacent surface water, frequently flooded areas, areas overlaying extremely shallow ground water, areas with infield canals or ditches that drain to surface water, areas not separated from adjacent waters with vegetated filter strips, and areas overlaying tile drainage systems that drain surface water.

## 13. DISPOSAL CONSIDERATIONS

### Waste Treatment Methods:

**Disposal of Wastes:** Pesticide wastes are toxic. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal Law. If these wastes cannot be used according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

**Contaminated Packaging:** Nonrefillable container. Do not reuse or refill this container. Offer for recycling, if available. Dispose of empty container in a sanitary landfill or by incineration or, if allowed by State and local authorities, by burning. If burned, stay out of smoke.
