## STORAGE AND DISPOSAL

Store locked up

Store in corrosive resistant container with a resistant inner liner.

Dispose of contents/container in accordance with local/regional/national/international regulations

## DIRECTIONS FOR USE For Commercial Use Only

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

**Mixing Instructions for pH control:** Create a stock solution by mixing 3.5oz-4oz per 1 gallon of water. Use a 1:128 dilution pump to administer the stock solution to the water lines to achieve a pH of 5.5-6.5. It is important to check pH before and after to determine if you may need to decrease or increase your stock solution to achieve the target pH.

**Mixing Instructions for Line Cleaning:** To remove scale and mineral buildup use this product to create a stock solution by mixing 4.5oz-6.5oz per 1 gallon of water. Use a 1:128 dilution pump to administer the stock solution to the water lines to achieve a pH of 4.5-5. It is important to check pH before and after to determine if you may need to decrease or increase your stock solution to achieve the target pH.

**Electronic Pump Injection:** An electronic dosing pump can be used to accurately inject this product directly from the container.

Your sales representative can guide you in the application techniques.
