DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

IMPORTANT: Read entire DIRECTIONS FOR USE before using PREMISE FOAM®

APPLICATION INFORMATION

This product is a ready-to-use formulation of imidacloprid intended to kill subterranean termite species of Coptotermes, Heterotermes, Reticulitermes, and Zootermopsis. It can be used for spot treatments for the control of existing infestations of subterranean termite species and other wood-destroying insects. PREMISE Foam is a ready-to-use formulation that rapidly expands to create a high-expansion ratio or “dry” foam. When applied into a termite gallery system, or into a termite-infested void, the foam expands to thoroughly cover hidden or difficult to treat areas, and contact insects hide deep within these galleries or voids. Do not use this product as the sole source of control for active, structural infections by subterranean termites; it is not a substitute for mechanical alteration, soil and foundation treatments. For active, structural infestations by subterranean termites, this product can only be used to supplement soil-applied termicide, a termite bait system, or other product registered as a sole source for termite control. This product is intended as a supplemental tool to kill subterranean termites that are found in above-ground and other locations.

Spot treatments with PREMISE Foam can be made, as a temporary containment measure, in areas where termite-damaged wooden structural elements are known and identified. To control or suppress ants in holes or spaces, inject a sufficient volume of PREMISE Foam by drill and crevice or wall injection. Make injection sites into areas where ants or their nests are present, or other places where these pests enter the structure, or where they have been seen or have evidence of past activity. The volume of foam sufficient to cover the area, but do not allow excessive dripping or run-off to occur.

When an ant nest is located in live holines or non-structural wood constructions (e.g., posts, fences, decks), treat the interior cavity containing the nest site by injecting a volume of PREMISE Foam sufficient to cover the area.

Restrictions:
- Do not apply in open or exposed surfaces, or in areas accessible to children.
- Do not apply where electrical shock hazards exist.
- Do not apply until location of head pipes, ducts, water and sewer lines, and electrical conduits are known and identified.
- Caution must be taken to avoid puncturing and injection into these structures.
- Do not drill where head pipes, ducts, water and sewer lines and electrical conduits are located.
- Holes drilled in living space should be sealed after treatment.
- Do not re-apply this product to a previously treated site or location before 3 months, unless re-infestation is observed or suspected.
- Do not apply this product, by any application method, to linden, basswood, or other Tall species.

USE SITES

This product can be applied to insect galleries in damaged wood, into spaces between wooden structural members, or into voids within the construction. Locations treated may include, but are not limited to, exposed wooden elements in crawlspaces, basements, or attics, unexposed wooden elements inside walls or other structural voids, exterior wooden elements in doors, fencing or siding, damaged in wood, in spaces between wooden elements of a structure, and junctions between wood and foundations. Use this product in commercial and residential structures, as well as other, non-structural wooden constructions subject to termite or wood-destroying insect attack.

APPLICATION

NOTE: The self-pressurized container dispenses PREMISE Foam at a rate of approximately 25–50 milliliters of liquid formulation per second. A small amount of liquid formulation will be dispensed into the air as the container is removed from the dispenser trigger; this will allow product in the application hose to fully expand and enter the target area. This pressurized container treats 1,000 cubic inches. This product will provide foam at an expansion ratio of 30 to 1. This ratio is a function of agitation and cumulative release time. Avoiding aggregates and structural voids to control subterranean termite infestations in localized, aboveground areas of the structure, apply a sufficient volume of PREMISE Foam into galleries or voids in termite-damaged wood, or into spaces between termite-infested wooden structural members and between the soil plate and foundation where wood is vulnerable. Locate galleries by using visual signs (e.g., shelter tubes, blister wood), the presence of live insects, mechanical sounding techniques, or listening devices (e.g., stethoscopes, acoustic emission detectors).

Localized treatment for ant infestations:
- Localized treatment for ant infestations: To control or suppress ants in holes or spaces, inject a sufficient volume of PREMISE Foam by drill and crevice or wall injection. Make injection sites into areas where ants or their nests are present, or other places where these pests enter the structure, or where they have been seen or have evidence of past activity. The volume of foam sufficient to cover the area, but do not allow excessive dripping or run-off to occur.
- When an ant nest is located in live holines or non-structural wood constructions (e.g., posts, fences, decks), treat the interior cavity containing the nest site by injecting a volume of PREMISE Foam sufficient to cover the area.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal. Pesticide Storage: Store in a cool, dry place and avoid excessive heat (>100°F). Store in original container and out of reach of children, preferably in a locked cabinet or storage facility.

Container Handling:
- Do not reuse empty container.
- Do not puncture or incinerate. Empty, place in trash or offer for recycling if available.

IMPORTANT: READ BEFORE USE

Read the entire Directions for use, Conditions, Disclaimer of Warranties and Limitations of Liability before using this product. If terms are not accepted, return the unused product container at once.

By using this product, user or buyer accepts the following Conditions, Disclaimer of Warranties and Limitations of Liability.

CONDITIONS: The user or buyer acknowledges and agrees that:
- The product is to be used in accordance with the directions for use of this product.
- The product is intended for the use described in the directions for use of this product.
- The use of the product is subject to the laws and regulations of the entity in which the product is to be used.
- Bayer CropScience LP disclaims any and all warranties, express or implied, of merchantability or fitness for a particular purpose or otherwise, and is not responsible for the product, its use, or the results obtained therefrom.
- Personal Injury, death, property damage, or other consequences may result because of the use of this product. Because of the potential for any adverse consequences, the user or buyer is responsible for ensuring that the product is used only by persons who are trained and qualified to use the product safely.
- The product is sold, used, and paid for at the user’s risk at all times, including after delivery and before use.
- The product, its use, or the results obtained therefrom may not be patent- or trademark-protected.
- The product is not intended for use as a substitute for or in conjunction with other pest control products or termite control products.
- The product is not intended for use in conjunction with other pest control products or termite control products. States may have more restrictive requirements regarding qualifications of persons using this product. Consult the state’s pest control regulatory agency of your state prior to use of this product.

ACTIVE INGREDIENT:
L-(6-Chloro-3-pyridinyl)methyl-2-imidazolidinone

TOTAL:
100.00% EPA Reg. No. 108-1391

STOP - Read The Label Before Use. Keep out of reach of children.

CAUTION

PARA EL USUARIO: Si usted no lee o entiende inglés, no use este producto hasta que le hayan explicado el nombre, las instrucciones y los riesgos que figuren en la etiqueta. PARA EL USUARIO: Si usted no lee o entiende inglés, no use este producto hasta que le hayan explicado el nombre, las instrucciones y los riesgos que figuren en la etiqueta.

For Pest Management Professionals and Commercial Use Only
To Kill subterranean termite species of Coptotermes, Heterotermites, Reticulitermes, and Zootermopsis. For use by individuals/ firms licensed or registered by the state to apply general pest control products or termite control products. States may have more restrictive requirements regarding qualifications of persons using this product. Consult the state’s pest control regulatory agency of your state prior to use of this product.

ACTIVE INGREDIENT: L-(6-Chloro-3-pyridinyl)methyl-2-imidazolidinone

OTHER INGREDIENTS: 0.05%

TOTAL:
100.00%

FIRST AID

If swallowed:
- Call a poison control center or doctor immediately for treatment advice.
- Have person sip a glass of water if able to swallow.
- Do not give anything by mouth to an unconscious person.

If in eyes:
- Hold eye open and rinse slowly and gently with water for 15-20 minutes.
- Remove contact lenses, if present, after the first 5 minutes.
- Continue rinsing eye.
- Call a poison control center or doctor for further treatment advice.

If on skin or clothing:
- Take off contaminated clothing.
- Rinse skin immediately with plenty of water for 15-20 minutes.
- Call a poison control center for treatment advice.

HOT LINE NUMBER

1-800-334-7757

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact 1-800-334-7757 for emergency medical treatment information.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

Hazard: Harmful if swallowed. Avoid contact with skin or clothing. Wash thoroughly with soap and water after handling.

Environmental Hazards:
This product is highly toxic to aquatic invertebrates. Do not apply directly to water, to areas where surface water is present or to intertidal areas below the mean high water mark. Apply this product only as specified on this label.

PHYSICAL/CHEMICAL HAZARDS

Concentrated. Under pressure. Do not apply or store near heat, sparks or open flame. Do not puncture or incinerate container. Exposure to temperatures above 105°F may cause burning. This product contains a flammable propellant. Avoid dripping in areas near electrical wiring, plumbing, communication lines, etc. Do not apply where electrical short circuits might result, such as in wall outlets, conduits, motors, switches, etc.
