Make a light application at a rate of 2 In ft/sec and avoid run off or dripping from targeted area. Area treatments are effective where flies congregate, roost and feed, which may include garbage receptacles and lids, refuge containers, under tables and benches, recycling bins, dumpsters, behind vending machines, plant/flower pots, under bars, calf hutch ceilings, eave areas, walls and/or areas where flies are likely to congregate or infest. Do not apply bait in areas that are frequently cleaned. This product will not adhere to surfaces that are dusty or greasy. Reapply when bait placements are no longer visible and/or reinfestation occurs. Use a water-dampened paper towel to remove unwanted bait placements and then discard in trash.

BAND TREATMENT: Spray from a distance no further away from targeted area than 6 in (15 cm) to create a band application at a rate of 2 in ft/sec. Band applications may be made to areas such as beam edges, receptacle edges, table or bench edges, around windows and window frames, under narrow eaves and other areas where there is a narrow area where flies land, roost and/or are likely to infest. Reapply when bait placements are no longer visible and/or reinfestation occurs. Use water-dampened paper towel to remove unwanted bait placements and then discard in trash.

REMOVABLE BAIT PLACEMENTS: Spray bait on a small object no larger than 24 in² and no smaller than 6 in² unless it is a rope or twine of at least 6 in long.
