

FLOCK FREE SURFACE PRO TACK

SURFACE PROTECTANT

DRIES TACKY • STAYS TACKY • NO TRANSFER

DIRECTIONS FOR USE:

1. Clean surface of dust, dirt, etc.
2. Apply 3 coats of Flock Free Surface Pro Tack allowing 1 minute in between applications.

FOR BEST RESULTS:

1. Use adhesive paint brush or paint roller to apply product.
2. Apply product on dry surfaces.
3. Apply in even, thin layers.
4. Areas exposed to extreme outdoor weather or very dusty interior applications may require yearly touch-up application.
5. Only apply when temps are above 40 degrees Fahrenheit.
6. For optimal results, apply Flock Free UV paint dots to the surface and let dry before using Surface Pro Tack.

NET CONTENTS: 32oz

HOW IT WORKS:

Flock Free Surface Pro Tack is a liquid plastic that dries tacky and stays tacky. The product is heat resistant, cold resistant & water resistant. When the product gets wet it will temporarily lose its tackiness, yet when it dries it becomes tacky again. Product will remain tacky in cold temps, but once below 10 degrees Fahrenheit it may lose some of its efficacy. Once temps increase it will become tacky again.

Flock Free Surface Pro Tack provides a tacky surface that is pressure sensitive. There is NO transfer once the product dries, so if you place your hand on a surface it will feel sticky but nothing will rub off onto your hands, clothing or anything else that comes in contact with it.
