DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

FOR USE IN AND AROUND: Homes, Hospitals, Restaurants, Apartments, Grocery Stores, Institutional Buildings, Schools, Cafeterias, Warehouses, Storage Areas, Food Processing Plants, Mobile Homes, Boats, Military Bases, Theaters, Nursing Homes and on Military, Commercial and Cruise Ships.

ATTRACTS AND KILLS ALL COMMON HOUSEHOLD ANTS INCLUDING: Argentine ants, Ghost ants, Cornfield ants, Pavement ants, Acrobat ants, White-footed ants, Little black ants, Odorous house ants, Crazy ants, Big-headed ants and other sweet-eating ants.

DO NOT USE in edible product areas of food-handling establishments, restaurants or other areas where food is commercially prepared or processed. Do not use in serving areas while food is exposed. Avoid contamination of feed and foodstuffs. Place bait in areas inaccessible to children and pets.

PEST CONTROL OPERATORS: TERRO®-PCO Liquid Ant Killer can be diluted with water to obtain a 1% or 2% solution of Borax. Such a dilution is helpful when you plan on using a substantial volume of TERRO®-PCO Liquid Ant Killer in a baiting program designed to control very large multi-queen and multi-colony ant infestations. In these cases, you want the worker ants to carry as much volume of bait back to the colony as possible. To do this, you can dilute TERRO®-PCO Liquid Ant Killer to obtain a 1.0% Borax level. Upon a follow-up inspection, if ants still exist in great numbers, repeat initial treatment using a 2.0% solution. Once the ant infestation has improved dramatically, no dilution of the bait is recommended for follow-up treatments.
