STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage and disposal. **STORAGE:** Store in a cool dry place. Do not store where children or animals may gain access. **PESTICIDE DISPOSAL AND CONTAINER HANDLING:** Non-refillable container. Do not reuse or refill this container. **If empty:** Place in trash or offer for recycling if available. **If partly filled:** Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

ATTENTION: This product can expose you to chemicals including Abamectin, which is known to the State of California to cause birth defects or other reproductive harm. For more information go to www.P65Warnings.ca.gov

TERRO®

Ant & Roach Baits

EPA Reg. No. 149-21
EPA Est. No.
47629-PA-001 (1)
91498-PA-001 (M)
Circled letter is first letter of lot number

PRECUTIONARY STATEMENTS
CAUTION: Causes moderate eye irritation. Avoid contact with skin, eyes or clothing. Wash hands thoroughly with soap and water after use and before eating, drinking, chewing gum, using tobacco, or using the toilet.

FIRST AID

If in Eyes:	- Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first five minutes, then continue rinsing eye. - Call a poison control center or doctor for treatment advice.
--------------------	---

Have the product or label with you when calling a Poison Control Center or doctor or going for treatment. In case of emergency, for additional information call 800 858 7378.

ENVIRONMENTAL HAZARDS
To protect the environment, do not allow bait to enter or run off into storm drains, drainage ditches, gutters or surface waters.

HOW IT WORKS
Ants, roaches and silverfish will enter the pre-filled station to feed on the bait. An ant's anatomy allows for effective transport and consumption of liquids. Ants will come in large numbers at first, but will soon disappear. The liquid bait is specifically formulated to allow worker ants to consume the product and survive long enough to carry the bait to the nest and deliver a dose to the rest of the colony.

DIRECTIONS FOR USE
It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

DO NOT USE in edible product areas or food handling establishments, restaurants or other areas where food is commercially prepared or processed. Do not use in serving areas while food is exposed. Avoid contamination of feed and foodstuffs. Place bait in areas inaccessible to children and pets.

FOR USE IN AND AROUND: Homes

ATTRACTS AND KILLS: Ants: Acrobat, Allegheny, Argentine, Big headed, Cornfield, Crazy, Ghost, Little black, Odorous house, Pavement, Pyramid, Thief, White footed, and other sweet eating ants. **Others:** Roaches, Silverfish

USING TERRO® ANT & ROACH BAITS: Remove other sources of food, like crumbs, sugar, and grease spots. Do not place bait stations where insecticide has recently been sprayed, as listed pests may avoid the bait stations. Common areas to place bait stations include along baseboards, in corners of rooms and cabinets, on countertops, under and behind appliances, under sinks, around pipes and water sources, in pantry, on window sills and around doorways, near garbage cans, and along ant trails.

1. Hold bait station firmly with bait pack tab facing up. Break off the bait pack tab being careful to not spill the bait.
2. Place bait station on flat surface near where listed pests or their signs have been seen. Place additional bait stations anywhere ants, roaches, and silverfish may enter your home. Heavily infested areas may require additional bait stations. For best results, use all bait stations to ensure sufficient supply for the listed pests.
3. Monitor placements regularly but do not interfere with the listed pests or bait stations. Replace when bait is depleted or every 3 months.

The key to successful baiting is to ensure there is always a sufficient supply of TERRO® bait when listed pests are present.

*except fire ants, pharaoh ants, carpenter ants, and harvester ants

Consulte dentro las instrucciones, las precauciones y los primeros auxilios.

ENUNCIADOS DE PRECAUCIÓN

Peligro para los seres humanos y los animales domésticos

PRECAUCIÓN: Causa irritación moderada en los ojos. Evite el contacto con los ojos, la piel o la ropa. Lávese las manos muy bien con agua y jabón después de manipular el producto y antes de comer, beber, usar goma de mascar, tabaco o el inodoro.

PRIMEROS AUXILIOS

Si entra en contacto con los ojos:	- Mantenga los ojos abiertos y enjuague de forma lenta y suave con agua durante 15 o 20 minutos. - Retire los lentes de contacto, si los tuviera, después de los primeros 5 minutos y continúe enjuagando los ojos. - Llame a un centro de control de envenenamiento o a un médico para que le recomiende un tratamiento.
---	---

Lleve consigo el envase o la etiqueta del producto cuando llame a un centro de control de envenenamiento o a un médico o vaya a recibir tratamiento. En caso de emergencia, llame al 800 858 7378 para obtener información adicional.

RIESGOS PARA EL AMBIENTE:

Para proteger el ambiente, no permita que el cebo ingrese ni se desplace hacia desagües pluviales, zanjas de drenaje, canaletas o aguas superficiales.

CÓMO FUNCIONA:

Las hormigas,* cucarachas y lepismas entrarán a la estación para alimentarse del cebo. La anatomía de las hormigas* permite el transporte efectivo y el consumo de líquidos. Las hormigas* vendrán en grandes cantidades al principio, pero desaparecerán rápidamente. El cebo líquido está específicamente formulado para permitir que las hormigas trabajadoras* consuman el producto y sobrevivan lo suficiente para transportar el cebo al nido y entregar una dosis al resto de la colonia.

INSTRUCCIONES DE USO

Constituye violación de la Ley Federal utilizar este producto de una manera distinta a la estipulada en la etiqueta.

NO USE en áreas de productos comestibles de establecimientos que manipulen alimentos, restaurantes u otras áreas donde se preparan o procesan alimentos para uso comercial. No utilice en áreas para servir donde haya alimentos expuestos. Evite la contaminación del forraje y los productos alimenticios. Coloque el cebo en áreas inaccesibles a los niños y las mascotas.

PARA USO DENTRO Y ALREDEDOR DE: Hogares

ATRAE Y MATA: Hormigas: Acróbatas, de Allegheny, argentinas, cabezonas, de maizales, locas, fantasmas, negras pequeñas, olorosas de casas, del pavimento, pirámides, ladronas, patas blancas y otras hormigas que se alimentan de dulces* **Otros:** cucarachas, lepismas.

USO DE ESTACIONES DOBLES DE CEBO TERRO®: Retire todas las otras fuentes de alimento, tales como migajas, azúcar y manchas de grasa. No coloque las estaciones de cebo donde haya rociado el insecticida recientemente, ya que las plagas indicadas pueden evitar las estaciones de cebo. Las áreas comunes para colocar las estaciones de cebo incluyen los zócalos, las esquinas de habitaciones y gabinetes, encimeras, debajo y detrás de electrodomésticos, debajo del fregadero, alrededor de tubos y fuentes de agua, en la despensa, en alféizares y alrededor de las entradas, cerca de recipientes de desechos y por los senderos donde transitan las hormigas*.

1. Sostenga firmemente la estación de cebo con la pestaña del paquete del cebo orientada hacia arriba. Rompa la pestaña del paquete del cebo teniendo cuidado de no derramarlo.
2. Coloque la estación de cebo en una superficie plana cerca de donde haya observado las plagas indicadas o sus indicios. Coloque estaciones de cebo adicionales dondequiera que puedan ingresar a su hogar las hormigas*, cucarachas y lepismas. Las áreas intensamente infestadas pueden requerir mayor cantidad de estaciones de cebo. Para mejores resultados, utilice todas las estaciones de cebo para garantizar un suministro suficiente para las plagas indicadas.
3. Monitoree los lugares periódicamente pero no interfiera con las plagas indicadas ni con las estaciones de cebo. Reemplace las estaciones cuando el cebo se haya consumido o cada 3 meses.

La clave para tener éxito es garantizar que siempre exista suficiente suministro de cebo cuando las plagas indicadas estén presentes.

*salvo las hormigas de fuego, las faraonas, carpinteras y las cosechadoras

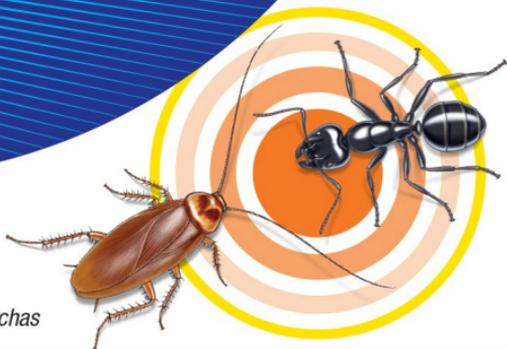

ALMACENAJE Y DESECHO

No contamine el agua, los alimentos ni el forraje al almacenar o desechar.
ALMACENAMIENTO: Almacene en un lugar fresco y seco. No almacene donde los niños o los animales puedan tener acceso. **DESECHO DEL PESTICIDA Y MANIPULACIÓN DEL ENVASE:** Envase no rellenable. No reutilice ni rellene este envase. **Si está vacío:** Colóquelo en la basura u ofrézcalo para reciclaje si está disponible. **Si está parcialmente lleno:** Llame a la agencia de desechos sólidos local para las instrucciones de desecho. Nunca vierta el producto sin usar en un desagüe de interiores o exteriores.

TERRO®

Ant & Roach Baits

Cebo para hormigas y cucarachas

Two baits in one station
Eliminates the need for multiple products
Highly effective on ants*, cockroaches and silverfish

PRECAUTIONARY STATEMENTS

Hazards to Humans and Domestic Animals
