PHYSICAL & CHEMICAL HAZARDS

For indoor or outdoor use as either a crack and crevice injection or spot treatment. Use this product with the supplied actuator or injection tube; this product can also be used in aerosol application equipment.

Application Restrictions:

- Do not contact treated surfaces until dry. People and pets may re-enter after the treated area is dry.
- Do not apply in food/feed areas of food and feed handling establishments.
- Do not apply in classrooms, hospital, and/or nursing home rooms while they are occupied.
- Do not treat areas of furniture or upholstered where prolonged contact with humans will occur.
- Do not spray bed linens or other materials which come in direct contact with occupant of the bed.
- In the home, cover or thoroughly wash all food processing surfaces and utensils following treatment. Cover exposed food or remove from area being treated.
- Do not apply directly to impervious horizontal surfaces such as sidewalks, driveways, and patios except as a spot or crack and crevice treatment. During application, do not permit pedestrians to enter or run off into storm drains, drainage ditches, gutters, or surface waters.
- All outdoor applications must be limited to spot or crack and crevice treatments only.
- Do not apply this product, by any application method, to linseed, basswood, or other Tilia species.
- Apply when pests are seen or found. Reapply every 7 to 10 days until infestation is eliminated.

Crack and crevice treatment: Inject into cracks and crevices or void spaces where insects may be harboring, living, and breeding. Place injector tip into cracks, crevices, holes, and other small openings. In light infestations or maintenance treatments, move the injection tube along cracks and crevices at the rate of 1 line foot per second. For heavy infestations or clean-out treatments, move the injection tube along cracks and crevices at the rate of 6 inches per second. In enclosed void spaces, after calculating the void’s cubic area, apply at a rate of 2 seconds per cubic feet. Several holes may be required in long-running voids.

Spots: Treat with the supplied actuator or injection tube. In light infestations or maintenance treatments, move the injection tube along cracks and crevices at the rate of 1 line foot per second. For heavy infestations or clean-out treatments, move the injection tube along cracks and crevices at the rate of 6 inches per second. In enclosed void spaces, after calculating the void’s cubic area, apply at a rate of 2 seconds per cubic feet. Several holes may be required in long-running voids.

Other related pests:

- Ants (excluding fire ants)
- Bed bugs
- Spiders

IMPORTANT: READ BEFORE USE

Keep out of reach of children.

STOP - Read the label before use. Calls your local solid waste agency for disposal information.
