# INSECTICIDAL DUST

**Use for the elimination of multiple Indoor and Outdoor pests\*. This product kills on contact.**

*\*See back panel for complete list of pests.*

**ACTIVE INGREDIENTS:**

Geraniol .....	8.40%
Cornmint Oil .....	0.10%
OTHER INGREDIENTS*.....	91.50%
<b>TOTAL .....</b>	<b>100.00%</b>

\*Diatomaceous Earth, Sodium Bicarbonate, Calcium Silicate and Calcium Carbonate

**KEEP OUT OF REACH OF CHILDREN**  
**CAUTION**

SEE BACK PANEL FOR FIRST AID AND  
ADDITIONAL PRECAUTIONARY STATEMENTS

NET WEIGHT: 1 POUND

Nature-Cide Insecticidal Dust kills bed bugs, fire ants, fleas (egg, larval and adult stages), German cockroaches, house flies, Pharaoh ants and ticks (nymph and adult stages). Repels all stages of fleas and ticks (nymph and adult stages) for up to 11 weeks. Nature-Cide Insecticidal Dust can be used indoors on carpet, upholstery, pet bedding and outdoors on exterior walls where listed pests enter.

**DIRECTIONS FOR USE:** Read entire label prior to use; use as directed. Shake well before each use. Apply only to dry surfaces. Prior to any large area application, test a small, inconspicuous area and check later for any adverse effects. Apply in and around areas where insects may be crawling, hiding or living. The amount to apply varies depending upon infestation severity. Suggested application rate is 1-2 oz per 100 sq ft of surface area. For added control, simultaneously treat pets with Nature-Cide Flea & Tick Insecticide before reentry into treated areas.

**INDOOR TREATMENTS:** Apply more powder to areas where pets spend most of their time. Focus heavier treatments where dogs land as they jump off beds and elevated resting areas. **Pet Bedding:** Regularly dust pet bedding, kennel and sleeping areas. Reapply every 2-11 weeks year-round, or as needed, to maintain pest control and help reduce the reoccurrence of fleas and ticks. After multiple uses, discard pet bedding or launder to avoid dust buildup. **Carpets:** Brush lightly with a broom to force powder deep into carpet where fleas and their larvae exist. Wait at least one hour before lightly vacuuming to remove powder visible on carpet surface. For maximum efficacy, and when applying at lower rates, delay vacuuming for 24 hours. **Carpet Edges and Furniture:** Powder may also be applied under the edges of carpeting around the tack strip that holds the carpet tight against the walls. For bed bugs, additional areas may be treated such as the cracks of bed frames, headboards and other furniture. Do not treat bed mattresses. Wipe away excess dust with a damp cloth to ensure your applications are inaccessible to future human/pet contact. Do not apply this product into electronic equipment (TVs, radios, computers, etc.). **Upholstery:** Remove loose cushions. Sprinkle along creases and into corners. Use a brush to lightly work powder into folds and creases. If excess powder adheres to a spot, brush out and remove with a vacuum. **Note:** Use caution when disposing/emptying vacuum bags to avoid breathing dust. Gently place in plastic bag and tie tightly to avoid disturbing dust then discard in trash.

**OUTDOOR TREATMENTS:** Many pest species enter buildings through exterior walls or relocate through interior adjoining walls. It is critical to properly treat these walls to kill those overwintering and translocating species. Treat walls by removing outlets and switch plate covers; puffing a light coating of dust into wall voids (not into boxes) thus layering a light dust onto the tops of electrical cables (a common traffic area). Also puff treatments into external cracks and crevices around window/door frames; common entrances for pests.

**PRECAUTIONARY STATEMENTS:** May be harmful if swallowed. Avoid breathing dust. May cause slight eye irritation. May cause allergic reaction in some individuals/pets. **FIRST AID: If in Eyes:** Immediately rinse eyes with plenty of water, including under eyelids. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eyes. **If on Skin:** Thoroughly wash with soap and water. **If Inhaled:** Move to fresh air. **If Swallowed:** Immediately rinse mouth and drink plenty of water. In all cases, if irritation persists, call a poison control center (1-800-222-1222) or doctor for emergency medical treatment information. **Storage and Disposal:** Store in original, tightly closed container in a cool, dry place inaccessible to children and pets. Nonrefillable container; do not reuse or refill this container. Recycle empty container, or discard in trash.

Nature-Cide® Insecticidal Dust is intended for applications with hand or power duster, with a paint brush or by other suitable means, to hiding and runway areas and other places where insects are found. In living areas,

make applications in such a manner as to avoid depositions on exposed surfaces or introducing the material into the air. In the home, all food processing surfaces and utensils should be covered during treatment or thoroughly washed before use. Exposed food should be covered or removed.

To apply Nature-Cide® Insecticidal Dust directly into cracks and crevices, use a bulbous duster or other suitable equipment. Apply lightly and uniformly to infested area. Pay particular attention to cracks and crevices; service ducts; false floors and ceilings; wall voids; around electrical and telephone fittings and equipment; around water and sewer pipes; under and behind cabinets, refrigerators and sinks; around windows and door frames; along baseboards; in attics and crawl spaces. The amount to be applied will vary with the site but should usually be in the range of 2 - 3 grams of Nature-Cide® Insecticidal Dust per square yard (or 0.5 lbs per 1000 square feet).

## **INDOOR USE**

### **FOOD/FEED HANDLING ESTABLISHMENT APPLICATIONS**

Nature-Cide® Insecticidal Dust applications are permitted in both food/feed and non-food areas of food/feed handling establishments as a general surface, spot, or crack and crevice treatment. Food/feed handling establishments are defined as places other than private residences in which exposed food/feed is held, processed, prepared or served. Included also are areas for receiving, storing, packing (canning, bottling, wrapping, boxing), preparing, edible waste storage and enclosed processing systems (mills, dairies, edible oils, syrups) of food. Serving areas where food is exposed and the facility is in operation are also considered food areas.

**Non-Food/Non-Feed Areas:** Examples of non-food/non-feed areas include garbage rooms, lavatories, floor drains (to sewers), entries and vestibules, offices, locker rooms, machine rooms, boiler rooms, mop closets and storage (after packaging, canning or bottling).

**General Surface Application:** Do not apply as a general surface application in the food/feed handling areas of the facility, when the facility is in operation or foods are exposed. Do not apply directly to food products. Cover or remove all food processing and/or handling equipment during application. After application in food processing plants, bakeries, cafeterias and similar facilities, wash all equipment, benches, shelving and other surfaces which food will contact. Clean food handling or processing equipment and thoroughly rinse with clean, fresh water.

**Crack, Crevice and Spot Application:** Crevice and or Spot applications may be made while the facility is in operation provided exposed food is covered or removed from area being treated prior to application. Do not apply directly to food or food handling surfaces. Nature-Cide® Insecticidal Dust may also be applied as a void treatment using suitable equipment, as mentioned above. Be sure to thoroughly treat service ducts, false floors and ceilings, wall voids, attics and crawl spaces. The amount of dust to be applied will vary with the site but should usually be in the range of 2 - 4 grams per square yard (or 0.5 lbs per 1000 square feet). Dust applications should be made in a manner to avoid deposits in exposed surfaces introducing the material that could cause it to go airborne.

**ANTS, COCKROACHES, FLEAS:** Apply Nature-Cide® Insecticidal Dust thoroughly to all areas where these pests crawl and hide, especially in those areas described above. For ants, apply to ant trails, around doors and windows and other places where ants enter premises or are troublesome.

**BEDBUGS:** Apply Nature-Cide® Insecticidal Dust thoroughly to all areas where these pests are typically found including: folds and tufts of mattresses, coils of springs, cracks and hollow posts of bed frames, upholstery of chairs and sofas, picture frame moldings and all cracks and crevices in the room should be treated. Allow powder to remain in contact

with folds and tufts of mattresses, chair and sofa upholstery for 4 - 6 hours, then thoroughly vacuum these treated areas, dispose of vacuum bag and place clean linens on bed. Also vacuum treated areas that will come into direct contact with humans and pets.

## **OUTDOOR USE**

**PERIMETER TREATMENT:** Use Nature-Cide® Insecticidal Dust as a residual treatment for control of **ants, cockroaches, fleas and ticks**.

Make a residual treatment around windows and doors, porches, screens, eaves, patios, garages, under stairways, in crawl spaces and other areas where pests hide. To help prevent the invasion of buildings and structures by these pests, apply thoroughly and uniformly to the foundation and crawl spaces where pests are active and may find entrance.

**SEWER TREATMENT:** Cockroach infestations in sanitary sewers may be treated with Nature-Cide® Insecticidal Dust to provide quick knockdown and short-term population suppression. When treating sewers, one manhole per 200 linear feet should be treated. Treatments are made by removing the manhole cover and replacing with a disc of plywood bored to receive the typical flexible hose from portable or truck-mounted ventilating equipment. Apply 1-2 ounces of dust into the ventilating air to be dispersed quickly and thoroughly through the system.

**TELECOMMUNICATION TREATMENT:** Apply Nature-Cide® Insecticidal Dust into telecommunication conduits, cracks and crevices, junction boxes, etc. using suitable application equipment (such as bulb Duster, or other types of application equipment capable of applying the proper amount). The amount of Nature-Cide® Insecticidal Dust to be applied will vary, but should usually be approximately 1 to 2 grams of dust per cubic foot of conduit.

**FIRE ANTS:** Apply Nature-Cide® Insecticidal Dust with a shaker can. Thoroughly apply to adequately cover mound and around the perimeter

(18" to 24" from the outer edge of the mound). A second treatment may be necessary if complete control is not obtained on first treatment. DO NOT DISTURB THE MOUND PRIOR TO APPLICATION. If possible, treat all colonies in the vicinity. Also, treat colonies which have not yet constructed a mound.

**FLEAS AND TICKS IN RODENT BURROWS:** To control fleas and ticks in and around rodent burrows around homes and other buildings, apply Nature-Cide® Insecticidal Dust with a shaker can. For prairie dogs thoroughly treat quarantine areas and holding areas as well as burrows in open fields. Thoroughly apply dust to adequately cover mound and around the perimeter (18" to 24" from the outer edge). Be sure to treat abandoned rodent burrows which are suspected of containing fleas and ticks. Treat for a minimum of 5 days for minimal rodent populations, 10 days when populations are larger. Apply as needed for control.

#### **IMPORTANT: READ BEFORE USE**

Read the entire Directions for Use, Conditions, Disclaimer of Warranties and Limitations of Liability before using this product. If terms are not acceptable, return the unopened product container at once. By using this product, user or buyer accepts the following Conditions, Disclaimer of Warranties and Limitations of Liability.
