

XTREME K

0-0-29 Potassium Acetate

 **Advanced Plant & Soil Solutions**
Exclusively from Fisher & Son

Xtreme K is a revolutionary source of potassium having superior foliar absorption over traditional forms of potassium. Potassium acetate is THE ultimate choice of potassium for foliar applications. Due to small molecule size and the plant's natural affinity for organic acids, Xtreme K has been demonstrated to have up to 5 times the foliar uptake of traditional forms of potassium such as potassium nitrate, potassium thiosulfate, and potassium carbonate.

Directions for Use:

Applications	Rates and Comments
Warm and Cool Season Turfgrass	Maintenance: 2-3 oz per 1,000 sq ft. Apply every 14 days for maintenance.

Guaranteed Analysis

Soluble Potash (K_2O)..... 29.0%

Derived from: Potassium acetate

Net Weight: 11.1 lbs / gallon

Net Contents: 30 Gallons

Manufactured for Fisher and Son Inc.
110 Summit Drive, Exton, PA 19341

CAUTION: KEEP OUT OF REACH OF CHILDREN. HARMFUL IF SWALLOWED.
