Glades Formulating Corp.

## Foliar Turf Nutritional

**G.F.C. T&O Max** is a micronutrient spray compound chelated with glucoheptonates to create a liquid foliar formulation for correction and prevention of nutritional deficiencies. The chelation of Iron, Zinc, Manganese and Magnesium creates a very stable formulation which provides vital micronutrients.

### Application Rates & Recommendations

**Warm & Cool Season Turf:** apply 3-6 oz per 1000 sqft for maintenance. Apply 8-12 oz per 1000 sqft for severe deficiency. Apply biweekly or as needed.  
**Ornamentals:** apply 1-2 quarts per 100 gallons of water and spray to runoff as needed  
**Commercial Sod:** apply 1-3 gallons per acre to green up turf as needed or before harvest

Use sufficient water for thorough and uniform coverage of foliage or soil. Always make a bench test to check compatibility of unknown mixes. Avoid tank mixing with heavy-phosphate fertilizers or alkaline products. Apply in early morning or late evening, avoid excessive heat or dry conditions.
