RECOMMENDED APPLICATION PROCEDURE

Application Method:

Application of this product may be made directly from 33 and 55 gallon drums (marketing size) by fitting the drum with a "T" connection and pumping water across the junction, which will pull the dispersant from the drum into the water stream and on to the oil spill.

Concentration/Application Rate:

For heavy concentrations of crude or Bunker C oil, apply the product undiluted.

Where lighter fractions of petroleum are involved, the product can be diluted up to one part dispersant to 30 parts water. NOKOMIS 3-F4 is on the U. S. Environmental Protection Agency's NCP Product Schedule. This listing does not mean that EPA approves, recommends, licenses, certifies, or authorizes the use of NOKOMIS 3-F4 on an oil discharge. This listing means only that data have been submitted to EPA as required by subpart J of the National Contingency Plan, § 300.915
