JASOGE AND DISPOSAL					
Gently apply 1 cup of granules over and 2 ft around each ant mound. This product works within 24 hours.	Thoroughly and gently sprinkle a minimum of 1 gallon of water over each mound after application. High pressure watering may cause ants to migrate reducing product effectiveness. Apply in cool weather, 65° to 80° in early morning or late evening hours. Treat new ant mounds if they appear.	stnA əriব bətroqml			
Spread granules over and around each ant hill.	Water lightly after applying 1 1/2 teaspoonfuls/ant hill. Repeat if ants reappear	stnA	Spot Treatments		
For these soil insects use the rate of 2 1/2 lbs. per 1000 sq. ft. equal to 109 lbs. per acre.	Water grass thoroughly after application with 1/4 to 1/2 inch water to release the insecticide to the soil level. For billbug control apply when activity is first observed or these insects. For white grub control except dung beetle, these insects. For white grub control except dung beetle, these insects. For white grub control except dung beetle, these any time between late July and early October. Treat again in late summer or early fall if a 2nd generation occurs.	SOIL INSECTS White grubs, Japa- hase beetle grubs, June beetle grubs, Mole crickets, White grubs.			
For application with other type of equipment apply at the rate of 2 lbs. per 100 per 1000 sq. ft. or 3.2 oz. per 100 sq. ft. For heavy lawns such as aq. ft. For heavy lawns such as 2. Augustine grass increase rate to 3 lbs. per 1000 sq. ft. equal to 4.8 oz. per 100 sq. ft.	Apply with a fertilizer spreader. See spreader settings chart on this label. Apply when grase is dry. It is not necessary to water in the insecticide for the control of surface insects. Repeat if new insects appear.	SURFACE INSECTS Ants, Armyworms, Brown dog ticks, Chinch bugs, Clover mites, Crickets, Chinch bugs, Clover mites, Crickets, Cutworms, (Sod webworms), Leafhoppers, moths, (Sod webworms), Leafhoppers, Millipedes, Sowbugs	HOW TO USE For overall lawn applications: Turfgrass and Por overall lawn applications: Turfgrass and active to fit area to be treated. #2 Refer to spreader settings for your application rate. Check and calibrate your spreader as per One spreader manual. #3 Apply as directed in this chart.		
Use Rate 3.2 oz. for each 100 sq. ft. area (5 x 20 ft.) or 2 lbs. per 1000 sq. ft. equal to 87 lbs. per acre.	Remarks These pests are commonly found around or near foundations of houses as well as in lawns. Certain of these pests may enter houses. Apply a 3 to 5 ft band of granules around the dwelling. You may water lightly after application. Repeat if new insects appear.	Target Pests Ants, Brown dog ticks, Clover mites, Crickets, Earwigs, Fleas, Millipedes, Roaches, Silverfish, Sowbugs (Pillbugs),Spiders	Treatment Areas Band treatment around outside of house foundation

The following pests are commonly found around or near foundations of commercial buildings and houses as well in lawns. Some pests attempt to enter the structure. Apply a 3 to 5 foot barrier band of AMERICAN BRAND PERMETHRIN GRANULES next to the buildings foundation for control of insects such as Ants, Armyworms, Brown dog ticks, Chinch bugs, Clover mites, Crickets, Outworms, Earnings, Fleas, Lawn moths-Sod webworms, Leafhoppers, Millipedes, Mole crickets, and Sowbugs. APPLICATION RATE: Use 3.2 ounces for each 100 sq. ft. of strea.

Cutworms, Earnings, Fleas, Lawn moths-Sod webworms, Leafhoppers, Millipedes, Mole crickets, and Sowbugs. APPLICATION RATE: Use 3.2 ounces for each 100 sq. ft. or 2 lbs.

HOW TO USE: Distribute product evenly over the area to be treated. Lightly water in the granules after application. Beapply if insects reappear and after hard rains.

SPOT TREATMENT FOR ANTS: Apply 1 ½ teaspoonful over and around each ant hill. Water lightly after application. Reapply if insects reappear and after hard rains.

This product is permitted for outdoor use around the home. Use on ornamental and recreational turt grass areas. Not for use on sod or turt farms. Use for outdoor lawn or perimeter insect control around homes, commercial and industrial buildings. Food utensils such as teaspoons and measuring cups should not be used for food purposes after use with pesticides.

Kills on contact, protects your home from invading ants. Also stops Spiders, Roaches, Fleas, Brown dog ticks, Fire ants, Chinch bugs, Armyworms, Billbugs, Cutworms, Earwigs, Mole crickets, Sod webworms, and other insects listed on this label.

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Do not apply this product in a way that will contact workers or other persons, either directly or the lawn or garden area. Water treated area as directed on this label. Do not water bodies, or aquatic habitat can occur. Do not allow others to enter the treated area gutter where drainage to sewers, storm draina, water bodies, or aquatic habitat can occur. Do not allow the product to make enter any drain during or after application. Apply this product directly to the lawn or garden area. Water treated area as directed on this label. Do not water to the point of run-off. Do not make applications of one enter or allow others to enter the treated area until dusts have settled. If soil incorporation is required after the application, do not enter or allow others to enter the treated areas (except those persons involved with the incorporation) until the incorporation is complete. If the incorporation is accomplished by watering-in, do not enter or allow others to enter the treated areas (except those persons involved with the incorporation) until the incorporation is complete. If the incorporation is accomplished by watering-in, do not enter or allow others.

User should wash nands before eating, drinking, chewing gum, using tobacco or using the rollet. User should remove clothing. Immediately after handling this product. As soon as possible, wash thoroughly and change into clean clothing.

ELVIRONMENTAL HAZARDS

This product is extremely toxic to aquatic organisms, including fish and invertebrates. To protect the environment, do not allow pesticide to enter or run off into storm drains, drainage ditches, or surface waters. Applying this product in calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain does not blow or wash pesticide off the treatment or surface waters. Sweeping any product that lands on a driveway, sidewalk, or street, back onto the treated area of the lawn or garden will help to prevent run off to water bodies or drainage ditches. This area. Sweeping any product that lands on a driveway, sidewalk, or street, back onto the treated area of the lawn or garden will help to prevent run off to water bodies or drainage ditches. This
