## FC Roach Killer Bait Stations

### PRECAUTIONARY STATEMENTS

#### HAZARDS TO HUMANS AND DOMESTIC ANIMALS

##### CAUTION

Wash thoroughly with soap and water after handling bait stations.

### DIRECTIONS FOR USE

**It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.**

This product is specially designed for control of small cockroaches, such as German and Brown Banded roaches, in any area where they are a problem, such as residential, warehousing and commercial establishments, including food service, food manufacturing and food processing facilities, hospitals, schools, daycare centers, nursing homes, health care facilities, laboratories, computer and electronic equipment facilities, pet shops, zoos, basements, buses, boats, trains, and aircraft.

The transparent red top enables you to monitor bait consumption while providing roaches their preferred environment, darkness, because roaches do not see light in the red spectrum. This product is an odorless bait that roaches eat even in the presence of other foods and is packaged in a child-resistant bait station.

This product may also be used to kill exposed, adult stages of beetles: cadelle, cigarette beetle, confused flour beetle, dermestid, drugstore beetle, flat grain beetle, granary weevil, lesser grain borer, lesser mealworm, mealworm, merchant grain beetle, red flour beetle, rice weevil, rusty grain beetle, saw-toothed grain beetle, spider beetle, or warehouse beetle.

1. Place bait stations in areas where cockroaches have been seen and where they hide. Cockroaches infest dark, warm, damp locations.
2. The bait stations can be stuck to a vertical surface by peeling off the protective strip to expose adhesive.
3. For effective roach control use 4 - 6 bait stations per 100 sq ft of horizontal surface area. Place adjacent to walls and flush in corners. Do not place more than 24 bait stations per residence. For outdoor use, place stations adjacent to structure.
4. Do not spray the bait stations. Avoid placing the bait stations on freshly sprayed surfaces.
5. Roaches will begin eating the bait immediately and you should expect to see fewer roaches within 3 days.
6. Inspect all bait stations and replace as needed for continual control of roaches.

#### For Pantry Pests:

1. Remove and dispose of infested foodstuffs. Clean up spilled foodstuffs from cupboard or food storage area.
2. This product will kill adult stages of beetles remaining in food storage areas. Once feeding on bait begins, most adult beetles will be killed within 7 days.
3. Use 4 - 6 bait stations per 100 sq ft of horizontal surface area. Place adjacent to voids or cracks and crevice, behind and under cupboards, and near locations where infested foodstuffs were discovered.
4. Bait stations can be stuck to a vertical surface by peeling off the protective strip to expose adhesive.
5. Do not place more than 24 bait stations per residence.

### STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

**PESTICIDE STORAGE:** Store in a cool, dry area out of reach of children.

**PESTICIDE DISPOSAL:** Wrap bait stations in several layers of newspaper and discard in trash.

### IMPORTANT: READ BEFORE USE

Read the entire Directions for Use, Conditions, Disclaimer of Warranties and Limitations of Liability before using this product. If terms are not acceptable, return the unopened product container at once.

By using this product, user or buyer accepts the following Conditions, Disclaimer of Warranties and Limitations of Liability.

**CONDITIONS:** The directions for use of this product are believed to be adequate and must be followed carefully. However, it is impossible to eliminate all risks associated with the use of this product.
