

SureKill[®] Brand

Assault[®] Blocks

KILLS RATS AND MICE*

All Weather Bait

Kills Norway rats, Roof rats, Cotton rats*, Polynesian rats*, House Mice, Deer Mice, Oldfield Mice, White-footed Mice, Cotton Mice, Eastern harvest mice*, Golden mice*, Meadow voles*

Palatable to *Peromyscus* species Deer mice, Oldfield Mice, White-Footed Mice
This product is effective against anticoagulant-resistant Norway Rats, Roof Rats, and House Mice.

Moisture Resistant • Weather Resistant

This product may only be used inside and within 100 feet of man-made structures or inside of transport vehicles (ships, trains, or aircraft).

This Product May not Be Sold or Distributed in Packaging that Holds Less Than 4 Pounds of Bait.

Active Ingredient:

Bromethalin (CAS No: 63333-35-7):.....0.01%

Other Ingredients:..... 99.99%

Total.....100.00%

EPA Reg. No. 61282-75

EPA Est. No. 61282-WI-01

Item No. 112831

BK220498-1021

*Not permitted for use against the following species in California: Cotton rat, Polynesian rat, White-throated woodrat, Southern plains woodrat, Mexican woodrat, Eastern harvest mouse, Golden mouse, Meadow vole

**KEEP OUT OF REACH OF
CHILDREN
CAUTION**

See back panel and inside leaflet for First Aid and Precautionary Statements

Net Contents: 128 x 0.5 oz. (14 g)

Net Weight: 4 lbs. (1.81 kg)

Image may not be representative of a label-consistent bait placement.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Harmful if swallowed or absorbed through the skin. Causes moderate eye irritation. Keep away from children, domestic animals, and pets. Do not get in eyes, on skin, or on clothing. All handlers (including applicators) must wear long-sleeved shirt and barrier laminate gloves. Any person who retrieves carcasses or unused bait following application of this product must wear barrier laminate gloves.

User Safety Requirements

Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry. Remove PPE immediately after handling this product. Wash the outside of barrier laminate gloves before removing them. As soon as possible, wash hands thoroughly after applying the bait and before eating, drinking, chewing gum, using tobacco or using the toilet and change into clean clothing.

ENVIRONMENTAL HAZARDS

This product is extremely toxic to mammals and birds. Dogs and scavenging mammals and birds might be poisoned if they feed upon animals that have eaten this bait. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Runoff may also be hazardous to aquatic organisms in water adjacent to treated areas. Do not contaminate water when disposing of equipment wash water or rinsate.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

READ THIS LABEL: Read this entire label and follow all use directions and use precautions. Use only for the sites, pests, and application methods described on this label.

IMPORTANT: Do not expose children, pets or other non-target animals to rodenticides. To help to prevent accidents:

1. Store product not in use in a location out of reach of children and pets.
2. Apply bait in locations out of the reach of children, pets, domestic animals and non-target wildlife, or in tamper-resistant bait stations. These stations must be resistant to destruction by dogs and by children under six years of age, and must be used in a manner that prevents such children from reaching into bait compartments and obtaining bait. If bait can be shaken from stations when they are lifted, units must be secured or otherwise immobilized. Even stronger bait stations are needed in areas open to hoofed livestock, raccoons, bears, or other potentially destructive animals, or in areas prone to vandalism.
3. Dispose of product container, and unused, spoiled, and unconsumed bait as specified on this label.

Bait stations are mandatory for outdoor, above-ground use. Tamper-resistant bait stations must be used wherever children, pets, non-target mammals, or birds may have access to the bait placement location.

USE RESTRICTIONS:

This product can only be used to control the following rodent pests in and around man-made structures: House mouse (*Mus musculus*), Norway rat (*Rattus norvegicus*), Roof rat (*Rattus rattus*), Cotton rat (*Sigmodon hispidus*)*, Eastern harvest mouse (*Reithrodontomys humuli*)*, Golden mouse (*Ochrotomys nuttalli*)*, Deer mouse (*Peromyscus maniculatus*), Oldfield Mouse (*Peromyscus polionotus*, except for threatened or endangered subspecies), White-footed mouse (*Peromyscus leucopus*), Cotton mouse (*Peromyscus gossypinus*), Polynesian rat (*Rattus exulans*)*, and Meadow vole (*Microtus pennsylvanicus*)*. This product must only be used in and within 100 feet of man-made structures constructed in a manner so as to be vulnerable to commensal rodent invasions and/or to harboring or attracting rodent infestations. Examples of such structures include homes and other permanent or temporary residences, food processing facilities, industrial and commercial buildings, trash receptacles, agricultural and public buildings, transport vehicles, (ships, trains, aircraft), docks and port or terminal buildings, and related structures around and associated with these sites.

- Fence and perimeter baiting, beyond 100 feet from a structure as defined above, is prohibited.
- Do not apply this product directly to food or feed crops.
- Do not use this product in sewers.
- Do not broadcast bait.
- Do not place bait near or inside of ventilation duct openings.
- Do not contaminate water, food, feed, food- or feed-handling equipment, milk- or meat-handling equipment, or surfaces that come into direct contact with food. When used in USDA-inspected facilities, this product must be applied in tamper-resistant bait stations.
- Do not use this product in areas of Alabama and Florida that are occupied by threatened or endangered subspecies of the Oldfield mouse.

Burrow baiting with SureKill Brand Assault Blocks is prohibited.

Do not sell this product in individual containers holding less than four (4) pounds of bait.

SELECTION OF TREATMENT AREAS: Determine areas where rats, mice or meadow voles* will most likely find and consume the bait. Generally, these areas are along walls, by gnawed openings, in corners and concealed places, between floors and walls, or in locations where signs of these rodents have been seen. Protect bait from rain or snow. Remove as much alternative food as possible.

APPLICATION DIRECTIONS

The active ingredient in this product is different from anticoagulant rodenticides. Norway rats, roof rats and house mice cease feeding after consuming a toxic dose.

Rats*: Apply 2 to 12 SureKill Brand Assault Blocks. Space placements at intervals of 15 to 30 feet in infested areas. Maintain an uninterrupted supply of fresh bait for at least 10 days or until there no longer are signs of new feeding by rats.

Mice and Meadow Voles*: Apply 1 to 2 SureKill Brand Assault Blocks at each placement location. Space placements at 8- to 12-foot intervals. Larger placements (up to 2 ounces) may be needed at points of very high house mouse activity. Maintain an uninterrupted supply of fresh bait for at least 15 days or until there are no longer signs of new feeding by house mice or meadow voles*.

Follow-Up: Adjust the amount of bait applied to the level of feeding expected at each bait placement location. Highest bait consumption is expected to occur on the first day or two after treatment. After several days, inspect bait placements and replenish bait at sites where there is heavy feeding or where there is continued evidence of rat, mouse or meadow vole* activity. Maintain baiting for at least one week or until there no longer are fresh signs of rat, mouse or meadow vole* activity or it becomes clear that the remaining rats, mice or meadow voles* are not attracted to the bait.

Wearing barrier laminate gloves, collect and properly dispose of all dead rodents and leftover bait. To discourage reinfestation, limit sources of food, water, and harborage as much as possible. If reinfestation does occur, repeat treatment. Where a continuous source of infestation is present, establish permanent bait stations and replenish them as needed.

***Not permitted for use against the following species in California: Cotton rat, Eastern harvest mouse, Golden mouse, Polynesian rat, White-throated woodrat, Southern plains woodrat, Mexican woodrat, Meadow vole.**
