Revision Date 03/12/2024

## SECTION 1: Identification of the substance/mixture and of the company/undertaking

#### 1.1 Product identifier

VAPORPH3OS® PHOSPHINE FUMIGANT Trade name

FIFRA Registration number 68387-8

### 1.2 Relevant identified uses of the substance or mixture and uses advised against

#### Uses of the Substance / Mixture

- Fumigant

#### 1.3 Details of the supplier of the safety data sheet

#### Company

CYTEC INDUSTRIES INC. **504 CARNEGIE CENTER** PRINCETON, NJ 08540 USA

#### Local contact

+800-438-5615: +888-298-3272

### 1.4 Emergency telephone

FOR EMERGENCIES INVOLVING A SPILL, LEAK, FIRE, EXPOSURE OR ACCIDENT, CONTACT CHEMTREC (24-Hour Number): +1-800-424-9300 within the United States and Canada, or +1-703-527-3887 for international collect calls.

## **Disclaimer**

The ® indicates a Registered Trademark in the United States and the ™ indicates a trademark in the United States. The mark may also be registered, subject of an application for registration, or a trademark in other countries.

## **SECTION 2: Hazards identification**

Although OSHA has not adopted the environmental portion of the GHS regulations, this document may include information on environmental effects.

## 2.1 Classification of the substance or mixture

#### HCS 2012 (29 CFR 1910.1200)

H220: Extremely flammable gas. Flammable gases, Category 1 Gases under pressure, Liquefied gas H280: Contains gas under pressure; may explode if heated.

H250: Catches fire spontaneously if exposed to air. Pyrophoric gas

Acute toxicity, Category 1 H330: Fatal if inhaled.

Skin corrosion, Category 1B H314: Causes severe skin burns and eye damage.

Serious eye damage, Category 1 H318: Causes serious eye damage.

Revision Date 03/12/2024

#### 2.2 Label elements

## HCS 2012 (29 CFR 1910.1200)

#### **Pictogram**

## **Signal Word**

- Danger

### **Hazard Statements**

- H220 Extremely flammable gas.

- H250 Catches fire spontaneously if exposed to air.

H280 Contains gas under pressure; may explode if heated.

H314 Causes severe skin burns and eye damage.

H330 Fatal if inhaled.

### **Precautionary Statements**

#### Prevention

P210 Keep away from heat/ sparks/ open flames/ hot surfaces. No smoking.

P260 Do not breathe gas.

- P264 Wash skin thoroughly after handling.

- P271 Use only outdoors or in a well-ventilated area.

P280 Wear protective gloves/ protective clothing/ eye protection/ face protection.

- P284 Wear respiratory protection.

#### Response

- P301 + P330 + P331 IF SWALLOWED: Rinse mouth. Do NOT induce vomiting.

- P303 + P361 + P353 IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with

water/ shower.

- P304 + P340 + P310 IF INHALED: Remove person to fresh air and keep comfortable for breathing.

Immediately call a POISON CENTER/ doctor.

- P305 + P351 + P338 + P310 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if

present and easy to do. Continue rinsing. Immediately call a POISON CENTER/ doctor.

- P363 Wash contaminated clothing before reuse.

- P377 Leaking gas fire: Do not extinguish, unless leak can be stopped safely.

P381 Eliminate all ignition sources if safe to do so.

#### <u>Storage</u>

- P403 + P233 Store in a well-ventilated place. Keep container tightly closed.

- P405 Store locked up.

P410 + P403 Protect from sunlight. Store in a well-ventilated place.

### Disposal

P501 Dispose of contents/ container to an approved waste disposal plant.

## 2.3 Other hazards which do not result in classification

- H400: Very toxic to aquatic life.
- Phosphine gas may react with certain metals and cause corrosion, especially at higher temperatures and relative humidity.

Revision Date 03/12/2024

## **SECTION 3: Composition/information on ingredients**

#### 3.1 Substance

- Chemical nature

Phosphorus trihydride (phosphine)

### **Hazardous Ingredients and Impurities**

Chemical name	Identification number CAS-No.	Concentration [%]
Phosphine	7803-51-2	> 97

The specific chemical identity and/or exact percentage (concentration) of composition has been withheld as a trade secret.

#### 3.2 Mixture

- Not applicable, this product is a substance.

#### **SECTION 4: First aid measures**

## 4.1 Description of first-aid measures

#### In case of inhalation

- Quickly move the person away from the contaminated area. Make the affected person rest.
- Immediate medical attention is required.
- Show this sheet to the doctor.
- If person is not breathing, immediately call for emergency medical support then, begin cardiopulmonary resuscitation. For artificial respiration, use a bag-valve-mask device. If artificial respiration is not possible due to physical or psychological reasons, start only heart massage as soon as possible.
- Rescuers within the areas of potentially unsafe levels of this product (the "HOT ZONE") should employ appropriate personal protective equipment such as SCBA during the rescue of the victim.

### In case of skin contact

- Take off contaminated clothing and shoes immediately.
- Immediately flush skin with large amounts of water.
- Immediate medical attention is required.

### In case of eye contact

- Rinse immediately with plenty of water, also under the eyelids, for at least 15 minutes.
- Keep eye wide open while rinsing.
- Show this sheet to the doctor.
- Always obtain medical advice, even if there are no symptoms.

## In case of ingestion

Not applicable

## 4.2 Most important symptoms and effects, both acute and delayed

#### In case of inhalation

#### **Symptoms**

- Fatigue
- discomfort in the chest

#### **Effects**

- Serious effects on health can appear after exposure.
- The effects will depend on target organs.
- In case of inhalation, irritation/corrosion of the respiratory tract.
- Risk of respiratory disorder

PRCO90072882

Revision Date 03/12/2024

- May cause irreversible skin damage.
- Chronic exposure may cause dermatitis.
- May cause irreversible eye damage.

# **Symptoms**

- Weakness
- Vomiting
- chest pain
- Diarrhea
- Difficulty in breathing

## **Symptoms**

- Symptoms will depend on the target organs.
- Inhalation may provoke the following symptoms:
- Cough
- Breathing difficulties
- Irritation
- Redness
- Swelling of tissue
- May cause respiratory tract irritation.
- Dermatitis
- Causes skin burns.
- Lachrymation
- Conjunctivitis
- Causes eye burns.

#### **Symptoms**

- pulmonary edema
- Dizziness
- Cyanosis
- Unconsciousness

## 4.3 Indication of any immediate medical attention and special treatment needed

### Notes to physician

- If breathed in, move person into fresh air.
- Be aware to maintain life support if necessary.
- Immediate medical attention is required.
- Consult with an ophthalmologist immediately in all cases.
- Burns must be treated by a physician.
- Treat symptomatically.
- Contact a poison control center.
- Keep under medical supervision for at least 48 hours.

### **SECTION 5: Firefighting measures**

<u>Flash point</u> Pyrophoric

<u>Autoignition temperature</u> The substance or mixture is pyrophoric.

Flammability / Explosive limit Lower flammability/explosion limit: 1.80 %(V)

Upper flammability/explosion limit: 98.00 %(V)

## 5.1 Extinguishing media

PRCO90072882

Revision Date 03/12/2024

#### Suitable extinguishing media

- Use extinguishing measures that are appropriate to local circumstances and the surrounding environment.

## 5.2 Special hazards arising from the substance or mixture

- Highly flammable
- Dense white fumes are given off that may obscure the area.
- On combustion, forms:
- Toxic and highly flammable gases are released, which increase fire / explosion hazards.
- In the presence of water, forms acidic solutions.

## 5.3 Advice for firefighters

### Special protective equipment for fire-fighters

- Wear full protective clothing and self-contained breathing apparatus.

### Specific fire fighting methods

- Cool containers/tanks with water spray.
- Evacuate personnel to safe areas.
- Remove undamaged containers from fire area if it is safe to do so.

#### **Further information**

- Control the use of water due to environmental risk (see section 6).

## **SECTION 6: Accidental release measures**

#### 6.1 Personal precautions, protective equipment and emergency procedures

- Do not breathe gas.
- Wear self-contained breathing apparatus and protective suit.
- If spillage occurs on the public highway, indicate the danger and notify the authorities (police, fire service).
- Evacuate personnel to safe areas.
- Remove all sources of ignition.
- Only qualified personnel equipped with suitable protective equipment may intervene.
- Avoid contact with the skin and the eyes.
- Do NOT approach from DOWNWIND.
- Stop the leak as quickly as possible (using non-sparking tools).
- Mechanically ventilate the spillage area, whilst avoiding the formation of explosive concentrations.

#### 6.2 Environmental precautions

- Discharge into the environment must be avoided.

## 6.3 Methods and materials for containment and cleaning up

- Keep container tightly closed.
- Flammable product. Take all necessary precautions. Earth the containers and the equipment.
- Ventilate the area.

#### 6.4 Reference to other sections

- For personal protection, see section 8.
- For disposal considerations see section 13.

SYENSQO

Revision Date 03/12/2024

## **SECTION 7: Handling and storage**

## 7.1 Precautions for safe handling

- Wear protective gloves/ protective clothing/ eye protection/ face protection.
- Wash hands after handling.
- Do not breathe gas.
- The gas deadens the sense of smell. Do not depend on odor to detect presence of gas.
- Keep cylinder out of sun and away from heat.
- Keep cylinder in an upright position and protect from falling.
- Before dispensing product, purge equipment with an inert gas.
- Cylinders must be handled in accordance with industry standards for compressed gases.
- Metals such as brass, copper and other copper alloys and precious metals are susceptible to corrosion.

#### Hygiene measures

- Handle in accordance with good industrial hygiene and safety practice.
- Wash hands before breaks and at the end of workday.
- When using do not eat, drink or smoke.
- Eye wash bottles or eye wash stations in compliance with applicable standards.
- Ensure that eyewash stations and safety showers are close to the workstation location.
- Keep away from food and drink.

### 7.2 Conditions for safe storage, including any incompatibilities

#### Technical measures/Storage conditions

- Keep in properly labeled containers.
- Keep away from incompatible materials to be indicated by the manufacturer.
- Keep away from heat and sources of ignition.

## Requirements for storage rooms and vessels

## Recommended storage temperature: < 122 °F (< 50 °C)

- The building should be adequately ventilated and equipped with a continuous monitoring and alarm system.
- Keep in a dry, cool and well-ventilated place.
- Store in a fireproof area.
- Indoor storage in a separate building with no other occupancy is suitable.
- The indoor storage of toxic gases is prohibited in some jurisdictions.
- Store in upright position only.
- It is recommended that both full and used cylinders be stored outdoors in a dedicated and properly designed and labeled storage area, away from other building ventilation intakes.
- The storage of these gases in occupied spaces is not recommended.
- This area should be secured, locked and have a well-drained, firm and level surface, preferably reinforced concrete.
- To guarantee safety keep according to Storage temperature and conditions.

## 7.3 Specific end use(s)

- Contact your supplier for additional information

Revision Date 03/12/2024

## **SECTION 8: Exposure controls/personal protection**

Introductory Remarks: These recommendations provide general guidance for handling this product. Because specific work environments and material handling practices vary, safety procedures should be developed for each intended application. Assistance with selection, use and maintenance of worker protection equipment is generally available from equipment manufacturers.

#### 8.1 Control parameters

### Components with workplace occupational exposure limits

Components	Value type	Value	Basis
Phosphine	TWA	0.3 ppm 0.4 mg/m3	National Institute for Occupational Safety and Health
Phosphine	ST	1 ppm 1 mg/m3	National Institute for Occupational Safety and Health
Phosphine	TWA	0.05 ppm	American Conference of Governmental Industrial Hygienists
Phosphine	TWA	0.3 ppm 0.4 mg/m3	Occupational Safety and Health Administration - Table Z-1 Limits for Air Contaminants
Phosphine	С	0.15 ppm	American Conference of Governmental Industrial Hygienists

## NIOSH IDLH (Immediately Dangerous to Life or Health Concentrations)

Components	CAS-No.	Concentration
Phosphine	7803-51-2	50 parts per million

### 8.2 Exposure controls

## Control measures

## **Engineering measures**

- Ensure adequate ventilation.
- Apply technical measures to comply with the occupational exposure limits.
- Use a closed system process where feasible.

### Individual protection measures

## Respiratory protection

- Self-contained breathing apparatus in confined spaces/insufficient oxygen/in case of large uncontrolled emissions/in all circumstances when the mask and cartridge do not give adequate protection.
- Use only respiratory protection that conforms to international/ national standards.
- Wear a positive-pressure supplied-air respirator.
- Ingredients with workplace control parameters

#### Hand protection

- Take note of the information given by the producer concerning permeability and break through times, and of special workplace conditions (mechanical strain, duration of contact).
- Impervious gloves

SYENSQO

Revision Date 03/12/2024

### Eye protection

- Chemical resistant goggles must be worn.
- Ensure that eyewash stations and safety showers are close to the workstation location.

#### Skin and body protection

- Full protective suit
- Change working clothes after each work-shift.
- Contaminated work clothing should not be allowed out of the workplace.
- Gas is not known to be absorbed through skin.
- Steel toed safety shoes are recommended for anyone handling compressed gas cylinders.

#### Hygiene measures

- Handle in accordance with good industrial hygiene and safety practice.
- Wash hands before breaks and at the end of workday.
- When using do not eat, drink or smoke.
- Eye wash bottles or eye wash stations in compliance with applicable standards.
- Ensure that eyewash stations and safety showers are close to the workstation location.
- Keep away from food and drink.

## **SECTION 9: Physical and chemical properties**

Physical and Chemical properties here represent typical properties of this product. Contact the business area using the Product information phone number in Section 1 for its exact specifications.

### 9.1 Information on basic physical and chemical properties

Physical state gaseous

Form Liquefied gas

<u>Color</u> colorless

<u>Odor</u> garlic

Odor Threshold No data available

Melting point/freezing point Sublimes

Initial boiling point and boiling range Sublimes

Flammability (solid, gas) Pyrophoric

Flammability (liquids) Not applicable

<u>Flammability / Explosive limit</u>
<u>Lower flammability/explosion limit:</u>

1.80 %(V)

Upper flammability/explosion limit:

98.00 %(V)

<u>Flash point</u> Pyrophoric

Revision Date 03/12/2024

<u>Autoignition temperature</u> <u>Ignition temperature</u>:

100 °F (38 °C)

**Decomposition temperature** No data available

**pH** Not applicable

<u>Viscosity</u> No data available

Solubility Water solubility:

364 mg/l (68 °F (20 °C))

Partition coefficient: n-octanol/water Not applicable

Vapor pressure Not applicable

**Density** 1.17 g/cm3 ( 68 °F (20 °C))

Relative density

1.17 ( 68 °F (20 °C))

Relative vapor density

1.146 ( 68 °F (20 °C))

(Air = 1.0)

Particle characteristics No data available

Evaporation rate (Butylacetate = 1) Not applicable

9.2 Other information

Explosiveness Not explosive, In use, may form flammable/explosive vapor-air mixture.

Oxidizing properties Not considered as oxidizing.

**Self-ignition** The substance or mixture is pyrophoric.

Peroxides The substance or mixture is not classified as organic peroxide.

<u>Corrosion of Metals</u> Corrosive to copper and copper alloys.

Surface tension Not applicable

## **SECTION 10: Stability and reactivity**

#### 10.1 Reactivity

- No data available

#### 10.2 Chemical stability

Stable under recommended storage conditions.

### 10.3 Possibility of hazardous reactions

- No data available

### 10.4 Conditions to avoid

- Keep away from direct sunlight.
- Keep away from open flames, hot surfaces and sources of ignition.

#### 10.5 Incompatible materials

PRCO90072882

Revision Date 03/12/2024

- Exposure to air.
- Oxidizing agents
- dimethyl sulfoxide
- copper
- Brass
- Copper alloys
- Noble metals

#### 10.6 Hazardous decomposition products

## Hazardous decomposition products

- Oxides of phosphorus

# **SECTION 11: Toxicological information**

## 11.1 Information on toxicological effects

## **Acute toxicity**

Acute oral toxicity No data available

Acute inhalation toxicity

Phosphine LC50 - 4 h ( gas ): ca. 57 ppm - Rat , male and female

This product is classified as acute toxicity category 1

Unpublished reports

Acute dermal toxicity No data available

Acute toxicity (other routes of

administration)

No data available

Skin corrosion/irritation

Phosphine Causes burns.

Serious eye damage/eye irritation

Phosphine Corrosive

Respiratory or skin sensitization No data available

<u>Mutagenicity</u>

Genotoxicity in vitro

Phosphine Ames test

Strain: Salmonella typhimurium with and without metabolic activation

negative

Method: OECD Test Guideline 471

Unpublished reports

Genotoxicity in vivo

Phosphine Chromosome aberration test in vivo - Mouse

male Inhalation

negative Published data

PRCO90072882

Revision Date 03/12/2024

Carcinogenicity

Phosphine Rat , male and female

Inhalation

NOAEC: 0.004mg/l

Method: OECD Test Guideline 453

Highest dose tested

Animal testing did not show any carcinogenic effects.

Published data

This product does not contain any ingredient designated as probable or suspected human carcinogens by:

NTP IARC OSHA

Toxicity for reproduction and development

Toxicity to reproduction / fertility No data available

**Developmental Toxicity/Teratogenicity** 

Phosphine Rat, female, Inhalation

General Toxicity Maternal NOAEL: > 0.007 mg/l Developmental Toxicity NOAEL: > 0.007 mg/l

Method: OECD Test Guideline 414

Highest dose tested, No toxicity to reproduction, Published data

<u>STOT</u>

STOT-single exposure No data available

STOT-repeated exposure

Phosphine Routes of exposure: Inhalation

The substance or mixture is not classified as specific target organ toxicant,

repeated exposure according to GHS criteria.

Phosphine Inhalation (gas) two-year - Rat

NOAEC: 0.0042 mg/l

Method: OECD Test Guideline 453

no observed effect Published data

**Experience with human exposure** No data available

**CMR effects** 

Carcinogenicity

Phosphine Not classified as a carcinogen according to GHS criteria

Mutagenicity

Phosphine Not classified as mutagen according to GHS criteria.

Teratogenicity

Phosphine Not classified as toxic for the reproduction (development) according to GHS

criteria

Reproductive toxicity

Phosphine Not classified as toxic for the reproduction (fertility and/or development) according

to GHS criteria

PRCO90072882

Revision Date 03/12/2024

**Aspiration toxicity** 

No data available

## **SECTION 12: Ecological information**

#### 12.1 Toxicity

#### **Aquatic Compartment**

Acute toxicity to fish

Phosphine By analogy

LC50 - 96 h: - Oncorhynchus mykiss (rainbow trout)

static test

Very toxic to fish. Freshwater species

Acute toxicity to daphnia and other

aquatic invertebrates

Chronic toxicity to fish

No data available

Toxicity to aquatic plants No data available Toxicity to microorganisms

No data available

No data available

Chronic toxicity to daphnia and other aquatic invertebrates

No data available

**M-Factor** 

Acute aquatic toxicity = 100 Phosphine

(according to the Globally Harmonized System (GHS))

12.2 Persistence and degradability

**Abiotic degradation** 

Physical- and photo-chemical

elimination

No data available No data available

**Biodegradation** 

**Biodegradability** 

Phosphine Not applicable, inorganic substance

12.3 Bioaccumulative potential

Partition coefficient: n-octanol/water

Phosphine Not applicable, inorganic substance

**Bioconcentration factor (BCF)** No data available

12.4 Mobility in soil

Adsorption potential (Koc) No data available

Revision Date 03/12/2024

Known distribution to environmental No data available

compartments

12.5 Results of PBT and vPvB assessment

Phosphine Not applicable, inorganic substance

12.6 Other adverse effects

**Ecotoxicity assessment** 

Short-term (acute) aquatic hazard

Phosphine Very toxic to aquatic life.

Long-term (chronic) aquatic hazard

**Phosphine** Not classified due to lack of data.

### **SECTION 13: Disposal considerations**

#### 13.1 Waste treatment methods

#### **Product Disposal**

The Company encourages the recycle, recovery and reuse of materials, where permitted. If disposal is necessary, The Company recommends that organic materials, especially when classified as hazardous waste, be disposed of by thermal treatment or incineration at approved facilities. All local and national regulations should be followed.

## **SECTION 14: Transport information**

Transportation status: IMPORTANT! Statements below provide additional data on listed transport classification.

The listed Transportation Classification does not address regulatory variations due to changes in package size, mode of shipment or other regulatory descriptors.

#### FIFRA INFORMATION

This chemical is a pesticide product registered by the Environmental Protection Agency and is subject to certain labeling requirements under federal pesticide law. These requirements differ from the classification criteria and hazard information required for safety data sheets, and for workplace labels of non-pesticide chemicals. Following is the hazard information as required on the pesticide label:

**EPA Registration Number:** 68387-8

DANGER - POISON - Skull and Crossbones

Restricted Use Pesticide (due to high acute inhalation toxicity of phosphine gas).

Keep out of reach of children.

Fatal if inhaled. The liquid may cause burns. This product is highly toxic to fish and wildlife. Phosphine gas may deaden the sense of smell. Phosphine may ignite spontaneously at levels above its lower flammability limit of 1.8% v/v (18,000 ppm). Ignition of high concentration of phosphine can produce an explosive reaction.

## 15.3 State Regulations

## US. California Safe Drinking Water & Toxic Enforcement Act (Proposition 65)

Please contact your local sales representative if you have questions and need more information concerning this product under California's Proposition 65 statute (www.p65warnings.ca.gov).

### **SECTION 16: Other information**

Not all acronyms listed above are referenced in this SDS.

The information provided in this Safety Data Sheet is correct to the best of our knowledge, information, and belief at the date of its publication. Such information is only given as a guidance to help the user handle, use, process, store, transport, dispose, and release the product in satisfactory safety conditions and is not to be considered as a warranty or quality specification. It should be used in conjunction with technical sheets but do not replace them. Thus, the information only relates to the designated specific product and may not be applicable if such product is used in combination with other materials or in any other manufacturing process, unless otherwise specifically indicated. It does not release the user from ensuring he is in conformity with all regulations linked to its activity.
