KILLS RATS, MICE & MEADOW VOLES*
Kills Warfarin Resistant Norway Rats And House Mice

KEEP OUT OF REACH OF CHILDREN
CAUTION

See back panels for First Aid and additional precautionary statements.

ACTIVE INGREDIENT:
Brodifacoum (CAS #58073-10-0): 0.0025%
OTHER INGREDIENTS†: 99.9975%
†Contains Denatonium Benzoate

TOTAL 100.0000%

*Not permitted for use against the following species in California: Cotton rat, Eastern harvest mouse, Golden mouse, Polynesian rat, Meadow vole, White-throated woodrat, Southern plains woodrat, and Mexican woodrat
KILLS RATS, MICE & MEADOW VOLES*

Norway rats, roof rats, and house mice may consume a lethal dose in one night's feeding with first dead rodents appearing five or six days after feeding begins.

ACTIVE INGREDIENT:
Brodifacoum (CAS #56073-10-0) ............................................................... 0.0025%

OTHER INGREDIENTS*: ................................................................. 99.9975%

*Contains Denatonium Benzoate

KEEP OUT OF REACH OF CHILDREN CAUTION
See side panels for First Aid and additional precautionary statements.

STORAGE AND DISPOSAL
Do not contaminate water, food or feed by storage or disposal.

Pesticide Storage: Store only in original container in a cool, dry place inaccessible to children and pets. Keep containers closed and away from other chemicals.

Pesticide Benzoate: Do not broadcast bait resulting from the use of this product in trash or at an approved waste disposal facility. Container Handling: Non-refillable container. Do not reuse or refill this container. Place, transfer, recondition, or puncture and dispose of in a sanitary facility or by incineration. In most states, burning is not allowed. [Paper] Dispose of empty container by placing in trash, at an approved waste disposal facility or by incineration. In most states, burning is not allowed.

WARRANTY: To the extent consistent with applicable law, seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and handling of this material when such use and handling is contrary to label instructions.

NET WEIGHT: 16 lbs (7.2 kg)

DIRECTIONS FOR USE

This product is extremely toxic to mammals and birds. Dogs, cats and other predatory and scavenging mammals and birds might be poisoned if they feed upon animals that have eaten this bait. This pesticide is toxic to fish. Do not apply directly to water, to or on areas where surface water is present or to intertidal areas below the mean high water mark. Runoff also may be hazardous to aquatic organisms in water adjacent to treated areas. Do not contaminate water when disposing of equipment wash water or rinsate.

*Not permitted for use against the following species in California: Cotton rat, Eastern harvest mouse, Golden mouse, Polynesian rat, Meadow vole, White-throated woodrat, Southern plains woodrat, and Mexican woodrat

ENVIRONMENTAL HAZARDS

Application Directions:

1. Place 6 to 28 sachets at intervals of 15 to 30 feet per placement in infested areas. Maintain an uninterrupted supply of fresh bait for at least 10 days or until signs of activity cease.

2. Apply bait in locations out of reach of children, pets, domestic animals and nontarget wildlife, or areas prone to vandalism.

Applying Bait: Tote stations are mandatory for outdoor, above-ground use. Tamper-resistant bait stations must be used. Wearing gloves, collect and dispose of all dead, exposed animals and leftover bait. To prevent reinfestation, limit sources of rodent food, water, and harborage as much as possible. If infestation does occur, repeat treatment. Where a continuous source of infestation is present, establish permanent bait stations and replenish as needed.

CAUTION: Harmful if swallowed. Keep away from children, domestic animals and pets.

All handlers (including applicators) must wear shoes plus socks, and gloves. Any person who retrieves carcasses or unused bait following application of this product must wear gloves.

User Safety Requirements

Follow manufacturer’s instruction for cleaning/maintaining PPE. If no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry. Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash hands thoroughly after applying bait and before eating, drinking, chewing gum, using tobacco or using the toilet and change into cleaning clothes.

Environmental Hazards

This product is extremely toxic to mammals and birds. Dogs, cats and other predatory and scavenging mammals and birds might be poisoned if they feed upon animals that have eaten this bait. This pesticide is toxic to fish. Do not apply directly to water, to or on areas where surface water is present or to intertidal areas below the mean high water mark. Runoff also may be hazardous to aquatic organisms in water adjacent to treated areas. Do not contaminate water when disposing of equipment wash water or rinsate.

*Not permitted for use against the following species in California: Cotton rat, Eastern harvest mouse, Golden mouse, Polynesian rat, Meadow vole, White-throated woodrat, Southern plains woodrat, and Mexican woodrat

Manufactured by:

MADE IN USA

NOTE TO PHYSICIAN
If swallowed, this material may reduce the clotting ability of the blood and cause bleeding. If ingested, administer Vitamin K$_1$ intramuscularly or orally. Vitamin K$_1$ is antidotal at doses of 10–20 mg (nd mg/kg). Repeat as necessary on monitoring of prothrombin times.

NOTE TO VETERINARIAN
If Swallowed

• Do not induce vomiting unless told to do so by the poison control center or doctor.

• Have a person sip a glass of water if able to swallow.

• Have the person see a doctor immediately or call a Poison Control Center.

• Have the person see a veterinarian immediately.

If Inhaled

• Remove the person to fresh air. If there is breathing difficulty, call emergency services.

If Skin Contact Occurs

• Wash exposed skin with soap and water.

If Eye Contact Occurs

• Hold the eyelids open and flush with clean running water for 15 minutes, keeping the ball of the eye closed. Call a Poison Control Center or doctor if irritation persists.

FOLLOW-UP:

Replace contaminated or spoiled bait immediately.

Caution:

Do not contaminate water, food or feed by storage or disposal.

Do not sell this product in individual containers holding less than 16 pounds of bait.

Baiting with 5mL Soft Bait is prohibited.

Selection of Treatment Areas:

Determine areas where rats, mice, or meadow voles will most likely find and consume the bait. Generally, these areas are along walls, by gnawed openings, in corners and concealed places, between floors and walls, or in locations where rats, mice, or meadow voles in their signs have been seen. Protect bait from rain and snow. Remove as much alternative food as possible.

Application Directions:

Rats: Place 6 to 28 sachets at intervals of 15 to 30 feet per placement in infested areas. Maintain an uninterrupted supply of fresh bait for at least 10 days or until signs of activity cease.

MICE AND MEADOW VOLES*: Place 1 sachet per placement. Space placements at 8 to 12 foot intervals in infested areas. Three sachets may be needed at points of very high activity. Maintain an uninterrupted supply of fresh bait for at least 15 days or until signs of mice or meadow vole* activity cease.

Follow-up:

Replace contaminated or spoiled bait immediately.

Caution:

Wearing gloves, collect and dispose of all dead, exposed animals and leftover bait. To prevent reinfestation, limit sources of rodent food, water, and harborage as much as possible. If infestation does occur, repeat treatment. Where a continuous source of infestation is present, establish permanent bait stations and replenish as needed.

Bait may be removed from sachet and placed in a feeding device that secures the unsnapped bait in a bait station. Discard empty wrapper in the trash.

Precautionary Statements:

Hazards to Humans and Domestic Animals

Caution: Harmful if swallowed. Keep away from children, domestic animals and pets.
