

RESTRICTED USE PESTICIDE

DUE TO ACUTE INHALATION TOXICITY OF SULFURYL FLUORIDE

For sale to and use only by Certified Applicators or persons under their direct supervision and only for those uses covered by the Certified Applicator's certification. An applicator certified by the state must be present on site at all times during introduction of fumigant, reentry prior to aeration, and initiation of the aeration procedure.

FIFRA 24(c) Special Local Need Label (SLN)

**For Distribution and Use Only in the State of South Carolina
Fumigation of Non-Edible Commodities and Use of Quarantine/Regulatory
Treatment Schedules**

ProFume®

EPA Reg. No. 1015-79

SLN SC-120005

This label expires and must not be distributed or used in accordance with this SLN registration after January 25, 2023.

Directions for Use

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This state-specific Section 24(c) labeling must be in the possession of the user at the time of application.
- Follow all applicable directions, restrictions, and precautions on the EPA registered label for EPA Reg. No. 1015-79.

This Section 24(c) Special Local Needs label permits the use of ProFume® gas fumigant on non-edible commodities and use of quarantine/regulatory treatment schedules. Follow all use directions, requirements and precautions on the label attached to the product container and included in the ProFume Applicator's Manual.

ProFume may be used for treatment of commodities that are not part of the food chain for human consumption such as:

- forest and plant products, such as logs, lumber, firewood, wood packaging materials, dunnage, wood chips, mulch, paper products, bamboo, wicker, dried vines, plants and flowers for ornamental use
- processed and unprocessed cotton, wool, burlap, other fibers or cloth
- feathers, processed and unprocessed human and animal hair
- leather products, animal hides, fur
- soil-contaminated non-food cargo, such as wood construction debris

ProFume may also be used for quarantine/regulatory purposes as specified by a regulatory authority, such as local, state, federal, or international government agency or regulatory authority, for treatment of raw agricultural commodities, processed commodities, and non-food and/or non-feed commodities. Follow requirements for dosage rates, treatment periods, monitoring, and other procedures specified by the state or federal agency responsible for the treatment schedule. Douglas Products and Packaging Company assumes no risk or liability for loss or damage from fumigations performed for quarantine/regulatory purposes. **Note:** For treatment of raw agricultural commodities and processed commodities, the applicator must follow all of the directions and restrictions on the cylinder label and in the Applicator's Manual for ProFume.

When ProFume is used for quarantine/regulatory purposes according to a treatment schedule for sulfuryl fluoride specified by a regulatory authority, the following are applicable:

- The Fumiguide™ program for ProFume is not required for dosage calculation.
- The maximum concentration of ProFume can exceed 128 oz/1000 cu ft if required by the treatment schedule.
- The maximum target dosage can exceed 1500 oz-h/1000 cu ft if required by the treatment schedule for fumigation of non-food or non-feed commodities, empty structures/vessels, or commodities and processed food/feed items that will not enter the human food chain.

Follow all requirements for dosage rates, treatment periods, monitoring and other procedures specified by the regulatory authority responsible for the treatment schedule.
