Remove contact lenses if present, after the first five minutes, then continue rinsing.

GENERAL INFORMATION

Recede is a water-based, silicone emulsion, antifoam and defoamer that can be used to prevent foam formation or knock down existing foam. Use rates for Recede depend directly on temperature, composition, viscosity, agitation and other conditions. Therefore, rates may require adjustment for the most effective dosage.

Ideal For:

- Herbicides and other pesticides known to cause excessive foaming
- Mixtures that include nonionic surfactants
- Application equipment that continuously agitates spray solution

DIRECTIONS FOR USE NOT FOR AQUATIC USE

Defoaming: Squirt directly on foam that has already formed. Stop agitation then add enough Recede to get rid of foam.

Antifoaming: Add Recede after the first ingredient. Do not add to dry tank or before the addition of water.

Some tank mix partners create more foam than others. For ingredients that cause a lot of foam to form up to two (2) oz. per 100 gal. may be required to adequately control foam. Other factors such as temperature and amount of agitation will increase or decrease the amount of control needed.

STORAGE AND DISPOSAL

STORAGE: Store in a cool, dry place. Store in original container only. Do not add anything to the container. Keep container tightly sealed when not in use. Do not store near fire, flame or other potential sources of ignition. Do not contaminate water, food or feed by storage or disposal of this product.

DISPOSAL: Do not reuse empty container. Triple rinse (or equivalent) during mixing and loading. Recycling decontaminated containers is the best option of container disposal if allowed by law. The Agricultural Container Recycling Council (ACRC) operates the national recycling program. To contact your state and local ACRC recycler visit the ACRC web page at www.acrecycle.org. Decontaminated containers and materials must be disposed of in a manner allowed by local, state and federal laws and regulations.

Shake well before using. If product freezes, allow to thaw, then shake well. For optimal storage, store between 40° and 90°F.
