MAXFORCE® Roach Killer Small Bait Stations

**User Safety Recommendations**

- Place MAXFORCE Roach Killer Small Bait Stations in areas where cockroaches have been seen and where they hide. Cockroaches infest dark, warm, damp locations.
- The bait stations can be stuck to a vertical surface by peeling off the bottom label to expose the adhesive. It is important to stick the bait stations firmly to a surface. The stations should be stick in a closed environment.
- For effective roach control use 4-6 bait stations per 100 sq ft of horizontal surface area. Place adjacent to walls and flush in corners. Avoid placing the bait stations on freshly sprayed surfaces.
- Do not spray the bait stations. Avoid placing the bait stations on freshly sprayed surfaces.
- Roaches will begin eating the bait immediately and you should expect to see fewer roaches in a few days. Always use a PPE (Personal Protective Equipment).

**CAUTION**

- May be harmful if absorbed through skin. Avoid contact with eyes, skin or clothing. Wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet. Users should remove PPE immediately after handling this product. As soon as possible, wash thoroughly and change into clean clothing.

**IMPORTANT: READ BEFORE USE**

- The product is toxic to fish. Do not apply directly to water, or to areas where surface water is likely to be present, or to areas where water is directly used for irrigation or other beneficial uses.
- Do not use on waterways or lakes. When using the product, keep children and pets away.
- Do not contaminate water, food or feed by storage or disposal.
- Do not remove bait from stations.
- If empty: Do not reuse this container. Place in trash or offer for recycling if available.
- If partly filled: Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

**First Aid Instructions**

- IF IN EYES: Rinse with plenty of water for 15-20 minutes. Get medical help.
- IF ON SKINS: Rinse skin immediately with plenty of water for 15-20 minutes. Get medical help.
- IF INHALED: Get medical help immediately. Have the product container or label with you when calling a poison control center or doctor for treatment advice.
- IF SWALLOWED: DO NOT induction. Give at least 1 cup of milk or water. Do not induce vomiting.

**Environmental Hazards**

- This product is toxic to fish. Do not apply directly to water, or to areas where surface water is likely to be present, or to areas where water is directly used for irrigation or other beneficial uses.
- Do not contaminate water, food or feed by storage or disposal.

- CAUTION
- HAZARDS TO HUMANS AND DOMESTIC ANIMALS
- PRECAUTIONARY STATEMENTS

Storate and Disposal:
- If empty: Do not reuse this container. Place in trash or offer for recycling if available. If partly filled: Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

Environmental Hazards:
- This product is toxic to fish. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when cleaning equipment or disposing of equipment washwaters.

General Information:
- MAXFORCE® Roach Killer Small Bait Stations may be used for the control of small cockroaches, such as German or Brown-Banded roaches, in any area where cockroaches are a problem, such as residential, warehousing and commercial establishments, including food service, food manufacturing and food processing operations. Cockroaches are nocturnal insects, so it is important to inspect areas infested by roaches during the night or early morning when they are more active. Cockroaches have poor vision in the red spectrum, so黑暗, because roaches do not see light in the red spectrum. Do not allow children or pets to play with bait stations.

User Safety Recommendations:
- Inspect all bait stations and replace as needed for continual control of roaches.
- Do not spray the bait stations. Avoid placing the bait stations on freshly sprayed surfaces.
- Roaches will begin eating the bait immediately and you should expect to see fewer roaches within two weeks.
- For effective roach control use 4-6 bait stations per 100 sq ft of horizontal surface area. Place adjacent to walls and flush in corners.

User should wash hands before drinking, chewing gum, using tobacco or using the toilet.

Additional Information:
- The directions for use of this product are believed to be adequate and must be followed carefully. However, it is important to consider any potential risks associated with the use of this product, such as the potential for allergic reactions or other adverse health effects. It is important to carefully read and follow the directions for use of this product, and to consider any potential risks associated with its use before applying it to a surface.

LIMITATIONS OF LIABILITY:
- TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, THE EXCLUSIVE REMEDY OF THE USER OR BUYER FOR ANY AND ALL LOSSES, INJURIES ... SHALL NOT EXCEED THE PURCHASE PRICE PAID, OR AT BAYER CROPSCIENCE LP'S ELECTION, THE REPLACEMENT OF PRODUCT.
