#### 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

<b>Additional information about design of technical systems:</b>	No further data; see section 7.
<b>Control parameters:</b>	All ventilation should be designed in accordance with OSHA standard (29 CFR 1910.94). Use local exhaust at filling zones and where leakage and dust formation is probable. Use mechanical (general) ventilation for storage areas. Use appropriate ventilation as required to keep Exposure Limits in Air below TLV & PEL limits.
<b>Components with occupational exposure limits:</b>	The product does not contain any relevant quantities of materials with critical values that have to be monitored at the workplace.
<b>Additional information:</b>	The lists that were valid during the creation of this SDS were used as basis.
<b>Exposure controls:</b>	
<b>General protective and hygienic measures:</b>	The usual precautionary measures for handling chemicals should be followed. Keep away from foodstuffs, beverages and feed. Immediately remove all soiled and contaminated clothing and wash before reuse. Wash hands before breaks and at the end of work. Avoid contact with the eyes and skin.
<b>Breathing equipment:</b>	Not required.
<b>Protection of hands:</b>	<b>Protective gloves</b> The glove material has to be impermeable and resistant to the product/ the substance/ the preparation. Due to missing tests no recommendation to the glove material can be given for the product/ the preparation/the chemical mixture. Select glove material based on penetration times, rates of diffusion and degradation. <b>Material of gloves:</b> The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material cannot be calculated in advance and has therefore to be checked prior to the application. <b>Penetration time of glove material:</b> The exact break-through time has to be determined and observed by the manufacturer of the protective gloves.
<b>Eye protection:</b>	Tightly sealed goggles
