ALL-WEATHER BLOX™

FASTRAC® ALL-WEATHER BLOX™

**Not for rats, Proof of rats and house mice usually consume a lethal dose in a single night’s feeding, but may take two or more days from the time of bait consumption for these rodents to die.

This Product May Only be Used Inside and Within 100 Feet of Man-made Structures

KILLS RATS, MICE, AND MEADOW VOLES
Mold Resistant • Moisture Resistant

KEEP OUT OF REACH OF CHILDREN

CAUTION
See back panels for First Aid and additional precautionary statements.

ACTIVE INGREDIENT:
Bromophosh (CAS #63239-36-7) ................................................... 0.01%

OTHER INGREDIENTS*: .................................................. 99.99%

*Contains Derrironum Benenate TOTAL: 100.00%

*Not permitted for use against the following species in California: Cotton rat, Eastern harvest mouse, Golden mouse, Mexican rat, Meadow vole, White-throated woodrat, Southern plains woodrat, and Mexican woodrat

NET WT:
4 lbs (1.8 kg)

Product Code: X6004
FIRST AID

HAVE LABEL WITH YOU WHEN OBTAINING TREATMENT ADVICE

IF SWALLOWED:
• Call a poison control center, doctor, or 1-877-563-4488 immediately for treatment advice.
• Have person sip a glass of water if able.
• Do not induce vomiting unless told to do so by the poison control center or doctor.
• Do not give anything by mouth to an unconscious person.

TREATMENT FOR PET POISONING
If an animal eats this bait, call veterinarian at once.

NOTE TO PHYSICIAN OR VETERINARIAN
Contains the same poison (anticoagulant) type rodenticides. For humans or animals ingesting bait and/or showing poisoning signs (such as muscle tremors, loss of head use, or occurs to animals), fatal blood absorption by either entrance or gastric bypass. Subclinical symptoms (e.g., weakness) would be the result of internal bleeding and should be treated accordingly. Administration of an antidote is unconfirmed.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

READ THE LABEL: Please read and follow all instructions and use precautions. Use only for the listed pest, and application methods described on this label.

IMPORTANT: Do not expose children, pets, or non-target animals to rodenticides. To help prevent exposure:

1. Store unused product out of reach of children and pets.
2. Apply bait in locations out of reach of children, pets, domestic animals, and non-target wildlife, or in tamper-resistant bait stations. TEST Stations must remain intact to destruction by dogs and by children under six years of age, and must be used in a manner that prevents such children from reaching into the bait compartments and obtaining bait. Bait can be stolen from bait stations when they are not locked. Units must be secured or otherwise immobilized. Stronger bait stations are needed in areas open to hoarding livestock, bears, or other potential non-target animals, or areas prone to vandalism.
3. Dispose of product container and unused, spilled or consumed bait as soon as possible.

Bait stations are mandatory for outdoor, above-ground use. Tamper-resistant bait stations must be used with children, pets, non-target mammals, or birds may have access to the bait placement location.

USE RESTRICTIONS: This product may only be used in the following outdoor foci:

1. Structure: House mice (Mus musculus), Norway rats (Rattus norvegicus), Red or Flat-tailed Field Mouse (Sayornis flaviiventer), Coffee rat (Sipanoa australis), Eastern harvest mouse (Reithrodontomys brevis).
2. Shade: Norway rats, roof rats, house mice, and brown mice.
3. Non-target animals: Domestic animals and non-target wildlife.

Do not place baits near or in the following areas:

1. Do not place baits near or in the following areas:
2. Do not store baits near or in the following areas:
3. Do not handle baits near or in the following areas:
4. Do not use baits near or in the following areas:

CAUTION: Harmful if swallowed. Keep away from children, domestic animals, and pets. To discourage rodent infestation, first sources of rodent food, water, and harborage must be as much as possible. If infestation does occur, repeat treatment. A continuous source of food is present, establishes permanent bait stations and residues them as needed.

PRECAUTIONARY STATEMENTS

Hazards to Humans and Domestic Animals:

CAUTION: Harmful if swallowed. Keep away from children, domestic animals, and pets.

Aflatoxins (including aflatoxin M1) may be found in foods and grains. Any person who handles contents or unused baits should wash hands thoroughly after applying bait and before eating, drinking, chewing gum, or smoking or using tobacco or after handling any rodent droppings. If direct contact with rodent feces is unavoidable, wash hands thoroughly after applying bait and before eating, drinking, chewing gum, or smoking.

ENVIROMENTAL HAZARDS

This product is extremely toxic to mammals and birds. Dogs and other predatory species and scavenging mammals and birds may be poisoned if they feed on baits that have been eaten by the animal. Do not apply directly to water, where surface water is present or to marshy areas below the mean high water mark. Rainfall may be hazardous to aquatic organisms in water-adjacent wetlands areas. Do not contaminate water when disposing of equipment or unused baits.

This material is not for use on lawns or non-target areas where cats or birds would have access to it. Do not contaminate water when disposing of equipment or unused baits.

Manufactured by: Bell Laboratories, Inc., Madison, WI 53704 USA. www.belllabs.com

NET WEIGHT: 4 lbs (1.8 kg)

EPA REG. NO. 12055-95
EPA EST. NO. 12055-W93, 12055-W97

Superscript is first letter of the lot number.

DIRECTIONS FOR USE (Continued from other page)

SELECTIVE TREATMENT AREAS: Determine areas where rats, mice or meadow voles will most likely feed and consume the bait. Generally, these areas are along walls, in corners, around branching places, between rocks and walls, or in locations where signs of rodents have been found. Protect bait from the sun. Remove as much alternative food as possible.

APPLICATION DIRECTIONS:

Rate: Place 2 to 12 baits per pole. Place stations usually 3 to 6 feet apart, with additional baits in areas of high rodent activity. Adjust the amount of bait to the size of the bait. Suspend 2 to 3 baits to the climbing ability of the species to be targeted. For birds, use the bottom 15 to 30 baits on a tree. To prevent scaring birds, do not place baits in the lower 15 to 30 baits on a tree. To reduce the size of the baits,

KEEP OUT OF REACH OF CHILDREN

CAUTION: Harmful if swallowed. Keep away from children, domestic animals, and pets.
