TREATMENT FOR POISONING
If animals have consumed, call veterinarian at once.

PRECAUTIONARY STATEMENTS

Hazard to Humans and Domestic Animals
CAUTION:
Harmful if swallowed or absorbed through the skin. Keep away from children, domestic animals and pets. Causes internal irritation. Do not get in eyes, on skin, or on clothing. All contacts (including application) must wear gloves and chemical resistant gloves. Any person who does not wear corrosion resistant or non-abrasive if following application of this product must wear protective gloves.

USER SAFETY REQUIREMENTS:
Follow manufacturer's instruction for cleaning/contaminating PPE. No such instructions for washables; use detergent, and hot water. Wash and wash PPE separately from other laundry. Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash hands thoroughly after washing, then before eating, drinking, chewing gum, using tobacco or using the toilet and change into clean clothing.

ENVIRONMENTAL HAZARDS:
This product is extremely toxic to mammals and birds. Dogs, cats, and other predators are scavenging mammals and birds might be poisoned if they feed upon animals that have eaten this bait. This product is toxic to fish. Do not apply this product directly to water or to areas where surface water to present or is intended areas, above the mean high water mark.

DIRECTIONS FOR USE:
It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

READ THIS LABEL: Read this entire label and follow all use directions and use precautions. Use only for the sites, pests, and application methods described on this label.

IMPORTANT:
1. Do not expose children, pets, or nontarget animals to rodenticides. To prevent to prevent accidents:
- Store unused product out of reach of children and pets.
- Do not apply during rain orImmediately after discharging rain or snowfall.

2. Apply bait to locations out of reach of children, pets, domestic animals and nontarget wildlife, or in тамангас тант байслин.
- These stations must be resistant to destruction by dogs and by children under six years of age, and must used in a manner that prevents such children from reaching the bait compartments and obtaining bait. If bait can be shaken from bait stations when they are filled, units must be stored in or otherwise immobilized. Even stronger bait stations are needed in areas open to birds, raccoons, bears, or other potentially destructive animals, or in areas prone to vandalism.

3. Dispose of container and unused, spoiled, or unconfined bait as specified on this label.
- Rat stations are mandatory for outdoor, above grade use. Tamper-resistant bait must be used in shingles, pets, nontarget mammals, or birds may access the bait.

USE RESTRICTIONS:
This product can only be used in Norway rat, food rats, and house mice in and within 100 feet of man-made structures constructed in a manner to be flush with the surrounding environment and/or to be barred or otherwise obstruct rat infestations. Examples of such structures include: outbuildings, other permanent or temporary residential/leisure use providing for more, industrial and commercial buildings, trash receptacles, agricultural buildings, transport vehicles, buildings, trains, trucks, docks, and parts of terminal buildings and related structures and associated with these keeps (e.g., boat)

DIRECTIONS FOR USE:
Sight and site with care before applying this product. Do not apply to any product that is not in its original package. Place product in bait stations. Barreling with VECTUS® is prohibited.

SELECTION OF TREATMENT AREAS:
After having all good levels, waters, and harbors as possible. Determine dry areas in the area. These will likely form and consume the bait. Generally, these areas are along water, rivershoreline, in, and on or below water, at least 10 feet above the water line, in the treated area, or in locations where water loss or water loss has been severe. Protect bait from rain and snow.

APPLICATION DIRECTIONS:
Each bag of JT Eaton® VEKTUS® bait 2G Second Generation Rivotrilectomide contains approximately 0.25 g (2-9.73 grams) of bait.
- Norway Rats and Rodents: Apply 10 to 42 bait bags per placement for control of rat and rodents. Place stations 15 to 30 feet apart at appropriate locations within the treated areas. Maintain a constant supply of fresh baits for at least 10 days or until signs of new feeding by rats or baits cease to appear.
- Norway Mice: Place 1 bait bag per placement, usually spaced 1 to 12 feet apart. Two bags may be placed at points of very high mouse activity. Maintain a constant supply of fresh bait for at least 10 days or until signs of mouse activity cease.

Follow-Up: While wearing gloves, replace contaminated or spoiled bait immediately. Collect and properly dispose of dead animals and leftover bait and baits, as well as any that may become accessible to nontarget animals.

PESTICIDE STORAGE:
Store only in original container in a cool, dry place inaccessible to children and pets. Keep containers closed and away from other chemicals.

PESTICIDE DISPOSAL:
Wastes resulting from the use of this product may be disposed of in trash or disposed of in approved waste disposal facility.

CONTAINER HANDLING:
Nonrefillable container. Do not reuse or refill this container.

WARRANTY:
To the extent consistent with applicable law, seller makes no warranty expressed or implied, concerning the use of this product other than that indicated on the label. To the extent consistent with applicable law, buyer assumes all risk of use and handling of this material when such use and handling is contrary to label instructions.

Storage and Disposal:
Do not contaminate water, food or feed by use of disposal or storage.

Fruit Fly/Tsetse Fly

CONTAINER HANDLING:
Nonrefillable container. Do not reuse or refill this container.
