HYDROPHOBIC FULVIC ACID MAXIMIZE POTENTIAL!

Ful-Power™ is an essential component for all growing styles and foliar spray applications. Hydrophobic fulvic acid is a missing link in most plant systems.

Why do we brag about the purity from our cold-microbial extraction process? Simple: increased efficacy and ease of use! Ful-Power is compatible with all fertilizers. Because our method does not require any preservatives, micronutrient, or chemical extractants, our application rates can be based on what works! Try a dose and see.

Use in a wide variety of applications including containers, soil, hydroponic, turf, foliar sprays, aquaponic, clones and cuttings, bare-root dips, seed activation programs, and compost teas. Ful-Power is a golden hydrophobic fulvic and does not stain, clump, gum up or drop out.

Ful-Power is fermented by BioAg: Inspired by Nature, Elevated with Science.
