

Quality Pheromones and Trapping Systems

[Insects Limited, Inc.](#) researches, tests, develops, manufactures, and distributes quality pheromones and trapping systems for food infesting insects to a global marketplace with a focus on the statement above. At our core, Insects Limited focuses on bringing **Science, Education, and Innovation to the Stored Product Industry.**

Stored Product Beetle (SPB) Lure (IL-1805)

Product Description

The letters SPB stand for 'Stored Product Beetles'. These lures are comprised of multiple pheromones and a food attractant that are specific for Stored Product Beetles. 10 pheromone SPB Lures for Stored Product Beetles come with each set.

Features and Benefits

The set of pheromone lures (IL-1805) features Insect Limited's signature pheromone lures that use a blend of multiple pheromones mixed into a food attractant, and injected into a circular, synthetic matrix to draw-in Red Flour Beetle, *Tribolium castaneum*, Confused Flour Beetle, *Tribolium confusum*, Cigarette Beetle, *Lasioderma serricorne*, Warehouse Beetle, *Trogoderma variabile*, Khapra Beetle, *Trogoderma granarium*, Rice Weevil, *Sitophilus oryzae*, Saw-toothed Grain Beetles, *Oryzaephilus surinamensis*, and many other species. These beetles are attracted to the lure and are readily stuck in the glue when paired with a suitable trapping system.

How This Product Can Help You

SPB lures pair the science of insect biology to multiple, synthetically designed, and laboratory-produced pheromones to assist you with the task of monitoring for these pests in your environment. In an Integrated Pest Management program, monitoring can ultimately help you reduce pest numbers. When paired with a trapping system, the lures do this by:

1. Telling you if the beetles are present
2. Indicating where they are coming from and
3. Finally telling you whether the control measures (E.g. removal of the infested product, increased sanitation, freezing, etc.) that you have taken are working or not

How to Use This Product

When you open this box, you will find 10 SPB lures in a resealable pouch. The pheromones should be kept in their vapor-barrier pouch, completely sealed, to keep them fresh until you are ready to place them into a trap.

When you are ready to use this product, the lures should be removed from their pouch by opening the zipper-seal opening and shaking out the lure or grabbing it with a tweezers. The lures should then be positioned on their sides into the center of the glue surface of sticky traps that are being used to capture the beetles. (Insects Limited recommends using the IL-2600 All Beetle Trap™ as the preferred trapping system for Stored Product Beetles). Although the pheromone in the lures is non-toxic, avoid direct contact with your skin if possible or simply wash your hands with warm water and soap if contact is made. Pheromone lures are non-pesticidal and only act as an insect attractant.

Shipping Information

Each SPB lure box has dimensions of 8 inches X 6 inches X 4 inches and weighs 1 lb for shipping purposes. Online customers can choose their shipping options at checkout. Orders placed before 3pm EST typically get processed that day. If placed after 3pm EST, your order will be processed the next business day. Orders are shipped Monday-Friday.
