Buildings, Vacation Rentals, Carpet Cleaners, Steam Cleaners

KEEP OUT OF REACH OF CHILDREN

NET CONTENTS: 1 Quart / .95 L

Whether you call it cannabis, marijuana, or hemp, the odor is certainly readily distinguishable. Before or after it's smoked, cannabis has a strong musky odor, often referred to as "skunk-like," and is pungent both in its unburnt state, while being smoked and residual smell left behind.

The dominant terpenes present in the specific variety of marijuana will determine its smell during the smoking process, which always adds additional fire layers, smoke, and a stronger skunk smell to the original odor. The smell can be so potent that it can quickly stink up a hotel room or other area with a foul smell.

After being smoked, the smells are similar, but there is the additional factor of smoke permeating linens, drapery, bedding, upholstery, clothing and other fabric sources. The best way to control, manage, and remove these skunk-like odors is found only in SmokeOut™ Vapor Phase Technology, where malodor neutralization occurs when the gaseous offensive odors are chemically combined with the SmokeOut™ active agents resulting in a total neutralization of the malodor molecules.

SmokeOut™ Will Remove Cannabis Sourced Odors From:

- Grow Houses
- Medical Marijuana Facilities
- Greenhouses
- Drapery
- Upholstery
- Linens
- Bedding
- Mattresses
- Pillows
- Couches
- Chairs
- Ottomans
- Outdoor Furniture
- Cotton
- Silk
- Leather
- Nylon
- Polyester
- Carpet
- A/C Vents
- A/C Filters
- Headliners

DIRECTIONS FOR USE:

1. Remove source of odors.
2. Apply generously by spraying on affected area.
3. Allow 10-15 minutes to dry.
4. If odor is still present apply second application.

FOR PREVENTIVE USE:

For areas anticipating heavy build up of odors, daily use will help to neutralize malodors and freshen the area.

DIRECTIONS FOR USE IN AN ELECTROSTATIC SPRAYER:

Follow the manufacturer's directions on how to use an electrostatic sprayer.

FOR DEODORIZING VEHICLES:

1. Remove source of odors.
2. Ensure all windows in vehicle are closed and no one is inside vehicle.
3. Turn engine on and air system on high recirculation setting.
4. Spray SmokeOut™ Cannabis RTU Spray directly onto fabrics, headliner, under seats, etc.
5. Close unlocked doors and stand outside of vehicle.
6. Let car sit for 1-10 minutes before turning off engine (the longer the better).
7. Enjoy your fresh clean car.
