First Aid

Have label with you when obtaining treatment advice.

If swallowed:
- Call a poison control center, doctor, or 1-800-822-1222 immediately for treatment advice.
- Have person sip a glass of water if able to swallow.
- Do not induce vomiting unless told to do so by the poison control center or doctor.

If on skin or clothing:
- Take off contaminated clothing.
- Rinse skin immediately with plenty of water for 15-20 minutes.
- Call a poison control center, doctor, or 1-800-822-1222 immediately for treatment advice.

If in the eyes:
- Hold eye open and rinse slowly and gently with water for 15-20 minutes.
- Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eyes.
- Call a poison control center, doctor, or 1-800-822-1222 immediately for treatment advice.

Note to physician:
If swallowed, this material may reduce the clearing ability of the blood and cause bleeding. If ingested, administer Vitamin K1 intramuscularly or orally. Repeat as necessary based on monitoring of prothrombin times.

Treatment for Pet Poisoning:
If animal eats bait, call veterinarian at once.

Note to Veterinarian:
Anticoagulant Bromadiolone: For animals ingesting bait and showing poisoning signs (drowsiness or elevated prothrombin time), give vitamin K1. If needed, check prothrombin time every 3 days until return to normal (up to 30 days). In severe cases, blood transfusions may be needed.

Precautionary Statements

Hazards to Humans and Domestic Animals:
Caution: Harmful if swallowed or absorbed through the skin. Keep away from children, domestic animals, and pets. Glitches, abnormalities are likely to occur if pets ingest. Skin, or on children. JT Eaton® (including applicant) must keep stores, pets, and worksite areas free of live animals, be checked for signs of dead animals, and keep clean and free from clutter. Pesticides are hazardous to aquatic organisms. Do not contaminate water during or after application of this product. Do not contaminate water by allowing run-off from pet baits to contact areas.

Safety Precautions:
Follow label instructions for cleaning and maintaining PPE. For white surfaces, use detergent and water. Keep away from children. Remove PPE immediately after handling this product. Wash hands thoroughly with soap and water after applying bait. Do not smoke, eat, smoke, or use any other chemicals in areas adjacent to treated areas. Do not contaminate water when disposing of equipment washwater or waste.

Directions for Use:
It is a violation of federal law to use this product in a manner inconsistent with its labeling. Read this label. Read this entire label and follow all use directions and use precautions. Use only for the sites, pests, and application methods described on this label.

Important:
- Do not expose children, pets, or non-target animals to rodenticides. To help prevent accidents:
  1. Store unused product out of reach of children and pets.
  2. Apply bait in locations out of reach of children, pets, domestic animals and non-target wildlife, or in tamper-resistant bait stations. These stations must be resistant to destruction by dogs and by children under six years of age, and must be used in a manner that prevents such children from reaching into bait compartments and obtaining bait. If bait can be shaken from bait stations when they are lifted, units must be secured or otherwise immobilized. Even stronger bait stations are needed in areas open to hosed beetles, raccoons, bears, or other potentially destructive animals, or in areas prone to vandalism.

Active ingredient:
Bromadiolone (CAS #: 92072-56-7): 0.005%
Other ingredients*: 99.995%
Total: 100.000%
*Contains Denatonium Benzoate

Keep Out of Reach of Children

Selection of Treatment Areas:
Select locations where a light source can be provided. Avoid dry areas where rats and mice may find food and consume the bait. Generally, these areas are along walls, under eaves, storm entrances, doors, ceilings, and other locations where rodents or house mice have been seen. Protect bait from rain and snow.

Application Directions:
Each graze of JT Eaton® NECTUS™ 2G Bait 2G Second Generation Rodenticide® contains 0.38 ounces (10.9g) of bait. Norway Rats and Roof Rats: Apply 10 to 20 bait stations per location for controlling rats. Space placements 15 to 30 feet apart, at irregular locations within the infested area. Maintain a consistent supply of fresh bait for at least 20 days or until a substantial risk feeding by rats on bait ceases to appear. House Mice: Apply 1 bait bag per placement, usually spaced 8 to 12 feet apart. Two bags may be needed at points of very high mouse activity. Maintain a constant supply of fresh bait for 15 days or until signs of mouse activity cease.

Follow-Up:
While wearing gloves, replace contaminated or spoiled bait immediately. Collect and properly dispose of dead animals and leftover bait and baits, as well as any bait that has become accessible to non-target animals. To discourage reinfestation, limit sources of rodent food, water, and harborage as much as possible. If reinfestation does occur, repeat treatment. For continuous sources of infestation, set up permanent bait stations and replenish as needed.

Storage and Disposal:
DO NOT CONTAMINATE WATER, FOOD OR FERTILIZER WITH BAITS OR DISPOSAL.

PESTICIDE STORAGE:
Store only in original container in a cool, dry, place inaccessible to children and pets. Keep containers closed and away from other chemicals.

PESTICIDE DISPOSAL:
Waste resulting from use of this product may be placed in trash or delivered to an approved waste disposal facility.

CONTAINER HANDLING:
Non-hazardous container. Do not reuse or refill. This container, Triple Rinse (or equivalent), then offer for recycling or reconditioning, or puncture and dispose of in sanitary landfill, or by incineration. In most states, burning is not allowed.

Warranty:
To the extent consistent with applicable law, seller makes no warranty expressed or implied, concerning the use of this product other than as specified on the label. In the event consistent with applicable law, buyer assumes all risk of use and/or handling of this material when such use and/or handling is contrary to label instructions.
