OTHER

| | |
|--------------------------|---------------|
| Peanut Hulls, Sea Salt | 90.954% |
| TOTAL INGREDIENTS | 100.0% |

DIRECTIONS FOR USE: For Landscaped Areas: Using the scoop provided, spread Iguana Scram™ Professional by hand inside the landscaped areas so it is visibly heavy enough to see. One scoop should cover 10 square feet. Also apply as a 18-inch barrier around the outside of the landscaped area. For Trees and Shrubs: Sprinkle around shrub bases to keep iguana's from climbing to get to vegetation. Apply a 24-inch barrier around trees or shrubs starting at the drip line. This will keep them away from the leaves. For Excessive iguana problems in areas: Apply a second band 15 inches out from the first strip around the bed & sprinkle Iguana Scram Pro lightly throughout the inside of the bed. This will stop the problem & only a single band nearest the bed will be needed for maintenance.

Net Wt. **8 lbs.** (3.63kg)

CAUTION: KEEP OUT OF REACH OF CHILDREN
