

- Kills nuisance ants (except Fire, Pharoah, Harvester, and Carpenter ants)
 Kills: Acrobat ants, Allegheny Mound ants, Argentine ants, Bigheaded ants, Black Turf ants, Citronella ants, Cornfield ants, Crazy ants, Field ants, Ghost ants, Honey ants, Lawn ants, Little Black ants, Odorous House ants, Pavement ants, Pyramid ants, Southern ants, Thief ants, White-footed ants, Rover ants, and other nuisance ants
- For use indoors and outdoors.
- Commercial, Industrial & Residential Use Sites
- Dual Action Formula

SPECIMEN LABEL

ACTIVE INGREDIENTS:	
Dinotefuran	0.05%
S-Methoprene	0.10%
OTHER INGREDIENTS	99.85%

TOTAL: 100.00%

S-Methoprene breaks insect life cycle

KEEP OUT OF REACH OF CHILDREN CAUTION

See additional Precautions and complete Directions for Use on side and back panels. Read entire label before use.

PRECAUCION AL USUARIO

Si usted no entiende la etiqueta, busque a alguien para que se la explique a usted en detalle. (If you do not understand the label, find someone to explain it to you in detail.

EPA Reg.No. 89459-135 EPA Est. No. 2724-TX-1

PRECAUTIONARY STATEMENTS ENVIRONMENTAL HAZARDS

This pesticide is toxic to shrimp and aquatic invertebrates. Do not apply directly to water, areas where surface water is present or to intertidal areas below the mean high water mark. Drift or run off from treated areas may be hazardous to aquatic organisms in neighboring areas. Do not contaminate water when disposing of equipment washwaters. This product is highly toxic to bees exposed to direct treatment. Do not apply this product if bees are actively foraging in the treatment areas.

PHYSICAL OR CHEMICAL HAZARDS

Do not use product in or on electrical equipment where a possibility of shock or electrocution hazard exists. Do not use near strong oxidizing agents.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

READ THE ENTIRE LABEL PRIOR TO USE. USE STRICTLY IN ACCORDANCE WITH ALL LABEL PRECAUTIONS AND DIRECTIONS.

USE RESTRICTIONS:

- Keep out of excessive sunlight.
- Do not apply to surfaces which may reach excessive temperatures such as hot water pipes or stoves.
- Do not apply this product in a way that will contact workers or other persons.
- Do not apply this product where it is accessible to children or animals.
- Do not make applications during rain.
- Application in food or feed establishments is limited to crack and crevice, or void treatments.
- Do not apply where bait may contaminate food, feed, or water sources.

PRODUCT INFORMATION

Use Formitrol™ Ant Bait Gel to kill listed nuisance ants indoors and outdoors. Indoor locations would be identified as residential, commercial, industrial, and institutional areas. Indoor locations include but are not limited to; cafeterias, commercial and industrial buildings, commercial kitchens, daycare facilities, food or feed establishments, garages, garbage rooms, government buildings, hospitals, hotels, housing complexes, kitchens, laboratories, lavatories, libraries, locker rooms, motels, nursing and assisted living

facilities, office buildings, pantries, residential buildings, retail establishments, schools, single and multi-family residences, supermarkets, transportation equipment such as aircraft, trains, ships, boats, buses and other similar sites, vestibules, warehouses, wall voids, attics and crawl spaces. Outdoor locations include, but are not limited to; decks, gardens, lawns, patios, landscaped or hardscaped areas, yards, zoos. Inspections around the outside of structures may reveal ant entry points, remove these points when possible.

Formitrol™ Ant Bait Gel is a ready to use bait formulation for the indoor and outdoor control of nuisance ants (excluding fire, carpenter, Pharaoh, and harvester ants). This bait contains a unique combination of dinotefuran and the IGR s-methoprene. When ants eat the bait, they bring it back to the colony and share the active ingredients to other members of the colony.

FormitrolTM Ant Bait Gel has been formulated to be attractive to a wide variety of ant species. Species killed by this bait include: Acrobat ants, Allegheny Mound ants, Argentine ants, Bigheaded ants, Black Turf ants, Citronella ants, Cornfield ants, Crazy ants, Field ants, Ghost ants, Honey ants, Lawn ants, Little Black ants, Odorous House ants, Pavement ants, Pyramid ants, Southern ants, Thief ants, White-footed ants, Rover ants, and other nuisance ants (excluding Fire, Carpenter, Pharaoh, and Harvester ants).

APPLICATION METHOD

To use FormitrolTM Ant Bait Gel, remove one syringe of bait from the container. Remove the cap from the tip of the syringe. Place the applicator plunger into the end of the syringe, push plunger down to dispense desired amount of bait. Applicator plunger can be removed and re-used for each included syringe.

Apply bait in spots or strips of bait near actively foraging ants, mound entrances, or nest sites. Make numerous bait placements near foraging ants. Each spot should be at least 0.0035 oz (0.1 g) (~½ inch spot). Strips should be 1-2 inches long. Bait may be placed into voids, cracks and crevices where ants are observed or suspected. Total bait applied will depend on severity of infestation. Bait can be applied to vertical or horizontal surfaces, in warm weather on vertical surfaces bait may run. Apply bait directly onto surfaces or in a suitable bait station. Product may stain some surfaces, always test on an inconspicuous area before treating wider areas. Re-apply bait as consumed with high ant pressure, with low ant pressures, make fresh applications as needed.

For food or feed areas of food or feed handling and packaging facilities, apply only as a crack and crevice or void treatment. Apply by dispensing bait into cracks and crevices where ants are observed entering facilities. Do not apply in locations where food or feed may be contaminated, and do not apply where normal activities (washing, cleaning, food or feed preparation, etc.) would cause bait to be washed or removed from placements.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

PESTICIDE STORAGE: Store in cool dry area away from children.

PESTICIDE DISPOSAL: Waste resulting from the use of this product must be disposed of on site or at an approved waste disposal facility. Container Handling: Dispose of in trash or offer for recycling if available.
