**USE DIRECTIONS**

**FOR OUTDOOR USE**

Use this product for the control of cockroaches in areas where they are a problem: schools, daycare centers, nursing homes, health care facilities, laboratories, computer and electronic equipment facilities, pet shops, zoos (indoor and / or crack and crevice treatment only), basements, buses, boats, trains, aircraft and sub-surface utility systems, sewage, drains, sewers, steam / electric / gas / data tunnels, and other outdoor areas.

Examples of locations for bait placement include: between different elements of buildings (adjacent to home or structure), cracks and crevices around pipes, doors or windows, refrigerators, stoves, water heaters, dishwashers, and other equipment; behind or under baseboards, cupboards, food/feed areas of food/feed handling establishments other than as a crack and crevice treatment only. Care should be taken to avoid depositing gel onto exposed surfaces; if gel contacts an exposed surface where food is handled, remove the gel and wash exposed surface followed by a potable water rinse.

Application rates for all cockroaches: Application rate is dependent on level of infestation and species to be controlled. Apply gel as round spots or thin beads into cracks and crevices or as a spot treatment.

- For德国 blood cockroach control, use application rate is up to 0.75 grams of bait per square yard. For light to moderate infestations, use up to 1.0 gram = 6 inch bead per spot diameter and for heavy infestations, use up to 1.5 gram = diameter bead per spot diameter and for light to moderate infestations, use up to 1.0 gram = Dime size spot per square yard.

- For Oriental cockroach control, apply gel as spots or thin beads into cracks and crevices or openings leading into voids, or make spot treatments wherever these insects may enter the building. For light to moderate infestations, use up to 1.0 gram = Dime size spot per square yard. For heavy infestations, use up to 2.5 grams of bait per square yard.

- For American cockroach control, use bait as described for German cockroach control. Use for light to moderate infestations up to 1.5 grams of bait per square yard, and for heavy infestations, use up to 3.0 grams of bait per square yard.

- For Peruvian cockroach control, use bait as described for German cockroach control. Use for light to moderate infestations up to 1.0 gram = Dime size spot per square yard, and for heavy infestations, use up to 1.5 grams of bait per square yard.

**PRECAUTIONARY STATEMENTS**

- USE RESTRICTIONS
  - Food/feed areas include areas for receiving, storage, packing (canning, bottling, wrapping, boxing), preparing, edible waste storage, and enclosed processing systems (mills, dairies, edible oils, syrups). Serving areas are also considered a food/feed area (adjacent to food/feed areas). Food/feed areas of food/feed handling establishments are limited to areas within the facility where raw or processed food is received, stored, packed, prepared, or handled.

- Application of this product in food/feed areas of food/feed handling establishments is limited to crack and crevice treatment only. Use this product in food/feed areas of food/feed handling establishments other than crack and crevice treatment only, (steam / electric / gas / data tunnels, drainage systems and sanitary sewers) that are not easily accessible to children, pets, and other unwelcome entities. 

- Keep gel away from foods and food contact or preparation surfaces.

- APPLICATION FOR FRESH FOOD HANDLING ESTABLISHMENTS
  - Follow the application rate prescribed above for different species of cockroaches. Apply gel and wash exposed surface followed by a potable water rinse.
