

HIGH LEVELS

MEDIUM LEVELS

LOW LEVELS

## Application Sites

On low levels, place the trap on the ground. For medium levels, hang the traps along fence lines, near calf hutches and on walls. For high levels, hang the traps from the ceiling out of reach of people and livestock.

## Fly Traps and Attractants For Multiple Levels

Starbar® fly traps and attractants are used across the **low** (Bite Free™ Stable Fly Trap), **medium** (Captivator® Fly Trap, Fly Terminator® Pro Fly Trap, Fly Trap Attractant Refill, FlyRelief™ Disposable Fly Trap, Milk Jugg™ Trap and Trap 'N Toss™ Disposable Fly Trap) and **high** (EZ Trap® Fly Trap, Lure Fly™ Fly Catchers, Fly Stik™ Sticky Fly Trap) levels of your operation.

Each trap is designed to address the specific behavior of the fly at each level. That's targeted fly control based on science.

## Insect Control Starts with Starbar

Insects on your operation are a nuisance to you and your employees, but they also pose a threat to your animals and property, causing significant economic losses. That's why it is so important to set the bar for insect control using Starbar® products.

Homes, small farms and commercial operations have trusted Starbar® products to control insects for more than 40 years. As an industry leader, Starbar has a mission to provide effective pest control solutions.

**With Starbar® products, you'll be equipped to set the bar at every level.**

A HIGHER LEVEL OF CONTROL

With Starbar® fly traps and attractants, you can set the bar for fly control at the **low, medium, and high levels** of your operation. You can count on the precise design of each trap to provide effective control.

For more information on setting the bar for insect control at other levels of your operation, visit [StarbarProducts.com](http://StarbarProducts.com) or contact a Central Life Sciences representative at 1-800-347-8272.

Starbar makes two kinds of traps: traps with chemical attractants, and traps that utilize bright colors to attract flies. Chemical attractants entice flies while they are looking to mate between the ground level and the ceiling. Bright colors attract flies to land when they are looking for a place to rest up high.

## Fly Trap Attractant Refill

An exclusive formula containing four different attractants flies can't resist, conveniently placed in a water soluble pouch format. It can be used with Fly Terminator® Pro, Captivator® Fly Trap and other reusable water-based traps. Each package contains eight 30 gm. water soluble pouches.
