Waste treatment methods

Disposal methods

RCRA: This material, as supplied, is not a hazardous waste according to Federal regulations (40 CFR Section 261.21). This material, as supplied, is exempt from RCRA Hazardous Waste classification D001 (Ignitable)-reason: product as supplied is in a sealed pouch-once consumer opens pouch to use the product the liquid in the pouch readily evaporates until gone-the residual waste is a small solid material container whose ignitable temperature >340° C. There is no remaining liquid as a waste consideration and the de minimis solid waste residual does not fall within RCRA definition for hazardous waste. This material could become a hazardous waste if it is mixed with or otherwise comes in contact with a hazardous waste, if chemical additions are made to this material, or if the material is processed or otherwise altered. Consult 40 CFR 261 to determine whether the altered material is a hazardous waste. Consult the appropriate state, regional, or local regulations for additional requirements.

Contaminated Packaging Dispose of contents/containers in accordance with local regulations.
