

Flower Saver Plus

Professional Landscaping

Essential for the installation
and maintenance
of ornamental plants

Flower Saver Plus is developed for planting all garden plants, flower beds and perennials. It contains a blend of pure spores of four VA mycorrhiza species, fertilizer ingredients and rhizosphere bacteria. These bacteria have been specially selected for their beneficial activities in the rhizosphere of plants such as nitrogen fixation, the chelation of elements and the breakdown of organic matter.

Mycorrhiza symbiosis is an essential requirement for healthy growth and resilience. The fungal threads of mycorrhizae increase the physical absorption capacity of plants by an average of 700%. And they grow in the finest soil pores to get the sparing nutrients. This means that significantly less water needs to be given and fertilizers are used more efficiently. The application of mycorrhiza is visible in vegetative growth, plant health, and accelerated recovery from stress and damage.

PRODUCT BENEFITS

- Better start of new plantings
- Prolongs the flowering
- More beautiful and longer lasting flowers
- Improves the rhizosphere
- Efficient use of fertilizers
- Increases the abiotic stress tolerance
- Supports healthy and vital plants
- Increases heat and drought tolerance

USE IN COMBINATION WITH OTHER (PHC) PRODUCTS

Flower Saver Plus can be used in combination with all PHC fertilizers and PHC plant enhancers. Application of Fulvic 25 and Yuccah amplifies the effect of Flower Saver Plus.

Packaging, transport & storage

Flower Saver Plus is packed in bags of 2 kg. Product attracts moisture. Store dry, frost-free and out of direct sunlight.

Shelf life: 2 years.

Health and safety information

Not intended for ingestion. Wash hands after use. In case of an accident or if you feel unwell, consult a doctor.
KEEP OUT OF REACH OF CHILDREN.

Product licences

Flower Saver Plus is a biostimulant.

We Grow Soil.

INGREDIENTS

VA Mycorrhiza spores	0.3 %
Rhizobacteria preparation	3 %
Organic fertilizer	49.74 %
Humic acid powder (Leonardite)	18 %
Seaweed meal	16 %
Fulvic powder (Leonardite)	10 %
Maltodextrin	0.15 %
Formononetin	0.01 %
Inert ingredients (Mineral oil)	2.80 %

DOSAGE

Annuals / new plantings	2 kg/10 m2
Perennial plants / shrubs	1.5 kg/10 m2
Leafy plants	2 kg/10 m2
Vegetables	2 kg/10 m2
Ground covers and ornamental grass	1.5 kg/10 m2

GUARANTEED ANALYSIS

Elements	Value
N-total	3 %
P2O5	4 %
K2O	3 %
Bacillus licheniformis	253.000 cfu/gram
Bacillus megaterium	253.000 cfu/gram
Bacillus polymyxa	54.000 cfu/gram
Bacillus pumilus	253.000 cfu/gram
Bacillus subtilis	253.000 cfu/gram
Paenibacillus azotofixans	54.000 cfu/gram
Entrophospora colombiana	1.8 spores/gram
Glomus clarum	1.8 spores/gram
Glomus etunicatum	1.8 spores/gram
Rhizophagus irregularis	1.8 spores/gram

ADDITIONAL INFORMATION

Prior to planting or seeding, spread Flower Saver Plus over the area and rake or rototill it into the toplayer (10 cm). Consult your product representative for tailor made advice. As with all organic materials, the analysis may vary as much as 15%.

WARRANTY

Plant Health Cure sells the product Flower Saver Plus. Follow the instructions on the packaging closely for use. We cannot guarantee suitability of the product outside the originally intended application. Plant Health Cure is only obliged to replace products that do not meet the specifications. Suggestions for use and information about results after use of the product - obtained from the manufacturer - can be considered reliable. As Plant Health Cure cannot exercise any control over the conditions of use, the buyer/user is responsible for all results, including injury or damage resulting from the use of this product alone or in combination with other materials. Keep out of reach of children.
