DIRECTIONS FOR USE

IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN ANY MANNER INCONSISTENT WITH ITS LABELING. THIS LABELING MUST BE IN THE POSSESSION OF THE USER AT THE TIME OF APPLICATION. READ THE ENTIRE LABEL AFFIXED TO THE PRODUCT CONTAINER BEFORE APPLYING. FOLLOW ALL APPLICABLE DIRECTIONS, RESTRICTIONS AND PRECAUTIONS.

POST EMERGENT TREATMENTS

Cheetah may be applied post-emergence to crops containing the Glufosinate-resistant gene including Glufosinate-resistant canola, corn, cotton, soybean and sugar beets. Uniform, thorough spray coverage is necessary to achieve consistent weed control.

The basis of selectivity of Cheetah herbicide in glufosinate-resistant crops is the presence of a gene that makes crops not sensitive to glufosinate. Crops not containing the glufosinate-resistant gene will be sensitive to Cheetah and severe crop injury and/or death may occur. DO NOT allow spray to contact foliage or green tissue of desirable vegetation other than crops containing the glufosinate-resistant trait.

Post emergent applications of Cheetah may be applied to crops not containing the glufosinate-resistant gene using a hooded sprayer.

NOTICE

Read the "WARRANTY DISCLAIMER" and "LIMITATION OF LIABILITY" in the label booklet for this product before using this product. Those terms apply to this product bulletin and if those terms are not acceptable, return the product unopened at once.
