

CHLOROTHALONIL GROUP M05 FUNGICIDE

ACIBENZOLAR-S-METHYL GROUP P1 FUNGICIDE

## Flowable Fungicide

For control of turf diseases: sod farms; turf on golf courses, professional and collegiate athletic fields; and lawns around commercial and industrial buildings.

### Active Ingredients:

Chlorothalonil*	53.94%
Acibenzolar-S-methyl:**	0.11%
Other Ingredients:	45.95%
Total:	100.00%

\*CAS No. 1897-45-6

\*\*CAS No. 135158-54-2

Contains: 6.1 pounds chlorothalonil per gallon 0.012 pounds acibenzolar-S-methyl per gallon

**KEEP OUT OF REACH OF CHILDREN.**

## WARNING/AVISO

Si usted no entiende la etiqueta, busque a alguien para que se la explique a usted en detalle. (If you do not understand the label, find someone to explain it to you in detail.)

See additional precautionary statements and directions for use inside booklet.

EPA Reg. No. 100-1364

EPA Est. 86555-MO-001

SCP 1364A-L1A 0722

## 2.5 gallons

Net Contents

FIRST AID	
<b>If inhaled</b>	<ul style="list-style-type: none"><li>• Move person to fresh air.</li><li>• If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth to mouth, if possible.</li><li>• Call a poison control center or doctor for further treatment advice.</li></ul>
<b>If in eyes</b>	<ul style="list-style-type: none"><li>• Hold eye open and rinse slowly and gently with water for 15-20 minutes.</li><li>• Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.</li><li>• Call a poison control center or doctor for treatment advice.</li></ul>
<b>If swallowed</b>	<ul style="list-style-type: none"><li>• Call a poison control center or doctor immediately for treatment advice.</li><li>• Have person sip a glass of water if able to swallow.</li><li>• Do not induce vomiting unless told to do so by a poison control center or doctor.</li><li>• Do not give anything by mouth to an unconscious person.</li></ul>
<b>NOTE TO PHYSICIAN</b> Persons suffering with temporary allergic skin reactions may respond to treatment with oral antihistamines and topical or oral steroids.	
Have the product container or label with you when calling a poison control center or doctor, or going for treatment.	
<b>HOTLINE NUMBER</b> For 24-Hour Medical Emergency Assistance (Human or Animal) or Chemical Emergency Assistance (Spill, Leak, Fire, or Accident), Call <b>1-800-888-8372</b>	

## PRECAUTIONARY STATEMENTS

### Hazards to Humans and Domestic Animals

#### WARNING/AVISO

May be fatal if inhaled. Do not breathe spray mist. Causes substantial but temporary eye injury. Do not get in eyes or on clothing. Wear appropriate protective eyewear (goggles, face shield, or safety glasses), and chemical-resistant gloves. Harmful if swallowed.

Prolonged or frequently repeated skin contact may cause allergic reactions in some individuals. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Remove and wash contaminated clothing before reuse.

### Personal Protective Equipment (PPE)

**Mixers, Loaders, and all other Handlers (except Applicators) must wear:**

- Long-sleeved shirt and long pants
- Chemical-resistant gloves made of any waterproof material
- Shoes plus socks
- Respirator with an organic-vapor removing cartridge with a prefilter approved for pesticides (MSHA/NIOSH approval number prefix TC-23C), or a canister approved for pesticides (MSHA/NIOSH approval number TC-14G), or a NIOSH approved respirator with an organic vapor (OV) cartridge or a canister with any N, R, P or HE prefilter.
- Protective eyewear (goggles, face shield, or safety glasses)

**Applicators must wear:**

- Long-sleeved shirt and long pants
- Chemical-resistant gloves made of any waterproof material
- Shoes plus socks
- Protective eyewear (goggles, face shield, or safety glasses)

### User Safety Requirements

Discard clothing and other absorbent materials that have been drenched or heavily contaminated with this product's concentrate. Do not reuse them. Follow the manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry.

### Engineering Control Statements

When handlers use closed systems, enclosed cabs, or aircraft in a manner that meets the requirements listed in the Worker Protection Standard (WPS) for agricultural pesticides (40 CFR 170.240(d)(4-6)), the handler PPE requirements may be reduced or modified as specified in the WPS.

## PRECAUTIONARY STATEMENTS (continued)

### User Safety Recommendations:

#### Users should:

- Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet.
- Remove clothing/PPE immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.
- Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

### Environmental Hazards

This product is toxic to aquatic invertebrates, fish and wildlife. DO NOT apply directly to water, to areas where surface water is present or to intertidal areas below the mean high water mark. Drift and runoff may be hazardous to aquatic organisms in neighboring areas. DO NOT contaminate water when disposing of equipment washwater or rinsate.

Chlorothalonil, one of the active ingredients in Daconil Action, is known to leach through soil into groundwater under certain conditions as a result of label use. Use of this product in areas where soils are permeable, particularly where the water table is shallow, may result in groundwater contamination.

Daconil Action can contaminate surface water through spray drift. Under some conditions, it may have a high potential for runoff into surface water for several days to weeks after application. These include poorly draining or wet soils with readily visible slopes toward adjacent surface waters, frequently flooded areas, areas over-laying extremely shallow ground water, areas with infield canals or ditches that drain to surface water, areas not separated from adjacent surface waters with vegetated filter strips, and areas over-laying tile drainage systems that drain to surface water.

### Physical or Chemical Hazards

Do not use, pour, spill, or store near heat or open flame.

## CONDITIONS OF SALE AND LIMITATION OF WARRANTY AND LIABILITY

**NOTICE:** Read the entire Directions for Use and Conditions of Sale and Limitation of Warranty and Liability before buying or using this product. If the terms are not acceptable, return the product at once, unopened, and the purchase price will be refunded.

The Directions for Use of this product must be followed carefully. It is impossible to eliminate all risks inherently associated with the use of this product. Crop injury, ineffectiveness or other unintended consequences may result because of such factors as manner of use or application, weather or crop conditions, presence of other materials or other influencing factors in the use of the product, which are beyond the control of SYNGENTA CROP PROTECTION, LLC or Seller. To the extent permitted by applicable law, Buyer and User agree to hold SYNGENTA and Seller harmless for any claims relating to such factors.

SYNGENTA warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes stated in the Directions for Use, subject to the inherent risks referred to above, when used in accordance with directions under normal use conditions. To the extent permitted by applicable law: (1) this warranty does not extend to the use of the product contrary to label instructions or under conditions not reasonably foreseeable to or beyond the control of Seller or SYNGENTA, and, (2) Buyer and User assume the risk of any such use. TO THE EXTENT PERMITTED BY APPLICABLE LAW, SYNGENTA MAKES NO WARRANTIES OF MERCHANTABILITY OR OF FITNESS FOR A PARTICULAR PURPOSE NOR ANY OTHER EXPRESS OR IMPLIED WARRANTY EXCEPT AS WARRANTED BY THIS LABEL.

To the extent permitted by applicable law, in no event shall SYNGENTA be liable for any incidental, consequential or special damages resulting from the use or handling of this product. TO THE EXTENT PERMITTED BY APPLICABLE LAW, THE EXCLUSIVE REMEDY OF THE USER OR BUYER, AND THE EXCLUSIVE LIABILITY OF SYNGENTA AND SELLER FOR ANY AND ALL CLAIMS, LOSSES, INJURIES OR DAMAGES (INCLUDING CLAIMS BASED ON BREACH OF WARRANTY, CONTRACT, NEGLIGENCE, TORT, STRICT LIABILITY OR OTHERWISE) RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT, SHALL BE THE RETURN OF THE PURCHASE PRICE OF THE PRODUCT OR, AT THE ELECTION OF SYNGENTA OR SELLER, THE REPLACEMENT OF THE PRODUCT.

SYNGENTA and Seller offer this product, and Buyer and User accept it, subject to the foregoing Conditions of Sale and Limitation of Warranty and Liability, which may not be modified except by written agreement signed by a duly authorized representative of SYNGENTA.

Read entire label carefully and use only as directed.

## DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

Daconil Action must be used only in accordance with recommendations on this label or in separately published SYNGENTA supplemental labeling recommendations for this product.

DO NOT apply this product in a way that will contact workers or other persons, or pets either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

### AGRICULTURAL USE REQUIREMENTS

Use this product only in accordance with its labeling and with the Worker Protection Standard (WPS), 40 CFR Part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE) and restricted-entry interval (REI). The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

DO NOT enter or allow workers to enter treated areas during the restricted entry interval of 12 hours.

PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water, is: long-sleeved shirt and long pants, chemical resistant gloves made of any waterproof material, shoes plus socks, protective eyewear (goggles, face shield, or safety glasses).

**Special Eye Irritation Provisions:** This product is a severe eye irritant. Although the restricted entry interval expires after 12 hours, for the next 6.5 days entry is permitted only when the following safety measures are provided:

- (1) At least one container designed specifically for flushing eyes must be available in operating condition at the WPS required decontamination site intended for workers entering the treated area.
- (2) Workers must be informed, in a manner they can understand:
  - that residues in the treated area may be highly irritating to their eyes
  - that they should take precautions, such as refraining from rubbing their eyes, to keep the residues out of their eyes
  - that if they do get residues in their eyes, they should immediately flush their eyes using the eyeflush container that is located at the decontamination site or using other readily available clean water, and
  - how to operate the eyeflush container

### NON-AGRICULTURAL USE REQUIREMENTS

The requirements in this box apply to uses of this product that are NOT within the scope of the Worker Protection Standard for agricultural pesticides (40 CFR Part 170). The WPS applies when this product is used to produce agricultural plants on farms, forests, nurseries, or greenhouses.

DO NOT enter or allow others to enter area until sprays have dried.

## USE INFORMATION

**ONLY FOR USE ON:** sod farms; turf on golf courses, professional and collegiate athletic fields; and lawns around commercial and industrial buildings.

**DO NOT** use on home lawns and turf sites associated with apartment buildings, daycare centers, playgrounds, playfields, recreational park athletic fields, athletic fields located on or next to schools (e.g., elementary, middle and high schools), campgrounds, churches, and theme parks.

Daconil Action is an excellent disease control agent when used according to label directions for control of a broad spectrum of turf diseases. Daconil Action couples a multiple-site contact fungicide with a systemic compound used for control and suppression of disease through induction of host plant resistance.

Daconil Action exhibits an additional unique mode of action, beyond chlorothalonil alone, which mimics the natural systemic activated resistance (SAR) response found in most plant species. This SAR response does not involve direct activity against the target pathogens.

### Integrated Pest (Disease) Management

Daconil Action is recommended for use in programs that are compatible with the principles of Integrated Pest Management (IPM), which include the use of disease resistant turf varieties, cultural practices, pest scouting and disease forecasting systems, which reduce unnecessary applications of pesticides.

Daconil Action is effective for strategic use in programs that attempt to minimize disease resistance to fungicides. Some other fungicides that are at risk from disease resistance exhibit a single-site mode of fungicidal action. Daconil Action, with a multi-site mode of action, may be used to delay or prevent the development of resistance to single-site fungicides. Consult your Federal or State Cooperative Extension Service representatives for guidance on the proper use of Daconil Action in programs which seek to minimize the occurrence of disease resistance to other fungicides.

For best performance, always follow these directions:

- Daconil Action should be applied to turf foliage early, before disease symptoms become severe, and ideally prior to disease development
- Daconil Action, in addition to be a contact fungicide, moves systemically within the plant, however uniform spray coverage is essential for best performance. Apply Daconil Action by ground application in sufficient water to ensure uniform coverage. See instructions for specific recommendations.
- Daconil Action mimics the SAR response in plants. Maximum disease control is normally obtained 4 days after a Daconil Action application.

Daconil Action provides added protection against certain diseases in turf. Daconil Action provides added protection to reduce disease levels in curative applications.

### Resistance Management

CHLOROTHALONIL	GROUP	M05	FUNGICIDE
ACIBENZOLAR-S-METHYL	GROUP	P1	FUNGICIDE

For resistance management, please note that Daconil Action contains both a Group M05/[chlorothalonil] and Group P1/[acibenzolar-s-methyl] fungicide. Any fungal population may contain individuals naturally resistant to Daconil Action and other Group M05 or Group P1 fungicides. A gradual or total loss of pest control may occur over time if these fungicides are used repeatedly in the same fields. Appropriate resistance-management strategies should be followed.

To delay fungicide resistance, take one or more of the following steps:

- Rotate the use of Daconil Action or other Group M05 or Group P1 fungicides within a growing season sequence with different groups that control the same pathogens.
- Use tank mixtures with fungicides from a different group that are equally effective on the target pest when such use is permitted. Use at least the minimum application rate as labeled by the manufacturer.
- Adopt an integrated disease management program for fungicide use that includes scouting, uses historical information related to pesticide use, and which considers host plant resistance, impact of environmental conditions on disease development, disease thresholds, as well as cultural, biological and other chemical control practices.
- Where possible, make use of predictive disease models to effectively time fungicide applications. Note that using predictive models alone is not sufficient to manage resistance.
- Monitor treated fungal populations for resistance development.
- Contact your local Syngenta representative, retailer, or extension specialist for any additional pesticide resistance-management and/or IPM recommendations for specific plants and pathogens.
- For further information or to report suspected resistance contact Syngenta at 1-866-Syngent(a) (866-796-4368). You can also contact your pesticide distributor or university extension specialist to report resistance.

### USE PRECAUTIONS AND RESTRICTIONS

**ONLY FOR USE ON:** sod farms; turf on golf courses, professional and collegiate athletic fields; and lawns around commercial and industrial buildings.

**Do not use on home lawns and turf sites associated with apartment buildings, daycare centers, playgrounds, playfields, recreational park athletic fields, athletic fields located on or next to schools (e.g., elementary, middle and high schools), campgrounds, churches, and theme parks.**

DO NOT apply by air.

DO NOT apply through any type of irrigation system.

### SPRAY DRIFT MANAGEMENT

#### SPRAY DRIFT ADVISORIES

THE APPLICATOR IS RESPONSIBLE FOR AVOIDING OFF-SITE SPRAY DRIFT. BE AWARE OF NEARBY NON-TARGET SITES AND ENVIRONMENTAL CONDITIONS. The interaction of many equipment and weather related factors determine the potential for spray drift. The applicator and the grower are responsible for considering all these factors when making decisions.

### IMPORTANCE OF DROPLET SIZE

The most effective way to reduce spray drift is to apply large droplets. Use the largest droplets that provide target pest control. While applying larger droplets will reduce spray drift, the potential for drift will be greater if applications are made improperly or under unfavorable environmental conditions.

#### Controlling Droplet Size – Ground Boom

- Volume – Increasing the spray volume so that larger droplets are produced will reduce spray drift. Use the highest practical spray volume for the application. If a greater spray volume is needed, consider using a nozzle with a higher flow rate.
- Pressure - Use the lowest spray pressure recommended for the nozzle to produce the target spray volume and droplet size.
- Spray Nozzle - Use a spray nozzle that is designed for the intended application. Consider using nozzles designed to reduce drift.

#### BOOM HEIGHT – Ground Boom

For ground equipment, the boom should remain level with the crop and have minimal bounce.

#### SHIELDED SPRAYERS

Shielding the boom or individual nozzles can reduce spray drift. Consider using shielded sprayers. Verify that the shields are not interfering with the uniform deposition of the spray on the target area.

#### TEMPERATURE AND HUMIDITY

When making applications in hot and dry conditions, use larger droplets to reduce effects of evaporation.

#### TEMPERATURE INVERSIONS

Drift potential is high during a temperature inversion. Temperature inversions are characterized by increasing temperature with altitude and are common on nights with limited cloud cover and light to no wind. The presence of an inversion can be indicated by ground fog or by the movement of smoke from a ground source or an aircraft smoke generator. Smoke that layers and moves laterally in a concentrated cloud (under low wind conditions) indicates an inversion, while smoke that moves upward and rapidly dissipates indicates good vertical air mixing. Avoid applications during temperature inversions.

#### WIND

Drift potential generally increases with wind speed. **AVOID APPLICATIONS DURING GUSTY WIND CONDITIONS.**

Applicators need to be familiar with local wind patterns and terrain that could affect spray drift.

#### BOOM-LESS GROUND APPLICATIONS

Setting nozzles at the lowest effective height will help to reduce the potential for spray drift.

#### HANDHELD TECHNOLOGY APPLICATIONS

Take precautions to minimize spray drift.

**Agricultural Use Sites Only (sod farms):** This product must not be applied within 25 feet for ground applications of marine/estuarine water bodies unless there is an untreated buffer area of that width between the area to be treated and the water body.

**DO NOT** spray when conditions favor drift beyond the area intended for application. Conditions which may contribute to drift include thermal inversion, wind speed and direction, sprayer nozzle/pressure combinations, spray droplet size etc. Contact your State extension agent for spray drift prevention guidelines in your area.

### MIXING INSTRUCTIONS

Prepare no more spray solution than is needed for the immediate spray operation. Thoroughly clean spray equipment before using this product to prevent possible crop injury or nozzle clogging problems from spray tank contamination. Vigorous agitation is necessary for proper dispersal of the product. Maintain maximum agitation throughout the spraying operation. Do not let the spray solution stand overnight in the spray tank. Flush the spray equipment thoroughly following each use and apply the rinsate to a previously treated area.

**DO NOT** combine Daconil Action in the spray tank with pesticides, surfactants or fertilizers, unless your prior use has shown the combination physically compatible, effective and noninjurious under your conditions of use. **DO NOT** combine Daconil Action with Dipe®, Latron B-1956® or Latron AG-98®, horticultural oil, and products containing xylene as phytotoxicity may result from the combination when applied to some species on this label. A tank mix of Daconil Action with Chipco® Signature® can result in physical antagonism if not mixed properly.

Always fill the spray tank with water to near capacity first. Then, with the agitator running, slowly add the desired amount of Chipco Signature and/or other tankmix partners.

## **APPLICATION EQUIPMENT**

DO NOT apply by air or through any type of irrigation system.

Daconil Action may be applied with most types of spray equipment commonly used for making ground applications.

For more information on spray equipment and calibration, consult sprayer equipment manufacturers and state recommendations. For specific local directions and spray schedules, consult the current state agricultural extension service recommendations.

## **DIRECTIONS FOR APPLICATION - TURF**

**ONLY FOR USE ON:** sod farms; turf on golf courses, professional and collegiate athletic fields; and lawns around commercial and industrial buildings.

**Do not use on home lawns and turf sites associated with apartment buildings, daycare centers, playgrounds, playfields, recreational park athletic fields, athletic fields located on or next to schools (e.g., elementary, middle and high schools), campgrounds, churches, and theme parks.**

**FAILURE TO FOLLOW DIRECTIONS AND PRECAUTIONS ON THIS LABEL MAY RESULT IN TURF INJURY AND/OR POOR DISEASE CONTROL.**

### **Ground Application**

Thorough coverage is necessary to provide maximum disease control.

Apply Daconil Action in an adequate amount of water to provide complete coverage. This amount may vary from 45 to 120 gallons per acre. See table below for suggested rates and timing. Under severe disease conditions use the highest rate and shortest interval corresponding with the application schedule selected from the table below.

DO NOT mow or water after treatment until spray deposited on turfgrass is thoroughly dry; Daconil Action should always be used in conjunction with good turf management practices.

In addition to nozzle selection for drift minimization and maximization of coverage, use a pump with capacity to (1) maintain adequate psi at nozzles, and (2) provide sufficient agitation in the tank to keep mixture in uniform suspension - this requires recirculation of 10% of tank volume per minute. Use a jet agitator liquid sparge tube for agitation. Do not air sparge.

Use screens to protect the pump and to prevent nozzles from clogging. Screens placed on suction side of pump should be **16-mesh or coarser**. Do not place a screen in the recirculation line. Use 50-mesh or coarser screens between the pump and boom, and where required, at the nozzles. Check nozzle manufacturer's recommendations.

### **SOD FARMS:**

Apply Daconil Action in 45 to 120 gallons of water per acre. Begin applications when conditions favor disease development and repeat applications as long as these conditions persist. Under severe disease conditions use the highest rate and shortest interval corresponding with the application schedule selected from the table below.

DO NOT mow or water after treatment until spray deposited on turfgrass is thoroughly dry; Daconil Action should always be used in conjunction with good turf management practices.

### **Restrictions:**

Sod farm turf treated with chlorothalonil prior to harvest must be mechanically cut, rolled and harvested.

Do not apply more than 17.0 pints/acre (6.25 fl oz/1000 sq ft) of Daconil Action per growing season (13 lb chlorothalonil per acre per growing season).

The minimum re-treatment interval for single application rates **up to 9.6 pints/acre** (3.5 fl oz/1000 sq ft) of Daconil Action (7.3 lb chlorothalonil/acre) is 7 days.

Do not apply more than one application of a rate greater than 9.6 pints/acre (3.5 fl oz/1000 sq ft) of Daconil Action (7.3 lb chlorothalonil/acre) per growing season.

The maximum single application rate is 14.8 pints/acre (5.4 fl oz/1000 sq ft) of Daconil Action (11.3 lb chlorothalonil/acre).

## **GROUP A TURF:**

**Golf Course Fairways and Roughs, professional and collegiate athletic fields; and lawns around commercial and industrial buildings.**

Apply Daconil Action in 45 to 120 gallons of water per acre. Begin applications when conditions favor disease development and repeat applications as long as these conditions persist. Under severe disease conditions use the highest rate and shortest interval corresponding with the application schedule selected from the table below.

DO NOT mow or water after treatment until spray deposited on turfgrass is thoroughly dry; Daconil Action should always be used in conjunction with good turf management practices.

### **Restrictions:**

Do not apply more than 34.1 pints/acre (12.5 fl oz/1000 sq ft) of Daconil Action per growing season (26 lb chlorothalonil/acre/growing season).

The minimum re-treatment interval for single application rates **up to 9.6 pints/acre** (3.5 fl oz/1000 sq ft) of Daconil Action (7.3 lb chlorothalonil/acre) is 7 days.

Do not apply more than one application of a rate greater than 9.6 pints/acre (3.5 fl oz/1000 sq ft) of Daconil Action (7.3 lb chlorothalonil/acre) per growing season.

The maximum single application rate is 14.8 pints/acre (5.4 fl oz/1000 sq ft) of Daconil Action (11.3 lb chlorothalonil/acre).

## **GROUP B TURF:**

### **Golf Course Tees and Greens**

Apply Daconil Action in 45 to 120 gallons of water per acre. Begin applications when conditions favor disease development and repeat applications as long as these conditions persist. Under severe disease conditions use the highest rate and shortest interval corresponding with the application schedule selected from the table below.

DO NOT mow or water after treatment until spray deposited on turfgrass is thoroughly dry; Daconil Action should always be used in conjunction with good turf management practices.

### **Restrictions:**

#### **Golf Course Tees:**

Do not apply more than 68.2 pints/acre (25 fl oz/1000 sq ft) of Daconil Action (52 lb chlorothalonil/acre) per growing season.

The minimum re-treatment interval for single application rates **up to 9.6 pints/acre** (3.5 fl oz/1000 sq ft) of Daconil Action (7.3 lb chlorothalonil/acre) is 7 days.

The minimum re-treatment interval after an application of a rate **greater than 9.6 pints/acre** (3.5 fl oz/1000 sq ft) of Daconil Action (7.3 lb chlorothalonil/acre) is 14 days.

Do not apply more than two applications of a rate greater than 9.6 pints/acre (3.5 fl oz/1000 sq ft) of Daconil Action (7.3 lb chlorothalonil/acre) per growing season.

The maximum single application rate is 14.8 pints/acre (5.4 fl oz/1000 sq ft) of Daconil Action (11.3 lb chlorothalonil/acre).

#### **Golf Course Greens:**

Do not apply more than 95.7 pints/acre (35.1 fl oz/1000 sq ft) of Daconil Action (73 lb chlorothalonil/acre) per growing season.

The minimum re-treatment interval for single application rates **up to 9.6 pints/acre** (3.5 fl oz/1000 sq ft) of Daconil Action (7.3 lb chlorothalonil/acre) is 7 days.

The minimum re-treatment interval after an application of a rate **greater than 9.6 pints/acre** (3.5 fl oz/1000 sq ft) of Daconil Action (7.3 lb ai/acre) is 14 days.

Do not apply more than two applications of a rate greater than 9.6 pints/acre (3.5 fl oz/1000 sq ft) of Daconil Action (7.3 lb chlorothalonil/acre) per growing season.

The maximum single application rate is 14.8 pints/acre (5.4 fl oz/1000 sq ft) of Daconil Action (11.3 lb chlorothalonil/acre).

## Disease Table

Diseases Controlled*	Application Interval (Days)	Pre-Disease Rates <sup>a</sup>			Post-Disease Rates <sup>a</sup>		
		fl oz product/ 1000 sq ft	pints product/ acre	chlorothalonil lb/acre	fl oz product/ 1000 sq ft	pints product/ acre	chlorothalonil lb/acre

Dichondra Leaf Spot (CA only)	14	4.0 to 5.4	10.8 to 14.8	8.25 to 11.3	5.4	14.8	11.3
Gray Snow Mold <sup>c</sup>	30	5.4	14.8	11.3	-	-	-
Fusarium Patch <sup>c</sup>	21 to 28	5.4	14.8	11.3	-	-	-
Algae <sup>c</sup>	7 to 14 14	2.0 to 3.5 -	5.4 to 9.6 -	4.1 to 7.3 -	2.0 to 3.6 4.0 to 5.4	5.4 to 9.6 10.8 to 14.8	4.1 to 7.3 8.25 to 11.3

<sup>a</sup>**Group A Turf:** Limit of one application per season at rates greater than 7.3 lb chlorothalonil/acre (9.6 pints/acre or 3.5 fl oz/1000 sq ft of Daconil Action).

**Group B Turf:** Limit of two applications per season at rates greater than 7.3 lb chlorothalonil/acre (9.6 pints/acre or 3.5 oz/1000 sq ft of Daconil Action).

<sup>b</sup>Low rate is not effective on intensively mowed turfgrasses such as golf course tees and greens.

<sup>c</sup>See specific use directions below.

\*Diseases listed are caused by fungi, some of which are named as follows:

- Dollar Spot: *Sclerotinia homeocarpa*; *Lanzia* or *Moellerodiscus* spp.
- Leaf Spots, Melting-Out, Brown Blight: *Drechslera* spp. (including *D. poae*, *D. siccans*), *Bipolaris sorokiniana*, *Curvularia* spp.
- Brown Patch: *Rhizoctonia solani*, *R. zeae*, *R. cerealis*
- Gray Leaf Spot: *Pyricularia grisea*, *P. oryzae*
- Red Thread: *Laetisaria fuciformis*
- Anthracnose: *Colletotrichum graminicola*
- Bermudagrass, decline and take-all root rot: *Gaeumannomyces graminis* var. *graminis*
- Copper Spot: *Gloeocercospora sorghi*
- Stem Rust: *Puccinia graminis*
- Dichondra Leaf Spot: *Alternaria* spp.
- Gray Snow Mold: *Typhula* spp.
- Fusarium Patch
- Algae

### Gray Snow Mold caused by *Typhula* spp. - Group A and B - Turf:

Apply in sufficient water to obtain adequate coverage (2 to 10 gallons per 1,000 sq ft).

Apply one application 14.8 pints/acre (5.4 fl oz/1000 sq ft) of Daconil Action (11.3 lb chlorothalonil/acre). Application must be made before snow cover in autumn.

Group B Turf: If snow cover is intermittent or lacking during the winter, a second application of Daconil Action at 14.8 pints/acre (5.4 fl oz/1000 sq ft) may be applied one month after the first application.

### Fusarium Patch: Group A and B Turf:

In areas where pink snow mold (Fusarium patch) is likely to occur, apply Daconil Action at 14.8 pints/acre (5.4 fl oz/1000 sq ft) (11.3 lb chlorothalonil/acre) in combination with products containing iprodione at 88 oz ai/acre (2 oz ai/1000 sq ft) of turf area. Read and observe all label directions for products containing these active ingredients.

For control of Fusarium patch only in areas where snow cover is intermittent or lacking during the winter, apply 14.8 pints/acre (5.4 fl oz/1000 sq ft) of Daconil Action (11.3 lb chlorothalonil/acre). Make application in late autumn.

Group B Turf: Apply a second application of 14.8 pints/acre (5.4 fl oz/1000 sq ft) of Daconil Action 21 to 28 days after the first application unless conditions favorable for Fusarium patch no longer prevail.

### Algae: Group A and B Turf:

For prevention of algae on turfgrasses, apply Daconil Action at the rate of 5.4 to 9.6 pints/acre (2.0 to 3.5 fl oz/1000 sq ft) (4.1 to 7.3 lb chlorothalonil/acre) on a 7 to 14-day schedule. Under severe algae conditions use the 9.6 pints/acre (3.5 fl oz/1000 sq ft) rate and apply on a 7-day schedule.

When algae is well established, every attempt should be made to dry out the afflicted area. Once dry, spiking or verticutting should be done to enhance turfgrass recovery in conjunction with a Daconil Action application at the rate of 11 to 14.8 pints/acre (4.0 to 5.4 fl oz/1000 sq ft).

Group B Turf: A second application of Daconil Action at the 14.8 pints/acre (5.4 fl oz/1000 sq ft) rate may be made 14 days after the first application.

Group A and B Turf: Following application of the 14.8 pints/acre (5.4 fl oz/1000 sq ft) rate, several applications of Daconil Action at a rate of 5.4 to 9.6 pints/acre (2.0 to 3.5 fl oz/1000 sq ft) (4.1 to 7.3 lb chlorothalonil/acre) on a 7 to 14-day interval may be necessary for turfgrass recovery. Only a preventive spray program with Daconil Action will prevent a recurrence of the algae when environmental conditions are favorable.

### Suppression Bacterial Wilt and Symptoms Associated with Mad Tiller Disease Group A and B Turf

For optimum suppression bacterial wilt and control of symptoms associated with mad tiller disease Daconil Action should be applied prior to the appearance of disease.

Diseases Suppressed*	Application Interval (Days)	Pre-Disease Rates <sup>a</sup>		
		fl oz product/ 1000 sq ft	pints product/ acre	lb ai/acre
Bacterial Wilt	7 to 10	2.0 <sup>b</sup>	5.0 <sup>b</sup>	4.1 <sup>b</sup>
	7 to 14	2.0 to 3.6	5.5 to 9.75	4.1 to 7.3
Symptoms associated with mad tiller	7 to 10	2.0 <sup>b</sup>	5.0 <sup>b</sup>	4.1 <sup>b</sup>
	7 to 14	2.0 to 3.6	5.5 to 9.75	4.1 to 7.3

<sup>a</sup>**Group A Turf:** Limit of one application per season at rates greater than 7.3 lb ai/acre (9.75 pints/acre or 3.6 fl oz/1000 sq ft of Daconil Action).

**Group B Turf:** Limit of two applications per season at rates greater than 7.3 lb ai/acre (9.75 pints/acre or 3.6 oz/1000 sq ft of Daconil Action).

<sup>b</sup>Low rate is not effective on intensively mowed turfgrasses such as golf course tees and greens.

### Suppression of Pythium blight Group A and B Turf

For optimum suppression of Pythium blight Daconil Action should be applied prior to the appearance of disease.

Diseases Suppressed*	Application Interval (Days)	Pre-Disease Rates <sup>a</sup>		
		fl oz product/ 1000 sq ft	pints product/ acre	lb ai/acre
Pythium Blight	7 to 10	2.0 <sup>b</sup>	5.0 <sup>b</sup>	4.1 <sup>b</sup>
	7 to 14	2.0 to 3.6	5.5 to 9.75	4.1 to 7.3

<sup>a</sup>**Group A Turf:** Limit of one application per season at rates greater than 7.3 lb ai/acre (9.75 pints/acre or 3.6 fl oz/1000 sq ft of Daconil Action).

**Group B Turf:** Limit of two applications per season at rates greater than 7.3 lb ai/acre (9.75 pints/acre or 3.6 oz/1000 sq ft of Daconil Action).

<sup>b</sup>Low rate is not effective on intensively mowed turfgrasses such as golf course tees and greens.

## STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

### Pesticide Storage

Store in a cool, dry place.

### Pesticide Disposal

Pesticide wastes are toxic. Improper disposal of unused pesticide, spray mixture, or rinse water is a violation of Federal law. If these wastes cannot be used according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance in proper disposal methods.

### Container Handling (less than or equal to 5 gallons)

Non-refillable container. Do not reuse or refill this container. Triple rinse container (or equivalent) promptly after emptying. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container  $\frac{1}{4}$  full with water and recap. Shake for 10 seconds. Pour rinsate into application equipment or a mix tank or store rinsate for later use and disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times. Then offer for recycling if available or puncture and dispose of in a sanitary landfill, or by incineration, or by other procedures approved by state and local authorities.

### Container Handling (greater than 5 gallons)

Non-refillable container. Do not reuse or refill this container. Triple rinse container (or equivalent) promptly after emptying. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank. Fill the container  $\frac{1}{4}$  full with water. Replace and tighten closures. Tip container on its side and roll it back and forth, ensuring at least one complete revolution, for 30 seconds. Stand the container on its end and tip it back and forth several times. Turn the container over onto its other end and tip it back and forth several times. Empty the rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Repeat this procedure two more times. Then offer for recycling if available or puncture and dispose of in a sanitary landfill, or by incineration, or by other procedures approved by state and local authorities.

**Refillable container.** Refill this container with pesticide only. Do not reuse this container for any other purpose. Cleaning the container before final disposal is the responsibility of the person disposing of the container. Cleaning before refilling is the responsibility of the person refilling. To clean container before final disposal, empty the remaining contents from this container into application equipment or mix tank. Fill the container about 10 percent full with water. Agitate vigorously or recirculate water with the pump for 2 minutes. Pour or pump rinsate into application equipment or rinsate collection system. Repeat this rinsing procedure two more times. Then offer for recycling if available or puncture and dispose of in a sanitary landfill, or by incineration, or by other procedures approved by state and local authorities.

For minor spills, leaks, etc., follow all precautions indicated on this label and clean up immediately. Take special care to avoid contamination of equipment and facilities during cleanup procedures and disposal of wastes. In the event of a major spill, fire, or other emergency, call 1-800-888-8372, day or night.

## Fungicide

Broad spectrum and systemic disease control for turf and ornamentals

*Active Ingredient:*

Propiconazole\* . . . . . 14.3%

*Other Ingredients:* . . . . . 85.7%

*Total:* . . . . . 100.0%

\*CAS No. 60207-90-1

Banner MAXX® II is an emulsifiable concentrate that contains a nominal 1.3 pounds of active ingredient per gallon.

**KEEP OUT OF REACH OF CHILDREN.**

### CAUTION

See additional precautionary statements and directions for use inside booklet.

## PRECAUTIONARY STATEMENTS

### Hazards to Humans and Domestic Animals

#### CAUTION

Harmful if swallowed. Causes moderate eye irritation. Avoid contact with eyes or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet.

#### **Personal Protective Equipment (PPE)**

Some materials that are chemical-resistant to this product are barrier laminate, butyl rubber, nitrile rubber, neoprene rubber, polyvinyl chloride (PVC), or Viton®. For more options, follow the instructions for Category C on the chemical-resistance category selection chart.

*continued...*

## **PRECAUTIONARY STATEMENTS (continued)**

### **Applicators and other handlers must wear:**

- Long-sleeved shirt and long pants,
- Shoes and socks,
- Chemical-resistant gloves, and

In addition, all handlers (mixers, loaders, and applicators, or individuals performing one or more of these tasks), who are applying this pesticide using hand-held equipment must wear:

- Long-sleeved shirt and long pants,
- Shoes and socks, and
- Chemical-resistant gloves

### **Engineering Controls**

Pilots must use an enclosed cockpit that meets the requirements listed in the Worker Protection Standard (WPS) for agricultural pesticides [40 CFR 170.240(d)(6)].

When handlers use closed systems or enclosed cabs in a manner that meets the requirements listed in the Worker Protection Standard (WPS) for agricultural pesticides [40 CFR 170.240(d)(4-6)], the handler PPE requirements may be reduced or modified as specified in the WPS.

### **User Safety Requirements**

Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry.

### **User Safety Recommendations**

#### **Users should:**

- Wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet.
- Remove clothing/PPE immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.
- Users should remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

**Environmental Hazards**

This product is toxic to fish and shrimp. Do not apply directly to water, or to areas where surface water is present, or to intertidal areas below the mean high water mark. Do not contaminate water when cleaning equipment or disposing of equipment washwater or rinsate.

**Physical and Chemical Hazards**

Do not use or store near heat or open flame.

**CONDITIONS OF SALE AND LIMITATION OF WARRANTY AND LIABILITY**

**NOTICE:** Read the entire Directions for Use and Conditions of Sale and Limitation of Warranty and Liability before buying or using this product. If the terms are not acceptable, return the product at once, unopened, and the purchase price will be refunded.

The Directions for Use of this product must be followed carefully. It is impossible to eliminate all risks inherently associated with the use of this product. Crop injury, ineffectiveness or other unintended consequences may result because of such factors as manner of use or application, weather or crop conditions, presence of other materials or other influencing factors in the use of the product, which are beyond the control of SYNGENTA CROP PROTECTION, LLC or Seller. To the extent consistent with applicable law, Buyer and User agree to hold SYNGENTA and Seller harmless for any claims relating to such factors.

SYNGENTA warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes stated in the Directions for Use, subject to the inherent risks referred to above, when used in accordance with directions under normal use conditions. To the extent consistent with applicable law: (1) this warranty does not extend to the use of the product contrary to label instructions or under conditions not reasonably foreseeable to or beyond the control of Seller or SYNGENTA, and (2) Buyer and User assume the risk of any such use. TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, SYNGENTA MAKES NO WARRANTIES OF MERCHANTABILITY OR OF FITNESS FOR A PARTICULAR PURPOSE NOR ANY OTHER EXPRESS OR IMPLIED WARRANTY EXCEPT AS WARRANTED BY THIS LABEL.

To the extent consistent with applicable law, in no event shall SYNGENTA be liable for any incidental, consequential or special damages resulting from the use or handling of this product. **TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, THE EXCLUSIVE REMEDY OF THE USER OR BUYER, AND THE EXCLUSIVE LIABILITY OF SYNGENTA AND SELLER FOR ANY AND ALL CLAIMS, LOSSES, INJURIES OR DAMAGES (INCLUDING CLAIMS BASED ON BREACH OF WARRANTY, CONTRACT, NEGLIGENCE, TORT, STRICT LIABILITY OR OTHERWISE) RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT, SHALL BE THE RETURN OF THE PURCHASE PRICE OF THE PRODUCT OR, AT THE ELECTION OF SYNGENTA OR SELLER, THE REPLACEMENT OF THE PRODUCT.**

SYNGENTA and Seller offer this product, and Buyer and User accept it, subject to the foregoing Conditions of Sale and Limitation of Warranty and Liability, which may not be modified except by written agreement signed by a duly authorized representative of SYNGENTA.

## **DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

### **AGRICULTURAL USE REQUIREMENTS**

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE) and restricted-entry interval. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

**Do not enter or allow worker entry into treated areas during the restricted entry interval (REI) of 12 hours.**

PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water is:

- Coveralls
- Shoes and socks, and
- Chemical-resistant gloves made of any waterproof material

### **NON-AGRICULTURAL USE REQUIREMENTS**

The requirements in this box apply to uses of this product that are NOT within the scope of the Worker Protection Standard for agricultural pesticides (40 CFR Part 170). The WPS applies when this product is used to produce agricultural plants on farms, forests, nurseries, or greenhouses.

**Do not enter treated areas without protective clothing until sprays have dried.**

**FAILURE TO FOLLOW THE DIRECTIONS FOR USE AND PRECAUTIONS ON THIS LABEL MAY RESULT IN PLANT INJURY OR POOR DISEASE CONTROL.**

## PRODUCT INFORMATION

Banner MAXX II is a systemic fungicide for use on turfgrasses for the control of listed diseases, including dollar spot, brown patch, and rust. Refer to the appropriate section for specified diseases.

Banner MAXX II also controls numerous diseases on ornamentals and other landscape and nursery plantings. It controls powdery mildews, rusts, leaf spots, scabs, and blights. Refer to the appropriate section for specified diseases and plants.

Do not apply more than 5.4 gallons of Banner MAXX II/acre/calendar year.

Do not apply this product through any type of irrigation system.

Do not use Banner MAXX II as a tree injection.

Do not use Banner MAXX II in greenhouses.

### SPRAY DRIFT MANAGEMENT

A variety of factors including weather conditions (e.g., wind direction, wind speed, temperature, relative humidity) and method of application can influence pesticide drift. The applicator must evaluate all factors and make appropriate adjustments when applying this product.

#### Wind Speed

Do not apply at wind speeds greater than 15 mph.

#### Droplet Size

Apply as a medium or coarser spray (ASAE Standard 572).

#### Temperature Inversions

Do not make applications into areas of temperature inversions or stable atmospheric conditions.

### **Other State and Local Requirements**

Applicators must follow all state and local pesticide drift requirements regarding application of propiconazole. Where states have more stringent regulations, they must be observed.

### **Equipment**

All application equipment must be properly maintained and calibrated using appropriate carriers or surrogates.

*Additional requirements for aerial applications:*

1. The boom length must not exceed 75% of the wingspan or 90% of the rotor blade diameter.
2. Release spray at the lowest height consistent with efficacy and flight safety. Do not release spray at a height greater than 10 feet above the crop canopy unless a greater height is required for aircraft safety.
3. When applications are made with a crosswind, the swath must be displaced downwind. The applicator must compensate for this displacement at the up and downwind edge of the application area by adjusting the path of the aircraft upwind.

*Additional requirement for groundboom application:*

1. Do not apply with a nozzle height greater than 4 feet above the crop canopy.

### **RESISTANCE MANAGEMENT**

Banner MAXX II is in the Group 3 class fungicides. The mode of action of Banner MAXX II is as a demethylation inhibitor of sterol biosynthesis (DMI) which disrupts membrane synthesis by blocking demethylation. Fungal pathogens can develop resistance to products with the same mode of action when used repeatedly. Because resistance development cannot be predicted, use of this product should conform to resistance management strategies established for the crop and use area. Consult your local or State agricultural authorities for resistance management strategies that are complementary to those in this label. Resistance management strategies may include rotating and/or tank-mixing with products having different modes of action or limiting the total number of applications per season. Syngenta Crop Protection encourages responsible resistance management to ensure effective long-term control of the fungal diseases on this label. Banner MAXX II should not be alternated or tank-mixed with any fungicide to which resistance has already developed.

## MIXING INSTRUCTIONS

Fill the spray tank  $\frac{1}{2}$  -  $\frac{3}{4}$  full with water. Add the proper amount of Banner MAXX II and then add the rest of the water. Provide sufficient agitation during mixing and application to maintain a uniform emulsion.

If Banner MAXX II is tank-mixed with other products, use the following sequence:

1. Always check the compatibility of the tank mix using a jar test with proportionate amounts of Banner MAXX II, other chemicals to be used, and the water, before mixing in the spray tank.
2. Provide sufficient jet or mechanical agitation during filling and application to keep the tank mix uniformly suspended.
3. Fill tank at least  $\frac{1}{2}$  full of clean water.
4. Add wettable powders to the tank first, allowing them to completely suspend in the tank before proceeding. This process can be hastened by premixing the product in water before adding to the tank.
5. Add flowables or suspensions next.
6. Add Banner MAXX II next.
7. Add emulsifiable concentrates last.
8. Do not leave tank-mix combinations in the spray tank for prolonged periods without agitation. Mix and apply them the same day.

### Tank Mixes

For broader spectrum control, Banner MAXX II can be tank-mixed with other fungicides. For example, Subdue MAXX® may be tank-mixed with Banner MAXX II or used alone when conditions are favorable for Pythium blight. Banner MAXX II is also compatible with numerous herbicides and insecticides. Check compatibility before tank mixing. Add Unite® (3 pt/100 gallons) to tank mixes which are incompatible. Follow the directions under **Mixing Instructions** for tank mixes. Observe all directions, precautions, and limitations on labeling of all products used in tank mixes. Tank mixtures or other applications of products referenced on this label are permitted only in those states in which the referenced products are registered.

## TURFGRASS AND DICHONDRA DISEASE CONTROL

USE BANNER MAXX II IN A PREVENTATIVE DISEASE CONTROL PROGRAM. Before use of any fungicide, proper diagnosis of the organism causing the disease is important. Use of diagnostic kits or other means of identification of the disease organism is essential to determine the best control measures.

- Apply in sufficient water to ensure thorough coverage.
- Apply after mowing **OR** allow sprayed area to completely dry before mowing.
- For control of foliar diseases, allow sprayed area to completely dry before irrigation.
- For control of soil-borne diseases, Banner MAXX II can be watered in after application.
- Under conditions optimum for high disease pressure, use the higher rate and the shorter interval.
- For optimum turf quality and disease control, use Banner MAXX II in conjunction with turf management practices that promote good plant health and optimum disease control.
- Evaluate spray additives prior to use. Label directions are based on data obtained with no additives.

**DO NOT** apply more than 16 fl oz per 1,000 sq ft per calendar year.

**NOTE:** Do not graze animals on treated areas. Do not feed clippings from treated areas to livestock or poultry.

**IMPORTANT:** Bermudagrass can be sensitive to Banner MAXX II. Do not exceed 4 fl oz per 1,000 sq ft every 30 days on any variety of bermudagrass. In FL, do not apply Banner MAXX II to bermudagrass golf course greens when temperatures exceed 90°F.

### Turfgrass – Specific Diseases, Rates, and Application Timing

Disease	Fl oz/ 1,000 sq ft	Fl oz/ acre	Application Interval/ Timing	Instructions
<b>Anthracnose</b> ( <i>Colletotrichum graminicola</i> )	1–2	44–88	14–28 days	Apply when conditions are favorable for disease development. When disease pressure is high, use higher rates of Banner MAXX II and shorter intervals. For broad-spectrum control, tank-mix with a registered contact fungicide at the label rate.  If disease is present, mix 2 fl oz of Banner MAXX II per 1,000 sq ft with the label rate of the above-mentioned contact fungicides.
<b>Brown Patch</b> ( <i>Rhizoctonia solani</i> )	1-2	44-88	14-21 days	Begin applications in May or June before disease is present. Tank-mix with a registered contact fungicide labeled for brown patch control at the label rate.  Under conditions of high temperatures and high humidity, use the higher rates of Banner MAXX II and shorter intervals.
<b>Dollar Spot</b> ( <i>Sclerotinia homoeocarpa</i> )	0.5	22	14 days	Apply when conditions are favorable for disease development.
	0.5	22	14 days	Tank-mix with low label rate of one of the following fungicides: Daconil Weather Stik® Daconil Ultrex®

Disease	Fl oz/ 1,000 sq ft	Fl oz/ per acre	Application Interval/ Timing	Instructions
<b>Dollar Spot</b> ( <i>Sclerotinia homoeocarpa</i> ) (continued)	1	44	21-28 days	Tank-mix with low label rate of one of the following fungicides: Daconil Weather Stik Daconil Ultrex Chipco® 26019
	1-2	44-88	14-28 days	If using the 1-2 fl oz/1,000 sq ft rate without tank-mixing, make no more than 3 consecutive applications for dollar spot control before rotating to an alternate EPA-registered fungicide having a different mode of action.
<b>Fusarium Patch</b> ( <i>Fusarium nivale</i> )	2-4	88-176	Fall-Early Spring	Apply when conditions are favorable for disease development.
<b>Gray Leaf Spot</b> ( <i>Pyricularia grisea</i> )	1-2	44-88	14 days	Apply when conditions are favorable for disease development. If using the 1 fl oz/1,000 sq ft rate, tank-mix with a registered contact fungicide at the label rate.
<b>Melting Out Leaf Spot</b> ( <i>Bipolaris</i> spp.) ( <i>Drechslera</i> spp.)	1-2	44-176	14 days	Under light to moderate pressure, apply Banner MAXX II to reduce the severity of leaf spot and melting out. For broad-spectrum disease control, tank-mix the 1 fl oz Banner MAXX II with a registered contact fungicide at the label rate.  Tank-mix the 1-2 fl oz/1,000 sq ft Banner MAXX II rate with a registered contact fungicide at the label rates.

continued...

**Turfgrass – Specific Diseases, Rates, and Application Timing (*continued*)**

Disease	Fl oz/ 1,000 sq ft	Fl oz/ acre	Application Interval/ Timing	Instructions
<b>Necrotic Ring Spot</b> ( <i>Leptosphaeria korrae</i> )	4	176	Fall or Spring	Apply in the fall and/or the early spring depending on local recommendations.
<b>Powdery Mildew</b> ( <i>Erysiphe graminis</i> ) <b>Rust</b> ( <i>Puccinia graminis</i> )	1-2	44-88	14-28 days	Apply when conditions are favorable for disease development. If disease is present, use 2 fl oz of Banner MAXX II per 1,000 sq ft.
<b>Red Thread</b> ( <i>Laetisaria fuciformis</i> ) <b>Pink Patch</b> ( <i>Limonomyces roseipellis</i> )	2	88	14-21 days	Apply when conditions are favorable for disease development.
<b>Snowmold</b> <b>Gray</b> ( <i>Typhula</i> spp.) <b>Pink</b> ( <i>Microdochium nivale</i> )	2-4	88-176	Late Fall	Apply one application in the late fall before snow cover. Do not apply on top of snow. For optimum disease control, the 2 and 3 fl oz Banner MAXX II rates should be tank-mixed with either PCNB or chlorothalonil at label rates.
<b>Spring Dead Spot</b> ( <i>Leptosphaeria korrae</i> , <i>L. narmari</i> , <i>Ophiosphaerella herpotricha</i> , <i>Gaeumannomyces graminis</i> )	4	176	30 days	Make 1-3 applications. For one application, apply in September or October. For multiple applications, begin sprays in August.

Disease	Fl oz/ 1,000 sq ft	Fl oz/ acre	Application Interval/ Timing	Instructions
<b>Stripe Smut</b> ( <i>Ustilago striiformis</i> , <i>Urocystis agropyri</i> )	1-2	44-88	Fall or Spring	Apply once in the fall after grass becomes dormant or in the early spring before grass starts to grow.
<b>Summer Patch</b>	2	88	14 days	Apply Banner MAXX II beginning in April. Use the 4 fl oz/1,000 sq ft rate on a 28-day schedule and the 2 fl oz/1,000 sq ft rate on a 14-day schedule.
<b>Poa Patch</b> ( <i>Magnaporthe poae</i> )	4	176	28 days	
<b>Take-All Patch</b> ( <i>Gaeumannomyces graminis</i> )	2-4	88- 176	Spring and Fall	Apply Banner MAXX II to reduce the severity of take-all patch. Make 1-2 fall applications in September and October or when night temperatures drop to 55° F, and 1-2 spring applications in April and May, depending on local recommendations.
<b>Yellow Patch</b> ( <i>Rhizoctonia cerealis</i> )	3-4	130- 176	Late Fall	Make one application in the late fall before snow cover. Do not apply on top of snow. If using a 3 fl oz/1,000 sq ft rate, tank-mix with a registered contact fungicide at the label rate.
<b>Zoysia Patch,</b> large patch of zoysia ( <i>Rhizoctonia solani</i> )	3-4	130- 176	Early Fall	Make one application in the early fall (mid-September to mid-October) prior to development of disease symptoms. Consult local turfgrass extension experts to determine the optimum application timing for your area.

### Dichondra – Specific Disease, Rate, and Application Timing

Disease	Fl oz per 1,000 sq ft	Fl oz per acre	Application Interval/ Timing	Instructions
Dichondra Rust ( <i>Puccinia dichondrae</i> )	2	88	14-21 days	Apply when conditions are favorable for disease development.

#### Establishment of Cool-Season Turfgrass

Banner MAXX II provides control of many diseases of turf, and its primary use is as a fungicide for use against the diseases listed on this label. As an additional benefit, Banner MAXX II will improve the rate of establishment when it is applied to cool season grass seedlings or sod.

**New Seedlings:** Apply 1 fl oz per 1,000 sq ft at the 2- to 3-leaf stage of growth for faster root development and top growth.

**Sod:** Apply 1 fl oz per 1,000 sq ft 2-6 weeks before cutting for increased sod knitting and faster establishment after laying.

### DISEASE CONTROL OF FIELD- AND CONTAINER-GROWN ORNAMENTAL PLANTS IN NURSERIES, LATH HOUSES, SHADE HOUSES, AND LANDSCAPE PLANTINGS

USE BANNER MAXX II IN A PREVENTATIVE DISEASE CONTROL PROGRAM. Optimum benefit of Banner MAXX II is obtained when used in conjunction with sound disease management practices. To determine the use directions for controlling a disease on an ornamental plant species, select the plant species in Table 1. The number in parentheses following the plant species refers you to the disease(s) controlled in Table 2. Find the disease in Table 2. The letter in brackets following the disease refers you to the application regime in Table 3.

Allow spray to dry before overhead irrigation is applied.

**Use Directions**

Banner MAXX II may be used at rates of 2-24 fl oz per 100 gallons of water for control of diseases of ornamental plant species (see Tables 1, 2, and 3).

**NOTE:** For outdoor uses, you may apply up to 5.4 gallons of Banner MAXX II per acre per crop per calendar year.

For general disease control in landscapes, apply 6-8 fl oz/100 gallons of water every 21 days. For best control, begin Banner MAXX II applications before disease development.

**Note:** Plant tolerances to Banner MAXX II have been found acceptable for the specific genera and species of plants listed in Table 1. Other plant species may be sensitive to Banner MAXX II, and diseases other than those listed may not be controlled. Before using Banner MAXX II on plants or for diseases that are not listed in Table 1, test Banner MAXX II on a small scale basis first. Do not apply Banner MAXX II to African violets, begonias, Boston fern, or geraniums. Apply the recommended rates for a particular type of disease, i.e., rust, powdery mildew, etc., and evaluate for phytotoxicity and disease control prior to widespread use.

**Table 1. Ornamentals – Plant Species**

Numbers in parentheses refer to diseases controlled. See Table 2.

Herbaceous Ornamental	Woody Ornamental	Non-bearing Fruits and Nuts (Nurseries and Landscape Plantings)
Calendula (4a) Carnation (5f) Chrysanthemum (2a) Delphinium (4a) English Ivy (3e) Gomphrena (3a) Impatiens (3a, 3b, 4a) Iris (5d) Marigold (3a) Monarda (4c) Phlox (4c) Snapdragon (5d) Sweet William (3k) ( <i>Dianthus barbatus</i> ) Zinnia (4c)	Amelanchier (4d) Ash (4c) Azalea (2c, 4b) Bayberry (3n) Camellia (3e) Cotoneaster (3i) Crabapple (3c, 3q, 4c, 5a) Cape Myrtle (4a) Dogwood (3h,4c) Douglas Fir (5b) Elm (4c) Euonymus (3e, 4c) Hawthorn (5a) Holly (3r) Juniper (1a) Lilac (4c) Linden (3e, 3b, 4b) Magnolia (3e, 4b) Maple (3e, 4f) Oaks (3p) Pines (1b,1c) Poplars (5b) Pyracantha (3o) Red Tip Photinia (3i) Rhamphiolepis (3e, 3i) Rhododendron (2c, 3n) Roses (3g,4e,5c) (Outdoor Use Only) Shasta Fir (5e) Sweetgum (3b, 3c, 3n) Sycamore (3e) Tulip Tree (3e, 4a) Wax Myrtle (3n)	Apple (3q, 4d, 5a) Bartlett Pear (3q, 4c, 5a) Cherry (2b, 3d) Citrus (3m) Nectarine (2b) Peach (2b) Pecan (3b, 3c, 3f, 3l, 3n, 4e) Plum (2b) Walnut (3j)

## Table 2. Diseases

Letters in brackets refer to application regimes. See Table 3.

---

1. Conifer Blights
  - a. *Phomopsis juniperovora* (Phomopsis Blight) [B]
  - b. *Sirococcus strobolinus* (Tip Blight) [D]
  - c. *Sphaeropsis sapinea* (Diplodia Tip Blight) [B]
2. Flower Blight
  - a. *Ascochyta chrysanthemi* (Ray Blight) [C]
  - b. *Monilinia* spp. [A]
  - c. *Ovulinia* spp. [B]
3. Leaf Blights/Spots
  - a. *Alternaria* spp. [B]
  - b. *Cercospora* spp. (Brown Leaf Spot) [C]
  - c. *Cladosporium* spp. (Scab) [C]
  - d. *Coccomyces hiemalis* [A]
  - e. *Collectrichum* spp. [B]
  - f. *Cristulariella* spp. (Zonate Leaf Spot) [C]
  - g. *Diplocarpon rosae* (Blackspot) [B]
  - h. *Discula* spp. (Anthracnose) [A]
  - i. *Fabraea maculata* (syn. *Entomosporium maculata*) [B]
  - j. *Gnomonia leptostyla* (Anthracnose) [C]
  - k. *Heterosporium echinulatum* [B]
  - l. *Mycosphaerella caryigena* (Downy Spot) [C]
  - m. *Mycosphaerella fructicola* (Greasy Spot) [E]
  - n. *Septoria* spp. (Leaf Scorch) [C]
  - o. *Spilocaea pyracanthae* [B]
  - p. *Tubakia dryina* [D]
  - q. *Venturia inaequalis* (Scab) [A]
  - r. *Rhizoctonia* Web Blight [B]

4. Powdery Mildew
  - a. *Erysiphe* spp. [B]
  - b. *Microsphaera* spp. [C]
  - c. *Oidium* spp. [B]
  - d. *Podosphaera* spp. [B]
  - e. *Sphaerotheca pannosa* [B]
  - f. *Phyllactinia* spp. [B]
5. Rust
  - a. *Gymnosporangium juniperi-virginianae* [A]
  - b. *Melampsora occidentalis* [D]
  - c. *Phragmidium* spp. [B]
  - d. *Puccinia* spp. [B]
  - e. *Pucciniastrum goeppertianum* [D]
  - f. *Uromyces dianthi* [B]

**Table 3. Application Regimes**

- [A] Mix 2-4 fl oz of Banner MAXX II in 100 gallons of water and apply as a full coverage spray to the point of drip. Apply every 14-21 days during the period of primary infection. If disease is present, tank-mix with an EPA-registered contact fungicide. For flower blight, apply Banner MAXX II when there is 5-10% bloom and again at 70-100% bloom. For dogwoods, apply the 2-4 fl oz rate every 14 days, or apply 8 fl oz of Banner MAXX II every 28 days.
- [B] Mix 5-8 fl oz of Banner MAXX II in 100 gallons of water and apply as a full coverage spray to the point of drip. Apply as needed, beginning when conditions are favorable for disease development. For blackspot, apply with a registered contact fungicide labeled for blackspot. For Calendula, apply every 30 days. For diplodia tip blight, make 3 applications every 14 days prior to major period of infection. For juniper phomopsis blight, make first application as soon as junipers start to grow, and repeat the applications every 14-21 days during periods of active growth.

- [C] Mix 8-12 fl oz of Banner MAXX II in 100 gallons of water and apply as a full coverage spray to the point of drip. Apply every 30 days, beginning when conditions are favorable for disease development. For pecans, apply the 12 fl oz rate beginning at bud break. Apply 3 times on 14-day intervals. For walnuts, apply 8.5 fl oz at 14-21 day intervals. For ray blight, apply 12 fl oz at 7-day intervals or 20 fl oz at 14-day intervals. For impatiens, bayberry, linden, magnolia, sweetgum and wax myrtle, the maximum use rate is 8 fl oz.
- [D] Mix 16 fl oz of Banner MAXX II in 100 gallons of water and apply as a full coverage spray to the point of drip. Apply every 14-28 days, beginning when conditions are favorable for disease development. For Douglas fir needle rust, apply once in May. For tip blight, initial application is in mid-late winter; apply 3 times at 2-month intervals.
- [E] Mix 20-24 fl oz of Banner MAXX II in 100 gallons of water and apply as a full coverage spray to the point of drip. Apply during June to August time period.

---

**Note:** To avoid possible illegal residues, do not apply to apple, Bartlett pear, cherry, citrus, nectarine, peach, pecan, plum, or walnut trees that will bear harvestable fruit within 12 months.

## **STORAGE AND DISPOSAL**

Do not contaminate water, food, or feed by storage or disposal.

### **Pesticide Storage**

Store in a cool, dry place.

### **Pesticide Disposal**

Pesticide wastes are toxic. Improper disposal of unused pesticide, spray mixture, or rinse water is a violation of Federal law. If these wastes cannot be used according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance in proper disposal methods.

For minor spills, leaks, etc., follow all precautions indicated on this label and clean up immediately. Take special care to avoid contamination of equipment and facilities during cleanup procedures and disposal of wastes. In the event of a major spill, fire, or other emergency, call 1-800-888-8372, day or night.

*continued...*

## **STORAGE AND DISPOSAL (continued)**

### **Container Handling [less than or equal to 5 gallons]**

Non-refillable container. Do not reuse or refill this container. Triple rinse container (or equivalent) promptly after emptying. Triple rinse as follows: empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container  $\frac{1}{4}$  full with water and recap. Shake for 10 seconds. Pour rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times. Then offer for recycling if available or puncture and dispose of in a sanitary landfill, or by incineration, or by other procedures approved by state and local authorities.

### **Container Handling [greater than 5 gallons – mini-bulk]**

Non-refillable container. Do not reuse or refill this container. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank. Fill the container  $\frac{1}{4}$  full with water. Replace and tighten closures. Tip container on its side and roll it back and forth, ensuring at least one complete revolution, for 30 seconds. Stand the container on its end and tip it back and forth several times. Empty the rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Repeat this procedure two more times. Then offer for recycling if available or puncture and dispose of in a sanitary landfill, or by incineration, or by other procedures approved by state and local authorities.

### **Container Handling [greater than 5 gallons – bulk]**

Refillable container. Refill this container with pesticide only. Do not reuse this container for any other purpose. Cleaning the container before final disposal is the responsibility of the person disposing of the container. Cleaning before refilling is the responsibility of the person refilling. To clean container before final disposal, empty the remaining contents from this container into application equipment or mix tank. Fill the container about 10 percent full with water. Agitate vigorously or recirculate water with the pump for 2 minutes. Pour or pump rinsate into application equipment or rinsate collection system. Repeat this rinsing procedure two more times. Then offer for recycling if available or puncture and dispose of in a sanitary landfill, or by incineration, or by other procedures approved by state and local authorities.

GROUP 3 FUNGICIDE

## Fungicide

Broad spectrum and systemic disease control for turf and ornamentals

Active Ingredient:	
Propiconazole* . . . . .	14.3%
Other Ingredients:	85.7%
Total:	100.0%

\*CAS No. 60207-90-1

Banner MAXX® II is an emulsifiable concentrate that contains a nominal 1.3 pounds of active ingredient per gallon.

See additional precautionary statements and directions for use inside booklet.

### AGRICULTURAL USE REQUIREMENTS

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR part 170. Refer to supplemental labeling under "Agricultural Use Requirements" in the Directions for Use section for information about this standard.

EPA Reg. No. 100-1326  
EPA Est. 39578-TX-1

# 1 gallon

Net Contents

### FIRST AID

**If swallowed:** Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.

**If in eyes:** Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

**HOT LINE NUMBER:** For 24-Hour Medical Emergency Assistance (Human or Animal) or Chemical Emergency Assistance (Spill, Leak, Fire, or Accident), Call **1-800-888-8372**.

## KEEP OUT OF REACH OF CHILDREN.

# CAUTION

### Precautionary Statements

Hazards to Humans and Domestic Animals

#### CAUTION

Harmful if swallowed. Causes moderate eye irritation. Avoid contact with eyes or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet.

**Environmental Hazards:** This product is toxic to fish and shrimp. Do not apply directly to water, or to areas where surface water is present, or to intertidal areas below the mean high water mark. Do not contaminate water when cleaning equipment or disposing of equipment washwater or rinsate.

**Physical and Chemical Hazards:** Do not use or store near heat or open flame.

## STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

**Pesticide Storage:** Store in a cool, dry place.

**Pesticide Disposal:** Pesticide wastes are toxic. Improper disposal of unused pesticide, spray mixture, or rinse water is a violation of Federal law. If these wastes cannot be used according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance in proper disposal methods.

**Container Handling:** Non-refillable container. Do not reuse or refill this container. Triple rinse container (or equivalent) promptly after emptying. Triple rinse as follows: empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container 1/4 full with water and recap. Shake for 10 seconds. Pour rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times. Then offer for recycling if available or puncture and dispose of in a sanitary landfill, or by incineration, or by other procedures approved by state and local authorities.
