DIRECTIONS FOR USE

SeptiTreat contains premium natural* microbes that digest organic waste, including fats, oils, and grease (FOG), carbohydrates, proteins, cellulose, and urea and reduce odors. Simply pour one 8 oz bottle of SeptiTreat into the toilet and flush. SeptiTreat may also be poured down a drain, followed by about a gallon of water. Results are best if applied at a time of low flow. One treatment is adequate for a typical household on a quarterly basis. For large homes with higher than average throughput, or for use in other types of buildings, two or more 8 oz bottles may be needed per quarter.

COMMON SENSE PRECAUTIONS

While SeptiTreat is all natural* and non-toxic, certain precautions should be observed. If the product gets on skin, wash with soap
