Supplemental Label

Prevention and/or control of wood-infesting pests

This supplemental label expires September 24, 2017, and must not be used or distributed after this date.

Active Ingredient:
fipronil: 5-amino-1-(2,6-dichloro-4-(trifluoromethyl)phenyl)-4-((1,R,S)-(trifluoromethyl)sulfinyl)-1H-pyrazole-3-carbonitrile .......................................................... 9.1%
Other Ingredients: .................................................................................................................................................. 90.9%
Total: .................................................................................................................................................................. 100.0%

One gallon of Termidor® SC Termiticide/Insecticide contains 0.8 lb of fipronil.

EPA Reg. No. 7969-210

Directions For Use

- It is a violation of federal law to use this product in a manner inconsistent with its labeling.
- The supplemental labeling and the entire Termidor® SC Termiticide/Insecticide container label, EPA Reg. No. 7969-210 must be in possession of the user at the time of application.
- Read the label affixed to the container for Termidor SC before applying.
- Use of Termidor SC according to this labeling is subject to the use precautions and limitations imposed by the label affixed to the container for Termidor SC.

Use Directions

Above Ground Termites and Carpenter Ants in Localized Areas

For prevention and/or control of above ground termites and carpenter ants in localized areas, apply 0.06% Termidor SC finished dilution (or foam) to:

- Voids and galleries in damaged wood, in spaces between wooden structural members, and between the sill plate and foundation where wood is vulnerable. Applications may also be made to inaccessible areas by drilling and injecting into the structural voids or damaged wood.
- Termite carton nests in structural voids. Application at multiple injection points to varying depths may be necessary. Carton nest material may be removed from structural voids.
- Man-made voids using a coarse fan application or foam to control exposed worker and winged reproductive forms of termites or carpenter ants

Termites or Carpenter Ants in Trees or Nonstructural Wood or Wood-to-soil Contacts

- For prevention and/or control of existing or future infestations of termites or carpenter ants in decking and fencing materials, landscape timbers and similar nonstructural wood-to-soil contacts, trees, and utility poles, apply 0.06% Termidor SC finished dilution (or foam) by the following methods.
- If possible, locate and treat the interior infested cavity by injection.
- Nonstructural wood-to-soil contacts may be treated as a spot application or continuous treated zone. Apply Termidor SC to the soil as a drench or by rodding around the base of the points of soil contact. Rod holes must be placed 3-inches away from soil contact points and spaced no more than 12-inches apart along the perimeter of soil contact points.

BASF Corporation
26 Davis Drive, Research Triangle Park, NC 27709
For small poles or posts (i.e., less than 6 inches in diameter), apply 1 gallon of Termidor® SC Termiticide/Insecticide finished dilution per foot of depth. For larger poles or posts, apply 4 gallons of Termidor SC finished dilution per 10 linear feet per foot of depth.

**Termite Carton Nests in Trees**

For control of termite carton nests in trees, inject 0.06%, 0.09%, or 0.125% Termidor SC finished dilution (or foam). Application to multiple injection points to varying depths may be necessary. Carton nest material may be removed from tree(s). An application of the Termidor SC finished dilution may be applied to soil as a drench or by rodding around the root flare of the tree to prevent reinestation by termites from the soil. For small trees, (i.e., less than or equal to 6 inches in diameter), apply 1 gallon of Termidor SC finished dilution. For larger trees, apply 4 gallons of Termidor SC finished dilution per 10 linear feet measured as the circumference at the root flare.

**Drywood Termites and Wood-infesting Beetles or Borers**

Drywood termite and wood-infesting beetle or borer uses not registered in California.

NOTE: Before treatment, turn off any air circulation system that moves air from area(s) to be treated to an untreated interior space of the structure until application has been completed and sprays have dried.

Treat galleries in structural and/or nonstructural elements and structural voids with 0.06% Termidor SC finished dilution using a foam, low-pressure spray (25 PSI or less at the nozzle), or mist.

- Locate galleries using visual signs (e.g., blistered wood, emergence or clean out holes, frass, or pellets), the presence of live insects, mechanical sounding techniques, or listening devices (e.g., acoustic emission detectors, stethoscopes).
- Drill holes to penetrate the gallery system for treatment; distribute drill holes to adequately cover the gallery system.
- It is not necessary to treat to the point where runoff is detected from adjacent holes.
- **DO NOT** apply where electrical shock hazards exist.
- Drill holes must be sealed after treatment.

**Carpenter Bees in Localized Areas**

Carpenter bee use in localized areas not registered in California.

For control of carpenter bees in localized areas, apply 0.06% Termidor SC finished dilution (as a spray, mist, or foam) directly into gallery entrance holes. After application, gallery entrance holes should be plugged.
Conditions of Sale and Warranty

The Directions For Use of this product reflect the opinion of experts based on field use and tests. The directions are believed to be reliable and must be followed carefully. However, it is impossible to eliminate all risks inherently associated with the use of this product. Ineffectiveness or other unintended consequences may result because of such factors as weather conditions, presence of other materials, or use of the product in a manner inconsistent with its labeling, all of which are beyond the control of BASF CORPORATION ("BASF") or the Seller. To the extent consistent with applicable law, all such risks shall be assumed by the Buyer.

BASF warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes referred to in the Directions For Use, subject to the inherent risks, referred to above.

TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, BASF MAKES NO OTHER EXPRESS OR IMPLIED WARRANTY OF FITNESS OR MERCHANTABILITY OR ANY OTHER EXPRESS OR IMPLIED WARRANTY.

TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, BUYER’S EXCLUSIVE REMEDY AND BASF’S EXCLUSIVE LIABILITY, WHETHER IN CONTRACT, TORT, NEGLIGENCE, STRICT LIABILITY, OR OTHERWISE, SHALL BE LIMITED TO REPAYMENT OF THE PURCHASE PRICE OF THE PRODUCT.

TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, BASF AND THE SELLER DISCLAIM ANY LIABILITY FOR CONSEQUENTIAL, EXEMPLARY, SPECIAL OR INDIRECT DAMAGES RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT.

BASF and the Seller offer this product, and the Buyer and User accept it, subject to the foregoing Conditions of Sale and Warranty which may be varied only by agreement in writing signed by a duly authorized representative of BASF.

NOTICE TO BUYER

Purchase of this material does not confer any rights under BASF’s patents relating to this product. Termidor® termicide is specially formulated and sold by BASF for the control of termites according to the directions on this label. The purchaser agrees to employ the purchased quantity of Termidor® termicide only for the specified uses. Uses of Termidor® termicide other than those specified on this label are not licensed through the purchase of this product. The use of this product for other purposes may violate patent rights of BASF. The purchaser assumes all risks as to the patents of others.
